SUMMARY

- Proficient in .NET full-stack development with 10 years of experience in designing, developing, deploying, and maintaining scalable web applications.
- Expertise in software development life cycle (SDLC) methodologies like **Agile, Scrum and Kanban and Waterfall**.
- Strong focus on delivering high-quality, maintainable, and scalable solutions with an emphasis on performance optimization and secure coding practices.
- Advanced knowledge of C# 10.0 features, including records, global using directives, enhanced pattern matching, and nullable reference types.
- Experience in **multithreading** and asynchronous programming with async/await for concurrent tasks.
- Extensive use of **Collections and LINQ** for data manipulation.
- Proficient in applying design patterns like Singleton, Repository, Dependency Injection, and Factory in development.
- Skilled in creating and interpreting **UML diagrams**, including use case diagrams, sequence diagrams, and class diagrams.
- Expertise in architectural patterns in **Onion Architecture, MVC Architecture, N-Tier Architecture, Microservices Architecture**.
- Development experience with **ASP.NET Core Web API (RESTful services), ASP.NET Core MVC, ASP.NET Core Web Applications, Microservices with Docker and Kubernetes**.
- Skilled in developing and consuming **RESTful APIs** and **SOAP** services.
- Proficient with API documentation and testing using tools like **Swagger UI** and **Postman**.
- Hands-on experience with **Entity Framework** and **Entity Framework Core** for **database interactions**, **ADO.NET** for direct database communication.
- Proficient in working with **JSON** and **XML** for data exchange.
- Experience in **Azure Cloud**, including **API Gateway, Blob Storage, and Azure Functions**.
- Understanding of **OAuth2, JWT, and SSL/TLS** for secure authentication and communication.
- Proficient in setting up **CI/CD pipelines** using **Azure DevOps** from a developer's standpoint.
- Expertise in modern front-end frameworks in **Angular 10+** with **TypeScript**, Familiarity with **AngularJS**
- Proficient in **HTML, CSS, JavaScript, Bootstrap, jQuery, and Ajax** for **UI/UX** development.
- Proficient in SQL databases like **SQL Server** and **PostgreSQL**.
- Hands-on experience with NoSQL databases like **MongoDB**.
- Experience in writing efficient **PL/SQL stored procedures, functions, and triggers**.
- Knowledge of **RabbitMQ** and **MSMQ** for message-driven architectures.
- Backend testing frameworks: **xUnit, NUnit**, Front-end testing tools like **Karma, Jasmine, Jest, Mocha, Chai** and Web services automation using **Cucumber** and **Citrus**.
- Experienced in API testing using **Postman, SOAP UI, and Swagger UI**.
- Proficient with version control systems like **Git, SVN, and TFS** and Hands-on experience with build tools such as **Visual Studio, Visual Studio Code, and SQL Server Management Studio**.
- Familiar with code quality tools like **SonarQube**, Logging and monitoring using **Log4Net** and **Serilog**.
- Familiar with **JIRA, Rally, and TFS** for agile project tracking and ticketing.
- Strong problem-solving abilities and a quick learner.
- Effective team player with excellent collaboration and communication skills.
- Committed to continuous learning and staying updated with emerging technologies.

TECHNICAL SKILLS

Programming Languages	C# (latest features like records, global usings, nullable types), TypeScript, JavaScript (ES6+), SQL, PL/SQL.
.NET Technologies	ASP.NET Core Web API, ASP.NET Core MVC, ASP.NET Core Blazor, ASP.NET Razor Pages, Microservices with .NET 7.0, Docker, Kubernetes.
Web-Technologies	Angular 15+, React (optional), HTML5, CSS3, Bootstrap 5, Sass/SCSS, jQuery (legacy), Ajax.
Databases	SQL Databases: SQL Server, PostgreSQL; NoSQL Databases: MongoDB, Cosmos DB (Azure).
ORM Frameworks	Entity Framework Core (EF Core), ADO.NET
Web Servers	IS (Internet Information Services), Nginx
Testing Frameworks	Backend: xUnit, NUnit, MSTest; Frontend: Jasmine, Karma, Jest; Web Service Automation: Cucumber, Citrus.
Web Services	RESTful APIs (OAuth2, JWT, Swagger/OpenAPI), SOAP (legacy), Azure API Gateway.
Version Control	Git (GitHub, GitLab, Azure Repos), SVN (legacy).
Cloud Computing	Azure: API Gateway, Azure Functions, Blob Storage, Key Vault, App Service, CI/CD with Azure DevOps; AWS: Lambda, S3, EC2.
Methodologies	Agile (Scrum/Kanban), DevSecOps principles.

