SUMMARY

Computer Science graduate student with over 3 years of expertise in full-stack development, specializing in backend (Java, Spring Boot) and frontend (React, JavaScript). Experienced in building scalable, cloud-based applications and microservices, with roles as a Software Engineer at Infor and a Teaching Assistant at UNT. Seeking to apply technical skills in impactful software projects.

EDUCATION

University of North Texas

M.S. in Computer Science

Denton, TX

Jan 2023 - Expected Dec 2024

GPA: 3.8/4.0 **Teaching Assistant:** Supported Software Engineering and Empirical Analysis courses.

Honors: Awarded the Academic Excellence Grant, with a 40% scholarship per semester.

Coursework: Database Management System, Data Structures, Data Analytics, Machine Learning, Software Architecture.

GITAM University

Bachelor of Technology in Computer Science

Hyderabad, India

June 2017 - May 2021

Coursework: Object-Oriented Programming (OOP), Computer System Architecture, Operating System, Algorithms, Web Technology.

WORK EXPERIENCE

University of North Texas

Teaching Assistant | Java, Spring Boot, React, Docker, Microservices, AWS

Denton, TX

Aug 2023 - Dec 2024

- Mentored 40 students in programming languages including Java, JavaScript, and Python, along with web technologies such as HTML, React, and CSS which resulted in a 30% increase in project success rates among participants.
- Provided comprehensive guidance on modern frameworks and technologies such as Spring Boot, React, Docker, and AWS.

Infor

Software Engineer | Java, Spring Boot, React, Software Development, IT Services

Hyderabad, India

Aug 2021 - Dec 2022

- Developed a secure external user access feature for the HCM system by leveraging Spring Boot for backend services, React.js for a responsive frontend, and Spring Security for authentication and authorization.
- Designed and implemented user interface enhancements for the HCM application using React.js, including redesigned forms, interactive widgets, and responsive cards, significantly improving the user experience and accessibility.
- Administered MySQL databases with over 100,000 records, utilizing Spring Data JPA and Hibernate to perform CRUD operations, ensure data consistency, and optimize database performance for high-traffic applications.
- Collaborated with a cross-functional team of over 15 resources, following Agile methodologies to ensure timely delivery of project milestones. Focused on unit testing, code reviews, and debugging to maintain code quality and application reliability.

SKILLS & ACTIVITIES

Programming Language: Java (J2EE, Core Java), JavaScript (ECMAScript), Python, SQL, C, C++, Landmark Pattern Language.

Frameworks and Libraries: Spring, Spring Boot, Spring MVC, Spring Web, Spring Cloud, Hibernate, JPA, Node.js, React, Tomcat.

Web Technologies and Build Tools: HTML5, CSS5, Restful API, jQuery, JSX, JSP, JSON, XML, Maven, Gradle.

Databases and Other Tools: PostgreSQL, MySQL, Oracle, Relational Databases (RDBMS), JDBC, Jira, Git, Postman.

Microservices and Cloud Architecture: Microservices design, development, deployment, Docker, Kubernetes, GCP, AWS.

Methodologies: Agile, Scrum, Agile Development, Sprint planning, Retrospective.

PROJECTS

Employee Management System

- Developed a full-stack employee management system leveraging Spring Boot, React, JSX, MySQL, and Axios. Integrated RESTful APIs and utilized Hibernate, JPA, Bootstrap, and CSS to create a responsive and dynamic user interface.

Todo Management App

- Built a full-stack Application using Spring Boot, Spring Security, JPA (H2 Database), and React with JWT-based authentication. Executed CRUD operations and RESTful APIs, deploying the application on AWS using Docker.

Currency Conversion Microservices System

- Designed a microservices-based currency conversion system using Spring Boot, Spring Cloud, and Kubernetes. Implemented service discovery, load balancing, and inter-service communication with Feign and Rest Template. Containerized the application with Docker, deployed on Kubernetes, and integrated resilience patterns for fault tolerance and observability.

Course Management Backend

- Enhanced a backend application with Spring Boot, JPA, Hibernate, RESTful WebServices to facilitate efficient data operations.

E-commerce React Application

- Implemented a responsive React web application with product views and shopping functionality, utilizing component-based architecture and Context API for state management; skills include React.js, JavaScript, HTML5, CSS3, and responsive web design.

Certifications

Java Spring Boot Full Stack Developer: Spring Framework, Spring Boot, Spring Data, React, JPA, Docker, and AWS.

Java Spring Boot Microservices: Spring Boot, Spring Cloud, Docker, Kubernetes, and REST API (REST Web Services).
