JPMC | NYC

Agility Lead /ITPM

01/2021 - 07/2023

- P&I Rules Engine is a fact-based business rule modeling component for two user groups
- LOB Audience management to create and manage data features
- CCB Ad Operations and products to configure treatment rules
- It supports Recommendation engine in answering specific questions
- Rules Engine are leveraging Sapiens decision modeling notation and UI capabilities to allow users to easily organize and configure rules
- APG is being designed as an enterprise solution that can scale to make personalization recommendations across channels, functions and LOBs
- It usually relies on algorithms or models with feedback loops that reinforce good decisions and reduce sub-optimal choices over time
- They are usually, but not always, invoked by a channel's experience service to obtain a recommendation on how, what and when to present to a customer.

JPMC | NYC

Scrum Master/ITPM

08/2018 - 07/2023

- Project: MIDAS
- MIDAS is a platform for decision that enables Chase to drive business outcomes by connecting with Customers through contextual, relevant and timely information, however and wherever they choose to interact with it
- MIDAS is Chase's implementation of Pega Marketing which constantly re-calculates and prioritizes the most appropriate Offer to present to a customer as the customer interacts with each Chase.com and Chase mobile application page
- MIDAS, using Pega Marketing, delivers real-time customer centric 'Next-Best-Actions' that lead to greater engagement and consistent messaging, increasing customer value across all phases of a Chase customer's journey
- MIDAS will deepen relationships with customers and increase their lifetime value to the bank.

IBM | NYC

Scrum Master

11/2015 - 07/2018
