Woodland Hills, CA | neda.kamel11@gmail.com | 818-263-4746 | [Linkedin](#) | [Github](#)

SUMMARY

A Data Analyst skilled in Python, SQL, machine learning, and data visualization. Experienced in ETL, predictive modeling, and automation to enhance decision-making. Holds a Master's in Electrical Engineering and an IBM Data Science Certificate.

WORK EXPERIENCE

Data Analyst | Freelance | 2023-Present

- Design interactive dashboards using Tableau and Power BI to visualize key client business metrics.
- Develop automated ETL pipelines to process and clean large datasets, reducing manual effort by 40%.
- Conduct predictive modeling using Python and machine learning algorithms to forecast customer trends.
- Provide data-driven recommendations to businesses, improving operational efficiency and revenue growth.

Data Analyst (Contract) | The CBRS | 2022 – 2023

- Conducted data analysis on 30 antenna locations and 50+ receivers daily, optimizing network coverage and performance.
- Collaborated with cross-functional teams to improve data accuracy and integrity, enhancing decision-making efficiency.
- Developed SQL queries and Python scripts for data extraction, transformation, and analysis.
- Created visual reports and dashboards, providing key strategic planning and optimization insights.

Data Consultant | Freelance | 2015-2022

- Assisted startups and small businesses with data collection, cleaning, and visualization to improve decision-making.
- Built custom data models and SQL databases for clients, streamlining data storage and retrieval processes.
- Provided ad-hoc analysis and reporting to identify trends and optimize business performance.
- Developed Python-based automation scripts, reducing repetitive tasks and improving workflow efficiency.

EDUCATION

- Master of Science in Electrical Engineering
- Bachelor of Science in Electrical Engineering
- IBM Data Science Professional - Certificate

SKILLS

- Programming: Python, SQL, R
- Data Processing: ETL, Data Cleaning, Data Wrangling, Data Validation
- Machine Learning: Predictive Modeling, Feature Engineering, Probability Theory
- Data Visualization: Tableau, Power BI, Matplotlib, Seaborn
- Automation: Workflow Optimization, Scripting, Process Automation
- Analytics: Business Intelligence, Statistical Analysis, A/B Testing, Data-Driven Decision Making
- Databases: SQL Databases, NoSQL, PostgreSQL, MySQL
- Cloud & Big Data: AWS, Google Cloud, Hadoop, Spark
- Interpersonal: Problem-Solving, Critical Thinking, Communication, Team Collaboration, Time Management, Attention to Detail
