SUMMARY

Results-driven cybersecurity professional with expertise in compliance, risk management, and security operations. Experienced in leading audits (ISO 27001, SOC 2, HIPAA, FedRAMP), automating compliance workflows, and strengthening security postures. Skilled in risk management, incident response, business continuity, vulnerability management, and third-party risk management. Background in software development enhances technical problem-solving. Passionate about building resilient security programs that drive compliance, reduce risk, and foster trust.

WORK EXPERIENCE

Rapid Talent

Information Security Analyst

April 2022 – Present

- Led internal audits and compliance initiatives across ISO 27001, SOC 2, SOX, HIPAA, PCI DSS, HITRUST, and FedRAMP. Institutionalized auditing tasks to maintain ongoing audit readiness. Additionally, applied NIST 800-53, NIST CSF, and DORA to enhance security governance and compliance maturity.
- Conducted risk assessments and led remediation efforts to strengthen overall security posture.
- Conducted internal audits and year-round control self-assessments to ensure control effectiveness.
- Maintained risk registers, created risk acceptance forms, and conducted internal assessments.
- Managed POA&Ms to drive risk mitigation and support continuous improvement.
- Developed and presented comprehensive security metrics dashboards and reports to senior leadership, providing actionable insights on compliance status, risk trends, and audit outcomes to support informed decision-making.
- Conducted quarterly access reviews to enforce least privilege and access control policies.
- Conducted KnowBe4-based security awareness training and phishing simulations, reducing phishing attack success rates by 20%.
- Performed Business Impact Analysis (BIA) to determine RTOs and RPOs for critical business functions.
- Developed and maintained Business Continuity Plans (BCP) and Disaster Recovery (DR) plans to ensure resilience during disruptions.
- Developed and maintained incident response (IR) playbooks, improving organizational readiness for security events.
- Created, reviewed, and updated policies and procedures to ensure compliance with evolving regulations, standards, and best practices.
- Responded to data breaches as a privacy incident management team member by assessing materiality and ensuring compliance with regulatory reporting.
- Maintained CCPA/GDPR compliance by conducting gap analysis, handling DSAR requests through automated workflows, Privacy rights automation, Privacy Impact Assessment (PIA), and Records of Processing Activities (RoPA) management using OneTrust.
- Conducted regular asset inventory reviews to maintain system visibility and control.
- Developed a vendor management program and implemented SIG Lite questionnaires for third-party risk assessments.
- Utilized GRC platforms (OneTrust, VISIO Trust, UpGuard, Responsive) to automate and enhance risk management workflows, reducing manual assessment efforts by 50%.
- Led third-party security audits by evaluating vendors' cybersecurity controls, data protection policies, and operational resilience to mitigate potential security risks.
- Worked closely with procurement teams to integrate security risk assessments into the vendor selection and onboarding process, ensuring early risk identification.
- Enhanced vulnerability management using Netsparker, Nessus, Veracode, Lacework, and Eracent.
- Supported secure cloud operations in AWS and Azure, including CSA STAR CAIQ assessments.
- Conducted AI risk assessment and used OpenAI Playground and Copilot to build personalized AI tools, enhancing efficiency through automation and task optimization.

Tech Duels

Cybersecurity Analyst

April 2020 – April 2022

- Developed and maintained risk register and Plans of Action and Milestones (POA&M) to identify and mitigate potential risks.
- Implemented security policies and procedures in alignment with industry standards, ensuring compliance and effective risk mitigation.
- Participated in vulnerability scanning and remediation efforts, collaborating with teams to secure systems and applications.
- Conducted vendor questionnaires and reviews to evaluate third-party risks, contributing to informed decision-making regarding vendor relationships.
- Monitored security alerts and contributed to incident response activities.
- Developed and delivered cybersecurity training programs for employees, enhancing overall security awareness and promoting best practices across the organization.
- Supported daily cybersecurity operations, including security alert monitoring and incident response.
- Prepared and maintained audit and compliance documentation, ensuring that security policies and protocols were up to date.
- Gained hands-on experience in risk assessment, vulnerability management, and policy implementation.

Block Software Solutions

Software Developer

May 2019 – April 2020

- Led multiple client projects, including web development and management software, ensuring timely delivery and quality standards.
- Coordinated cross-functional teams and utilized Agile methodologies to improve development efficiency.
- Conducted manual QA testing to identify software defects and enhance reliability pre-deployment.
- Managed project budgets, timelines, and resources to optimize overall performance.

Junior Developer

August 2018 – May 2019

- Collaborated with cross-functional teams to troubleshoot, debug, and optimize frontend and backend applications, resulting in a smoother user experience.
- Actively contributed to peer code reviews and incorporated insights from senior engineers to enhance code quality and accelerate professional growth.
- Conducted manual QA testing and implemented feature enhancements.
- Supported in the development of websites, web apps, and management software for businesses.
- Provided bug fixes, feature enhancements, and support for ongoing projects.

Software Engineering Intern

June 2018 – August 2018

- Collaborated with a team of engineers to debug and optimize backend APIs, resulting in improvement in application response time and increased system reliability.
- Contributed to various software development projects under the guidance of senior developers.
- Learned key programming concepts and best practices in a professional environment.
- Supported in debugging, testing, and documentation of software applications.

EDUCATION

State University of New York at Canton

Canton, NY

Bachelor of Science in Cybersecurity (NSA CAE-CD Validated)

SKILLS & CERTIFICATIONS

- **Frameworks & Compliance:** ISO 27001, SOC 2, FedRAMP, HiTRUST, HIPAA, NIST 800-53, PCI-DSS, CIS Controls, CCPA, GDPR, DORA, CSA CAIQ

- **Security Tools:** Nessus, Burp Suite, Veracode, Tenable, Netsparker, Invicti, Lacework, Dassana, CrowdStrike, Darktrace
- **GRC Tools:** Navax, OneTrust, LogicGate, Drata, RFPIO
- **Risk Management:** POAM, Risk Register, TPRM, Vendor Risk Assessments
- **Technical Expertise:** Threat Detection, Incident Response, Vulnerability Management, Network Security
- **Privacy Management:** Privacy Requests, Cookie Consent Implementation
- **Ticketing & Project Management:** Jira, ServiceNow, Microsoft Planner
- **Languages:** Python, C++, PowerShell, Java
- **Operating Systems:** Linux, Windows Server, UNIX, macOS
- **Business Tools:** MS Word, Excel, PowerPoint, Power BI, Power Automate, Monday.com
- CodePath Cybersecurity Certification (2023)
