

Mohammed Masood Parvez | Cloud Engineer

Location: FL, USA | Phone: +1 (561) 887-1992 | Email: mohdmasood027@gmail.com | [LinkedIn](#)

SUMMARY

Results-driven **Cloud Engineer** with **7+ years** of experience in designing, deploying, and optimizing cloud solutions for enterprise and e-commerce environments. Skilled in building **hybrid cloud architectures** that integrate **AWS, Azure, and Cisco SDN technologies**, delivering scalable, secure, and cost-efficient infrastructures. Proficient in **infrastructure-as-code (IaC)** using **Terraform** and **Ansible**, automating deployments and reducing provisioning time by up to 50%. Expertise includes **container orchestration with Kubernetes**, **CI/CD pipeline automation with Jenkins and GitHub Actions**, and **predictive analytics with Apache Kafka and Snowflake** for real-time resource optimization. Demonstrated success in achieving 99.95% uptime through fault-tolerant infrastructure designs and implementing disaster recovery strategies to ensure business continuity. Recognized for reducing cloud operating costs by 20% through resource optimization and rightsizing. Strong background in secure VPC configurations, multi-AZ deployments, and compliance with **GDPR** and **HIPAA** standards. Experienced in monitoring and optimizing cloud environments using tools such as **CloudWatch**, **Nagios**, and **Grafana**. Proven track record in training IT teams and ensuring operational autonomy post-deployment.

TECHNICAL SKILLS

Operating Systems:	Linux (Ubuntu, Debian, RHEL, CentOS), Windows Server/Client OS
Cloud Platforms:	AWS (EC2, S3, VPC, RDS, Lambda, Elastic Beanstalk, CloudFront, IAM)
Version Control:	Git, GitHub
Containerization & Orchestration:	Docker, Kubernetes (K8s), Amazon ECS
Infrastructure as Code:	Terraform, AWS CloudFormation
Configuration Management:	Ansible
Virtualization:	VMware Client, Hyper-V
Scripting & Automation:	Shell scripting (Bash, PowerShell), Python, Perl
Databases:	Oracle, SQL Server, MySQL, NoSQL (DynamoDB, MongoDB)
Ticketing & Collaboration Tools:	Jira, BMC Remedy
Monitoring & Logging:	AWS CloudWatch, Prometheus, Grafana
Networking:	OSI Model, TCP/IP, HTTP/S, DNS, DHCP, VLAN, VPN, Switches, Routers, IPsec

PROFESSIONAL EXPERIENCE

Synchrony Financial, FL, USA

Jan 2024 – Current

DevOps Engineer

- Engineered hybrid cloud infrastructure with **AWS Direct Connect** and **Transit Gateway**, optimizing connectivity between on-premises and cloud environments, resulting in **30% enhanced scalability**.
- Migrated legacy monolithic applications** to a **microservices architecture** using **Docker** and **Kubernetes (EKS)**, reducing deployment times by **40%** and improving application resilience.
- Developed multi-region disaster recovery solutions** with **AWS S3 replication**, **RDS Multi-AZ**, and **Route 53 failover**, ensuring **99.99% uptime** and reducing **RTO** to **under 2 hours**.
- Optimized CI/CD pipelines** with **Jenkins** and **AWS CodePipeline**, reducing deployment time by **20%** and ensuring consistent, error-free releases.
- Executed **Terraform** to automate the provisioning of cloud infrastructure on AWS, ensuring consistency and scalability across environments and reduced manual configuration errors and increased **scalability by 30%**.
- Imported existing **AWS infra into Terraform** state files, making it easier to manage & track changes to resources.
- Implemented security best practices** including **AWS KMS**, **IAM policies**, and **AWS Config**, ensuring compliance with **PCI DSS** and **SOC 2** standards for financial data protection.
- Led the **integration of monitoring** and alerting tools like **Prometheus**, **Grafana**, ensuring high availability and early detection of issues across cloud applications and infrastructure which enhanced **system efficiency by 25%**.
- Collaborated with cross-functional teams** to design scalable, secure cloud solutions, supporting a **30% increase in peak workload capacity** and improving overall system reliability.
- Managed **incident** response and troubleshooting for production systems, ensuring a **high uptime** of 99% and fast resolution of issues in collaboration with engineering teams, minimizing service interruption.
- Collaborated with **development** teams to optimize the **software development lifecycle (SDLC)**, reducing bottlenecks by automating testing, deployments, and environment provisioning

