Professional Summary

Master's student in Information Technology with over 2 years of professional experience delivering innovative and scalable software solutions. Adept at solving complex technical challenges, driving clean-code practices, and collaborating with global teams to enhance enterprise systems. Proven ability to design and deploy REST APIs, optimize database performance, and implement cloud solutions. Recognized for leading critical backend development projects, ensuring seamless functionality, and improving system efficiency in high-pressure environments.

Skills

- **Programming Languages:** Python, Java, Dart
- **Databases:** Oracle, PL/SQL, MySQL, MSSQL, Mongo DB
- **Cloud & Mobile Technologies:** AWS (S3, EC2, Lambda, Redshift), Firebase, Flutter
- **Tools & Platforms:** Docker, Jenkins, Kubernetes, Postman

Experience

Software Engineer | HCL, Hyderabad, India

Feb 2023 - Jul 2023

- Designed and deployed new features using Python and CI/CD pipelines, improving deployment speed by 15%.
- Customized and implemented Temenos Infinity for a UK-based bank, ensuring compliance with client requirements.
- Developed and optimized PL/SQL scripts, reducing query execution time by 20%.
- Automated deployment processes using Docker and Jenkins, improving system reliability.
- Collaborated with cross-functional teams to deliver scalable backend solutions.

Product Engineer | Temenos, Hyderabad, India

Aug 2021 - Feb 2023

- Designed and developed new features and enhancements for key modules of the Temenos Infinity Digital Banking suite, leading to a 20% increase in customer satisfaction.
- Pioneered clean-coding practices by establishing framework-specific guidelines and enforcing repository standards, improving code quality and reducing bugs by 30%.
- Initiated and coordinated voluntary code cleanup and database script optimizations, cutting query execution times by 25% and improving overall system performance for priority clients.
- Designed and implemented over 15 features and enhancements using JavaScript, Java (RESTful services), and relational databases like Oracle, MySQL and MSSQL, achieving seamless integration.
- Served as the backend Point of Contact (POC) for owned modules, preparing comprehensive technical documentation and workflows.
- Effectively communicated technical designs and system workflows to cross-functional teams, facilitating seamless integration and faster decision-making.
- Supported L3 development teams in delivering critical performance optimizations and workflow re-engineering, reducing ticket resolution times by 35% for high-profile clients like Eurobank and Standard Chartered Bank.

Python Intern | Conscripts, Remote

May 2020 - Jul 2020

- Designed and implemented a GUI application in Python to categorize and analyze questions based on difficulty levels, improving user experience and data organization.
- Utilized data analysis techniques to evaluate and optimize application performance, enhancing its usability by 95%.

Projects

Time Tracker App:

- Designed and developed a cross-platform task management application using Flutter, Firebase, and MySQL, providing users with tools to manage tasks, set reminders, and track productivity.
- Integrated real-time database functionality in Firebase and MySQL for seamless data storage and retrieval across web and mobile platforms.
- Delivered a robust system with plans for future enhancements, including time utilization analytics and subscription-based recommendations.

Image To Speech

- Designed and implemented a GUI application in Python to extract and read text from images, utilizing Optical Character Recognition (OCR) libraries.
- Improved accessibility for visually impaired users by automating text-to-speech conversion for scanned documents and images.

Auto Login for Instagram and LinkedIn

- Developed an automation tool using Python and Selenium to auto-login into platforms like Instagram and LinkedIn.
- Ensured secure and efficient handling of credentials, reducing repetitive manual processes by 90%.

Certifications

- Python Data Structures – Google (Coursera)
- Java Programming: Principles of Software Design – Duke University (Coursera)
- Data Analysis with Python – IBM

Education

- Master of Science (M.S.) - Information Technology
Southern New Hampshire University - Dec 2024 (Expected)
- Bachelor of Technology - Computer Science Engineering
CMR Institute of Technology - Jun 2021
