

NAVYASRI DUDELA

Data Analyst

navyasri@techjobmails.com | +1 (732) 979-9172 | [LinkedIn](#)

PROFESSIONAL SUMMARY

Results-driven Data Analyst with over 5 years of experience, skilled in transforming complex datasets into actionable insights that enhance business performance. Expert in developing and optimizing forecasting models, executing exploratory data analysis (EDA), and creating dynamic dashboards for strategic decision-making. Proven ability to manage large, sensitive datasets while ensuring data integrity, and leveraging cloud platforms like AWS for scalable, secure data solutions. Adept in Agile and Waterfall project methodologies, committed to delivering impactful, data-driven results that align with organizational goals.

SKILLS

- **Development Methodologies:** Agile, Waterfall
 - **Programming Languages:** Python, R, SQL, JavaScript
 - **Big Data & Data Processing:** Hadoop, Spark, Kafka, Hive, Snowflake, SSIS, SAS, PySpark
 - **Libraries & Frameworks:** NumPy, Pandas, Matplotlib, SciPy, ggplot2, Scikit-learn, Flask
 - **Visualization Tools:** Tableau, Power BI (DAX, Power Query), Microsoft Suite (Excel)
 - **Cloud Platforms:** AWS (S3, Athena, Redshift), Azure, Google Cloud Platform
 - **Database Technologies:** MySQL, PostgreSQL, MongoDB, Cassandra, MS SQL Server, Oracle
 - **Data Science & Machine Learning:** Exploratory Data Analysis (EDA), Data Mapping
 - **Healthcare Technology:** Healthcare Terminology, HIPAA Compliance, Electronic Health Records (EHR), Healthcare Data Standards
-

EDUCATION

MS in Information Systems

Saint Louis University, USA

August 2022 - May 2024

Bachelors in Information Systems

JNTUH College of Engineering, India

August 2016 - June 2020

PROFESSIONAL EXPERIENCE

Metlife, USA

Data Analyst

May 2023 – Present

- Led cross-functional teams in Agile environments, ensuring timely project delivery and aligning insights with business goals, resulting in a 30% increase in project success rate.
- Conducted exploratory data analysis (EDA) with R and ggplot2, uncovering trends that influenced strategic decisions and improved project outcomes by 25%.
- Developed and optimized financial forecasting models in Python (NumPy, pandas, scikit-learn), increasing accuracy by 20%, which improved budgeting efficiency and reduced forecasting errors by 15%.
- Leveraged Power BI for financial analysis, identifying actionable insights into trends, risks, and growth opportunities, which helped drive a 10% cost reduction.
- Improved customer conversion rates by 15% through A/B testing on marketing strategies and product features, providing data-driven insights to optimize campaigns.

- Analyzed large datasets in SQL to assess financial performance, delivering key insights that supported a 20% increase in operational efficiency.
- Built interactive Tableau dashboards for senior management, enhancing data visualization and cutting reporting time by 25%.
- Designed robust ETL processes in SQL and Python to ensure data integrity and support Business Intelligence needs, reducing data processing time by 30%.

Aplus Datalytics, India

Data Analyst

Jan 2019 - July 2022

- Managed healthcare data projects using the Waterfall methodology, achieving all milestones on schedule and documenting data flows and architecture with Visio, enhancing team communication and reducing project turnaround time by 15%.
- Consolidated healthcare datasets (EHR, claims, pharmacy) with Python, uncovering trends that streamlined reporting and reduced data processing time by 20%.
- Integrated CRM data through Salesforce and conducted advanced analysis with SAS, using Python for data wrangling to ensure data accuracy and reduce error rates by 18%.
- Used AWS S3 for HIPAA-compliant storage and processing of healthcare data, increasing data accessibility for analytics teams and reducing processing times by 25%.
- Developed optimized data models in MySQL, PostgreSQL, and MongoDB, enhancing scalability and improving query performance by 30%.
- Created ETL processes with SSIS and Snowflake, consolidating data from diverse healthcare sources and increasing data consistency by 40%.
- Processed large healthcare datasets with Hadoop on cloud platforms, driving comprehensive data analysis that improved patient outcome predictions by 20%.
- Designed real-time Power BI and Tableau dashboards to monitor patient outcomes and resource allocation, leading to a 15% improvement in care quality.
- Utilized DAX and Power Query in Power BI to provide healthcare administrators with dynamic reporting, enhancing insight accessibility and decision-making speed by 20%.
- Conducted training sessions on Power BI, Matplotlib, and Seaborn for healthcare staff, empowering teams with skills that increased data-driven decision-making by 30%.
- Ensured HIPAA compliance and adherence to HL7 standards when managing sensitive healthcare data, safeguarding patient privacy and reducing data security incidents by 20%.

CERTIFICATIONS

- AWS Certified Cloud Practitioner