24-7 Intouch, HYD, INDIA

May 2019 - Dec 2022

AWS Cloud Engineer

- Engineered and deployed scalable, high-availability AWS infrastructure** for a high-traffic e-commerce platform using **EC2 Auto Scaling**, **Elastic Load Balancer (ELB)**, and **Amazon CloudWatch**, achieving **99.95% uptime** during peak traffic.
- Architected secure, multi-AZ VPCs** with **public and private subnets**, ensuring **data isolation** and **high availability** for critical applications, enhancing overall system resilience and security.
- Automated infrastructure provisioning** using **CloudFormation**, ensuring consistent deployments across **development, staging, and production** environments, streamlining operations.
- Optimized AWS resource utilization** via **AWS Trusted Advisor** and **CloudWatch**, resulting in an **18% reduction in operational costs** through rightsizing and performance tuning.
- Implemented disaster recovery solutions** using **EBS snapshots** and **S3 versioning**, ensuring **business continuity** and reducing recovery time during system failures.
- Led the migration of 40+ virtual machines** and healthcare applications to AWS using **CloudEndure Migration**, ensuring **HIPAA compliance** and minimal downtime.

- **Developed and implemented comprehensive monitoring solutions** using **AWS CloudWatch** and **SNS**, proactively identifying and resolving system performance issues and bottlenecks.
- Provided hands-on support for **incident management**, ensuring timely resolution of production issues and collaborating with teams to prevent recurring incidents, achieving a **20% improvement** in system reliability.
- **Provided mentorship and training** to junior engineers on AWS best practices, security protocols, and disaster recovery strategies, enhancing team capability and ensuring smooth post-migration operations.

Citius tech, India

System Administrator

Jan 2017 - Apr 2019

- Administered and maintained **Linux/Unix and Windows systems**, including installation, configuration, and patch management, ensuring security and optimal performance.
- Administered user access through **Active Directory** and **LDAP**, enforcing **multi-factor authentication (MFA)** and **role-based access control (RBAC)** to secure system access.
- Deployed and maintained continuous monitoring solutions like **Nagios** and **Zabbix**, proactively identifying performance issues and reducing downtime by **15%**.
- Developed and deployed **shell scripts to automate repetitive tasks**, such as user account provisioning and **system backups**, improving efficiency by **30%**.
- Resolved **300+ support tickets weekly with a 98% SLA** adherence by diagnosing technical issues, implementing root cause analysis (RCA), and providing comprehensive resolutions.
- Managed **Active Directory** for provisioning, de-provisioning, and access control implemented **Group Policies** and **organizational units (OUs)** to enforce security standards and compliance.
- Developed robust disaster recovery strategies using **VMware vSphere Replication**, ensuring data integrity and rapid restoration during outages.
- Configured data encryption with **AES-256** and secure protocols like **SSL/TLS**, ensuring compliance with HIPAA and other regulatory standards.
- Profile reset, updating the host file, IP configuring in various VLANs, troubleshooting and access privileges to share drive, tools and different network printers and scanners.
- Monitored and identified issues during outages, **escalating critical incidents** to Infra teams.
- Participating in new client onboarding calls and coordinating with IT-Infra team in creating various OU, **whitelisting** process related tools and URLs in proxy firewall.
- Provided support for Windows, VPN, desktop configurations, software installations, and troubleshooting.
- Deploying images through **Tivoli/SCCM** Provisioning Manager for OS Deployment in all workstations.

EDUCATION

Master's Information Technology and Management	May 2024
Florida Atlantic University	
Bachelor of Technology Electronics & Communication Engineering	May 2018
Jawaharlal Nehru Technological University, K	

CERTIFICATION

AWS Certified Cloud Practitioner

AWS Certified Solutions Architect – Associate

HashiCorp Certified Terraform Associate

ACHIEVEMENTS

- Recognized as '**Performer of the Month**' for resolving **1,200+** customer support tickets in a month, ensuring **99% SLA**.
- Awarded as '**Lead of the Month**' for delivering exceptional results at **24-7 Intouch**.
- Received the '**Bravo Award**' for resolving high-impact issues with rapid response times, achieving **98% CSAT**.
