

NACHIKET DIGHE

Current Location: Seattle, WA | Open to relocation and remote work

Email: nachiket0412@gmail.com | **Phone:** +1-857-707-8098 | **LinkedIn:** [linkedin.com/in/dighent](https://www.linkedin.com/in/dighent)

GitHub: github.com/naachiketdighe | **Portfolio:** naachoes.vercel.app

EDUCATION

University of Cincinnati (GPA: 3.7/4.0 | B.S in Computer Science, Honors Program), Cincinnati, OH Aug 2020 – May 2025

Harvard University (Pre College-Program, Computer Science), Cambridge, MA July 2019

SKILLS

Languages: Java, Python, JavaScript (ES6+), C++, SQL, C#, TypeScript

Full stack: Dropwizard, Spring Boot, Supabase, React, Sass, Angular, ASP.NET, TailwindCSS

Data Infrastructure: Kafka, Spark, Elasticsearch, AWS (EC2, Lambda, OpenSearch, S3), HBase, Docker

RELEVANT WORK EXPERIENCE

ITP Aero - Bilbao, Spain

Backend Engineer (Internship)

Jan 2025 – Apr 2025

- Improved processing time by **14%** in a legacy app using **C++** to optimize data structures and minimize data leaks.
- Manipulated shared memory** using C++ to allow live updates without system restarts, reducing tool downtime.
- Built a **Python-SQL ETL pipeline** with **unit testing and exception handling**, reducing analysis prep time.
- Wrote 50+ **pytest cases** with diverse fixtures, covering key edge cases in data pipelines, reducing production bugs.

University of Cincinnati - Cincinnati, OH

Data Analyst (Part-time)

Aug 2024 – Dec 2024

- Developed an interface** with **Python** and Excel VBA, saving **10+** hours of admin work weekly for 500+ volunteers.
- Created **real-time dashboard** system using **Power BI** and **DAX**, automating reporting for 10+ users.
- Engineered a **Google Sheets API integration** with **Python** async workflows, improving data availability.
- Migrated **manual processes to SQLite** with automated scripts, reducing daily processing time to 15 mins.

Delta Air Lines - Atlanta, GA

Data Scientist (Co-op)

May 2024 – Aug 2024

- Built an **ETL pipeline** in Python (Pandas), extracting data from **100+** multi-column and low contrast PDFs using OCR.
- Developed an **OCR system** using Florence-2, and fine-tuned it on **50+** labelled PDFs, improving extraction accuracy.
- Optimized text preprocessing** for BERT-based model training by integrating **spaCy** and custom **regex** rules.
- Supported cross-functional teams with rapid access to processed data, boosting issue resolution speed.

Full Stack Software Engineer (Co-op)

May 2023 – Aug 2023

- Created a **Flask/AngularJS search app** with Elasticsearch backend, reducing document retrieval time by **90%**.
- Architected a **serverless pipeline on AWS** (Lambda, S3), processing **1TB+** of unstructured data with auto scaling.
- Improved search accuracy by **35%** by using KNN-based vector search with embeddings from a pre-trained model.
- Recognized for outstanding contributions in team feedback (earned "exceeded expectations" in all categories)

Data Analyst (Co-op)

Aug 2022 – Dec 2022

- Leveraged **Monte Carlo simulations** in **Python** to model part failure probabilities, saving **\$12K+** in inventory costs.
- Automated **Tableau dashboards** with SQL, tracking **50+** KPIs and cutting monthly reporting time by 10 hours.
- Identified **\$1K+/year** in vendor contract savings via Python-based price inconsistency analysis.

Chamberlain Group - Chicago, IL

Full Stack Software Engineer (Co-op)

Jan 2022 – Apr 2022

- Architected and implemented a **multi-threaded iOS** app using **Swift**, integrating **CocoaMQTT** for async messaging.
- Created **SwiftUI** components from Figma prototypes by UI/UX engineers with state-efficient **MVVM** logic.
- Built a secure **REST API** integration between **Python**-based ALPR backend and the iOS client, with **JWT** auth.
