PROFESSIONAL EXPERIENCE

Electric Power Research Institute (EPRI), Charlotte, North Carolina

SENIOR BUSINESS SYSTEMS ANALYST/PRODUCT OWNER, 04/2023 – 12/2024

Led end-to-end enterprise implementation of web-based application functionality, driving enhancements, fixes, and upgrades in collaboration with third-party vendors and cross-functional teams. Delivered expertise in enterprise-level systems configuration, administration, and optimization to align with capacity, throughput, and strategic business objectives. Spearheaded requirements gathering, solution design, user story development, functional/technical specifications, and comprehensive application testing to ensure successful outcomes and business value delivery.

- Contracted on behalf of Apex Systems, the position was ultimately eliminated due to 2025 budget cuts.
- Provided strategic problem-solving across complex, interrelated business functions spanning multiple divisions, enhancing operational efficiency and system performance.
- Coordinated project management efforts to sync scope, quality, and deliverables for web solution deployments; results ensured stakeholder expectations were met.
- Identified and advanced process improvement opportunities; refined project management methodologies and piloted new product innovations.
- Directed change management initiatives, including training and go-live support, to drive user adoption and seamless transitions to enhanced systems.
- Collaborated with sector leads to resolve critical project and operational challenges; optimized outcomes through proactive issue resolution.
- Partnered with stakeholders, subject matter experts (SMEs), and business users to translate high-level business requirements into detailed user stories and actionable technical specifications for development teams and project team members.

Ashley Furniture Industries, Advance, North Carolina

LEAD BUSINESS SYSTEMS ANALYST/PRODUCT OWNER, 12/2020 – 04/2023

Drove enterprise IT solutions, system enhancements, and supply chain process optimization to attain strategic business initiatives. Partnered with project teams, IT leaders, and supply chain and transportation managers to

architect sophisticated information systems, resolve complex system logic issues, and translate business needs into actionable solutions. Delivered iterative product development through data-driven research, user story documentation, and comprehensive business requirements (BRDs) while streamlining processes to boost system performance and scalability.

- Delivered expertise in APAC/Control systems, supply chain backlog management, MS Visio, High Jump, and Ashley Supplier to support system development, integration, and project execution.
- Spearheaded legacy platform enhancements, including creating user experience prototypes, AS400 screen mockups, and graphical user interface designs; employed Agile, Scrum, and Kanban methodologies for project management, quality assurance, and system testing.
- Performed in-depth research and analytics to identify new business opportunities, improve warehouse management systems, and augment BI and sales reporting accuracy via key stakeholder collaboration.

Bank of America, Charlotte, North Carolina

IT PROJECT MANAGER (SHORT-TERM CONTRACTOR), 05/2020 – 10/20

Executed IT project management strategies to support daily operations with budget, schedule, and scope requirements. Devised and maintained project proposals, timelines, and specifications while coordinating program prioritization, requesting management routines, and tracking tools. Communicated progress, deadlines, and metrics to senior leadership and stakeholders to realize business objectives.

- Managed technology, data governance, and project oversight; results ensured seamless integration across business units.
- Offered treasury data analysis and reporting; leveraged Tableau dashboards for improved insights.
- Tracked system enhancements using Libra change control and Jira for efficient issue management.

Allscripts, Atlanta, Georgia

PROJECT & PRODUCT MANAGER/SR. BUSINESS ANALYST, 09/2013 – 04/2020

Recruited to lead strategy development, business process analysis, and project lifecycle management to resolve financial, operational, and technological challenges. Formulated roadmaps, testing strategies, and impact analyses while translating business requirements into technical specifications and automated solutions for client-facing applications. Teamed with .NET engineers and marketing managers to resolve website issues, define CMS requirements, and manage SIT and UAT for software releases.

- Assisted in developing business cases for new digital initiatives, outlining the value proposition, expected ROI, and strategic alignment for the Marketing team.
- Acted as key liaison between business teams and IT team, documenting and translating functional requirements into technical specs during migration from Oracle JDE to Oracle Cloud.
- Created and maintained comprehensive agile documentation including user stories, process flows, and sprint retrospectives.
- Supported e-commerce CMS, Saba LMS, OMS, and multiple platforms during major migrations, including McKesson EIS and NantHealth.
- Handled escalations, Jira incidents, and system validation to guarantee quality deliverables and synergy.
- Created Oracle JDE module and Oracle Cloud dashboards for executive leadership; integrated customer data to advance strategic forecasting and marketing insights.
