

Product Designer specializing in user-centered solutions and technical product design. Proven track record of leading projects from concept to launch, optimizing workflows for B2B, SaaS, and CRM products. Skilled in designing strategic solutions for complex scenarios, working towards humanizing enterprise software.

Experience

Product Designer | Seeker

A creative agency specializing in digital content creation and distribution.

07/2021 - 10/2022 Beijing, China

ByteDance - Touchable screen interaction project

- Designed an interactive touch-screen display for ByteDance's cultural wall, featuring responsive design that adapts to different screen sizes. The project resulted in a 10,000 daily click rate increase, enhancing user engagement and showcasing company values.
- Developed 50+ wireframes for the cultural wall display, completing five iterations in collaboration with engineers and product managers to align design solutions and technical feasibility.
- Revamped the tech exhibition layout and developed a comprehensive visual style guide, including typography, branding, layout, and motion design for the screen.

Tencent Binhai Mansion - Gesture Based interaction project

- Developed design strategies for Tencent's exhibition hall, emphasizing gesture-based interactions and designing with a focus on accessibility and inclusivity for underrepresented groups, ensuring an equitable user experience throughout.
- Created 2 interactive prototypes for four user flows, performed usability testing with 30+ users, collected feedback to make tradeoff decisions and iterated multiple times on the design.

Product Design Intern | Eaton

A global power management company specializing in electrical systems software

05/2024-08/2024 Pittsburgh, US

- Crafted the MVP version of Edge Mastro Octopus, leading the end-to-end UI/UX design process for the device management software from 0 to 1. Transformed broad concepts into a streamlined product achieving an 88% task success rate post-launch.
- Simplified complex workflows into intuitive user flows, delivering over 20+ high-fidelity UI designs and iterating on 6+ usability-tested versions to ensure scalability and consistency in the design system.
- Led UX audits to enhance usability and accessibility of Eaton's digital products, delivering actionable recommendations to execute strategic design decisions, improve overall user experience and engagement metrics.

UI/UX Designer(Sponsored Project) | Salesforce

A Multinational cloud-based software company specializing in CRM solutions for business

01/2024-05/2024 Bloomington, US

- Collaborated with a cross-functional team to gather both quantitative and qualitative insights through user interviews with two groups and a SWOT analysis of competitors, identifying key pain points to optimize the Trailblazer online community platform.
- Developed a rewards system by designing 3+ user flows and 10+ interfaces, driving engagement between new and experienced users and resulting in an 18.2% increase in interaction rates and a 12% boost in overall platform activity.

UI/UX Design Intern | Zhi - Tech Group

A top Chinese e-commerce platform for product price comparison and consumer insights.

6/2018 - 09/2018 Beijing, China

- Oversaw the design of the international website ValueQ, taking charge of banner ads, UI design, and successfully boosting website traffic by 60%.
- Created eye-catching visual content for the company's Twitter and Instagram posts, resulting in a significant increase in followers to 100k.