Professional Experience:

Client: United Health Group (Eden Prairie, MN)

SEP 2022 - Present.

Role: Sr .Net full stack Developer.

Responsibilities:

- Migrated legacy systems to **.NET Core** single-page web applications (SPAs) using **Entity Framework**, **Web API**, **Telerik**, and **AJAX**.
- Designed and consumed **RESTful APIs** using **.Net Web API**, securing them with **OAuth** and managing data access via **ODATA**.
- Automated server-side processes using **VB.NET**, implementing multithreading techniques to optimize high-load application performance.
- Developed and tested feature engineering pipelines using **Azure Data Factories** for data transformation and integration.
- Built interactive SPAs with **JavaScript** frameworks like **ReactJS** and **Angular**, ensuring seamless user experiences. Created pipelines and set up build agents using **Azure DevOps** for CI/CD processes, providing deployment.
- Migrated relational databases to **Snowflake**, optimizing legacy applications for cloud environments.
- Designed and deployed **Azure Functions** with triggers to scale data and write messages to **Kafka topics**.
- Developed Docker configuration files for automated builds and deployments across multiple environments.
- Implemented rich user experiences using **Material Angular Library** with **Angular 14** components.

- Built reusable **ReactJS** components and configured **React-Router** for SPAs.
- Designed reusable UI components using **Angular 4.x**, **TypeScript 2.3.4**, and **NGRX** for state management.
- Created complex stored procedures in **SQL Server** and integrated them with applications using **Entity Framework**, **LINQ**, and **Lambda queries**.
- Optimized **MongoDB** performance by creating indexes and configuring parameters.
- Validated and tested RESTful API endpoints using **Postman** and documented responses for team collaboration.
- Applied Agile and **Test-Driven Development (TDD)** practices to deliver robust solutions.
- Utilized **CA-APM** to monitor production performance and address bottlenecks.
- Resolved bugs in **Azure Databricks Spark** processes for optimized data loading to blob storage.

Environment: C#, VB.Net, Visual Studio 2019, ASP.NET MVC, JavaScript, jQuery, Bootstrap, Telerik Controls, Bootstrap, Entity Framework, IIS, XML, AJAX, Oracle, SQL Server, Agile, Scrum, Waterfall, GIT, TFS, Snowflake, Docker Engine, Kubernetes, Mongo DB.

Client: State of OHIO -Coloumbs, OH

Role: Sr. Net Developer

JUL 2020 – AUG 2022

Responsibilities:

- Designed and developed web applications using **ASP.NET Core**, **Angular**, and **Bootstrap** for the frontend, and **ASP.NET Core Web API with Swagger** for the backend.
- Created core functionality with the **ASP.NET MVC Framework (C#.NET)**, adhering to business requirements and application design principles.
- Designed and implemented **container-based microservice architecture** and managed local **Docker** infrastructure for scalable deployment.
- Developed cloud console applications using **C#**, **.Net Core**, and **Visual Studio** with databases hosted in **Azure**.
- Enhanced applications using **ASP.NET Core** with a microservices architecture, deploying via **Docker containers**.
- Provisioned **AWS App Mesh** for network traffic controls across **EC2 instances**, **ECS**, **EKS**, **SQS**, and **AWS Fargate**, integrating monitoring tools like **CloudWatch**, **Splunk**, and **Kibana**.
- Set up **CI/CD** infrastructure for building and deploying **Spring Boot Microservices** using **Jenkins**, **Docker**, and **Kubernetes**.
- Created and maintained scalable and fault-tolerant **AWS** and **Azure** environments across availability zones using **Terraform** and **CloudFormation**.
- Implemented **CI/CD pipelines** using **Team Foundation Server (TFS)**, **GitHub**, and **Azure Container Service** to streamline deployments.
- Developed **RESTful services** using the **Restify framework** to pass JSON data for dashboard-server communication.
- Designed and consumed **RESTful APIs**, leveraging **Azure DevOps** for version control and the **CI/CD** model.
- Built and deployed a **Windows Service Application** using **.NET Framework**, **MS SQL Server**, and **Azure Service Bus Messenger**.
- Extensively wrote and optimized **SQL Stored Procedures** and functions to meet business requirements, ensuring database performance tuning.
- Developed reports using **SSRS** and **PowerBI**, and created complex performance-oriented queries for business logic.
- Enhanced frontend interactivity with reusable **Angular 7** components, using **NgRx** for efficient state management.
- Followed **Agile Methodology**, participating in daily scrum meetings and updating user stories.
- Integrated services like **GitHub**, **Azure Code Pipeline**, **Jenkins**, and **AWS Elastic Beanstalk** for deployment pipelines.

Environment: .Net Core, AWS, Web API, JavaScript, Azure, Swagger, RabbitMQ, Angular 7, ASP.NET Core MVC, C#, HTML, CSS, SQL Server, TFS, Bootstrap, HTML 5, CSS 4, Git, Power BI

Client: Lululemon- Wilmington,DE

APR 2019– MAY 2020

Role: .Net Developer

Responsibilities:

- Collaborated with clients to study requirements and tailored solutions to meet specific business needs.
- Actively involved in coding and designing applications using **ASP.NET Master Pages, MVC, ADO.NET, Web API, JavaScript, XML, CSS, and Visual Studio.**
- Developed and enhanced features for **PD4 on Sitecore CMS**, defining information architecture for a multilingual, multi-site global platform on **Sitecore CMS**.
- Built RESTful/WCF web services and APIs to support new business requirements.
- Led a team of six programmers, estimating design work, assigning tasks, and ensuring the successful delivery of business projects.
- Wrote **Terraform API modules** to automate the creation of **AWS services** like RDS instances, VPCs, Autoscaling groups, Load balancers, EC2, EKS, Lambda, and S3 buckets.
- Utilized **Azure DevOps** for CI/CD pipelines, repositories, and artifact management.
- Worked on cloud computing using **Windows Azure**, integrating applications with **SQL Server Azure** and deploying .NET-based web applications.
- Set up CI/CD pipelines using **Jenkins, GitHub, Terraform, and AWS** for automated deployment.
- Implemented **SQLite database** with Xamarin forms to save essential information locally on devices.
- Resolved database-related trouble tickets and created test databases for development requirements.
- Extensively used **T-SQL** for writing stored procedures, functions, and queries on **Oracle and SQL Server** databases.
- Developed reports using **SSRS**, legacy **Crystal Reports**, and **.Net-based crystal reports**.
- Designed user interfaces using **HTML5, JavaScript, ReactJS, JSP, and jQuery**, with state management handled via **NGRX**.
- Validated user input with **ASP.NET validation controls**, including regular expressions and custom validators.
- Optimized the performance of **Sitecore controls** through advanced caching mechanisms.
- Addressed database performance issues by tuning SQL queries and optimizing stored procedures.
- Worked with **Visual Studio** and **.Net Core Framework** to implement business logic. Integrated **LINQ to SQL/XML** and **ADO.NET** to connect to SQL databases and manipulate data.
- Monitored and managed web application resources using **APIs, RESTful services, SOAP, and PowerShell**.

Environment: Visual Studio IDE, C#, ASP.NET, TFS, ADO.NET, Web API, XML, IIS, HTML5, CSS3, JavaScript, Razor, WCF, WPF, Sitecore, Azure, SQL Server, SSMS/SSIS/SSRS, .NET Framework, SQL, ADO.NET, Web Services, Angular JS, SSO, MVC 5, DevOps.

Client: Citizen's Bank, Providence, RI

DEC 2015 - DEC 2018

Role: Full Stack developer

Responsibilities:

- Involved **SDLC** of the project from Design, Development & Testing in **Agile Scrum Methodology**.
- Involved in developing web applications using the **C#.NET, ASP.NET MVC, HTML5, CSS3, JavaScript, Bootstrap, Angular framework, SOAP, WCF, REST, JQuery**
- Used **ASP.NET MVC** Page Controller pattern to add functionality to individual pages such that to accept input from the page request, invoke the requested actions.
- Developed a single page, cross-device/cross-browser web utilizing **AngularJS**, and **Bootstrap**.
- Involved in development of web graphics and graphical (UI) Pages using **AJAX, HTML, CSS, and JavaScript**
- Developed **WCF** services for **Desktop** applications.
- Used lambda expressions **LINQ To SQL** and **LINQ to entities** for retrieving and inserting data in database.

- Implemented **WEB API Services** for **CRUD** operations with **HTTP** verbs **GET, POST, PUT** and **DELETE**
- Strong Experiences in creating and consuming **XML Web Services** and having knowledge of **SOAP, SOAP HEADER, and SOAP EXCEPTION.**
- Worked on all the required Stored Procedures, User Defined Functions, Triggers, and Views using **T-SQL** as per business logic.
- Performed T-SQL tuning & optimization of queries for reports that took longer execution time using MS SQL Profiler, Index Tuning Wizard and SQL Query.
- Expert in using SQL server reporting services like **SSRS** and creating various reports such as **Parameterized, Cascading, Tabular, Matrix, Chart and Drill down reports.**
- Worked on **.NET** Security features such as Authentication & Authorization, Forms-based Authentication, Authorizing Users, Roles, and User Account Impersonation.
- Worked on **Azure Data Storage** technologies like **Blob Storage** and **Data Lake.**
- Validate the code using Fortify scan tool, based on the fortify report modify the code.
- Participated in code reviews and Co-ordination between the development team, QA team.
- Performed the Unit testing for the developed modules using **Nunit, Mock .Net** framework.

Environments: C# .NET, ASP.NET MVC, WCF, Web API, HTML5, CSS3, Azure, JavaScript, jQuery, AJAX, Bootstrap, LINQ, IIS, GIT, SQL, T-SQL, and SSRS, WPF

Client: ICICI Prudential (Hyderabad, India)

JUN 2014 – NOV 2015

Role: Software Developer

- Actively participated in the complete **Software Development Life Cycle (SDLC)**, ensuring quality delivery of the project.
- Built web applications using **ASP.NET, JavaScript, jQuery, HTML, and CSS** with a focus on user experience and performance optimization.
- Developed the **GAC Explorer module** using **C# WinForms** to improve application functionality.
- Worked extensively with **ASP.NET Web Forms, Web Services**, and state management features to optimize application caching and ensure security.
- Created and consumed **SOAP Web Services** using **XML** and **XSL** to expose reports and facilitate data sharing across systems.
- Utilized **ADO.Net objects** to populate data sets, grids, and repeater controls for data display and manipulation.
- Designed screens using **custom controls, user controls, and server controls**, delivering responsive and dynamic UI elements.
- Conducted **unit testing, integration testing, and system testing** using the **NUnit framework** to ensure high- quality deliverables.
- Prepared weekly defect and status reports by analyzing and tracking bugs to identify and resolve issues promptly.
- Created **drill-down, drill-through, sub-reports, and linked reports** using **MS SSRS** and managed report subscriptions for timely delivery.
- Set up and managed the **ELK Stack (Elastic Search, Log Stash, Kibana)** for log file analysis and monitoring across servers, and created **geo-mapping visualizations** integrated with **AWS CloudWatch** and **Lambda.**
- Maintained source code versions using **Team Foundation Server (TFS)** ensuring proper version tracking and collaboration among team members.

Environment: ASP.Net, Visual Studio, ADO.NET, C#, .Net Framework , Web Forms, Web Services, XML, SQL Server, NUnit Framework, jQuery, SSRS, IIS, TFS.

• **Educational Details:**

Bachelor's in Electronics and Communication Engineering from Jawaharlal Nehru Technological University Kakinada, India 2014.
