

Name: Mohammed Nayeem

Mail I'd: nayeem3589@gmail.com

Number: 773-831-7782

PROFESSIONAL SUMMARY:

- ❖ Over 10+ years of Systems Engineering and Application virtualization experience in managing physical and virtual servers, supporting large organizations adhering to ITIL standards.
- ❖ Hands on expertise at data center consolidation, migration, relocation, planning, architecting, installation, configuration, and administration of Microsoft Windows, VMware ESX/ESXi servers, EMC SAN storage, Brocade SAN IP switches, Emerson Remote Infrastructure Terminal servers, IP KVM's and IP Power management Units and Linux administration.
- ❖ Handled successful implementation of new Data Center Infrastructure, Network infrastructure, DC Applications and Virtual Infrastructure.
- ❖ Installation and configuration of Microsoft Windows 2008 Server, MS Exchange 2010 and Microsoft SharePoint.
- ❖ Managed and configured Microsoft's Office 365 Azure directory so that it was properly synchronized with the on premise Active Directory environment.
- ❖ Hands - on experience with VMware vSphere, vRA, VDI View, SRM, vROps, P2V, Windows, Linux and EMC/NetApp Storage Area Networks (SAN) & Network Attached Storage (NAS).
- ❖ Detail - oriented and with a solid technical background and excellent interpersonal skills. Certified CyberArk Defender + Sentry, CompTIA (A+, Linux+, Security+), CIW-WSA, and ITIL professional.
- ❖ Team player in implementing and deploying MS infrastructure and MS Office 365.
- ❖ Created Azure Active Directory, Configuration Manager, Microsoft Intune, and Windows 10 diagrams based off Enterprise Customers Infrastructure assessment, engineered customers deployment
- ❖ Utilized Dapr's state management API to store and retrieve data for microservices in key-value stores like Redis and Azure Cosmos DB, ensuring consistency across distributed systems.
- ❖ Specialized in provisioning and managing the AWS EMR cluster on AWS, managing the Devops CICD pipeline provisioning the components for the AWS data lake infrastructure.
- ❖ Cloned many production servers from one host to other host and Snapshot of VMs in Hyper-V and VMware environment.
- ❖ Configured Dapr's Pub/Sub component to enable asynchronous messaging between microservices, streamlining event-driven architectures and reducing system latency.
- ❖ Experienced in provisioning and managing the KAFKA infrastructure on AWS, collecting the logs and storing the log files in the AWS S3 bucket.
- ❖ Good experience with Helm charts deployments, writing manifest files to deploy K8s objects/microservices
- ❖ Worked in the planning, implementation and support of vROps, vRA, vRB and Loginsight for our private cloud
- ❖ Implemented Disaster Recovery Solutions of physical and virtual environments using various local and remote replication methodologies – like VMWARE SRM, SAN Based Replication like – EMC Recover Point, SRDF, HP Remote Copy.

- ❖ Strong knowledge and working experience on Citrix Xen Desktop, VWMARE VDI environment supporting user environments.
- ❖ Performed Data Center Migrations, OS version upgrade projects on Windows, Unix, VMWARE, storage platform refresh projects, POC's.
- ❖ Worked on a project to upgrade vCenter from 5.5, 6.0, 6.5, 6.7, 7.0 across multiple Data Centers.
- ❖ Worked on P2V and V2V conversions using VMware Converter
- ❖ In-depth knowledge of the Citrix-Microsoft Desktop Virtualization Solutions (Citrix XenDesktop and Citrix XenApp versions 6.5 & 7)
- ❖ Worked with VMware Orchestrator, VMware realze Automation 6.0 (vRA), catalog management, creating cloud server provisioning entitlements, creating and defining business groups, creating catalogue items, creating services for the catalogue items, creating Windows and Linux (Red Hat6) blueprints
- ❖ Management in administering and configuring mobile devices for enterprise users via Office 365, Intune Standalone, Hybrid (SCCM integration with Intune), and Azure Active Directory environments.
- ❖ Hands on experience in GCP services like EC2, S3, ELB, RDS, SQS, EBS, VPC, EBS, AMI, SNS, RDS, EBS, Cloud Watch, Cloud Trail, Cloud Formation GCP Config, Autoscaling, Cloud Front, IAM, R53.
- ❖ Implementation and support experience with VMware and other virtualization products such as Nutanix AHV, & Microsoft Hyper - V, as well as datacenter conversions, consolidations, and migrations. Cloud solutions including AWS & Azure.
- ❖ Automated nearly everything related to Kubernetes using Gitlab Pipelines and ArgoCD. Majority of pipelines used Terraform to build and update clusters.
- ❖ Used Chef for configuration management of hosted Instances within GCP. Configuring and Networking of Virtual Private Cloud (VPC).
- ❖ Job role includes mentoring junior members and handling escalations and responsibilities involved working closely and effectively with all levels of management to satisfy schedules and productivity requirements.
- ❖ System performance monitoring using BMC Mainview and RMF.

Technical Knowledge:

Server OS	Windows 2008, 2012, 2016, 2019, Red Hat Enterprise Linux
Virtualization and Cloud Tools	sphere 6.0 /5.5/5.1 / 5.0 / 4.1 / 4.0, Six 6.7/6.5/6.0/5.5/5.1/5.0, Hyper 7.1/7.0/6.2, Microsoft Azure, Amazon Web Services
Hardware	Cisco UCS 5108 Chassis, HP Gen 8,9,10 Blade and Standalone, Dell VXRAIL, DELL PowerEdge 630, 640, 740 Chassis, Dell Poweredge MX7000
Networking Protocols	TCP/IP, DHCP, SNMP, WINS, DNS, NFS, LDAP, SMTP, iSCSI, NFS, FC, FCOE.
Storage and Backup	VSAN, SAN, NAS, (Dell, EMC, Networker, Avamar,Veeam)
Monitoring Tools	Telegraf Grafana, BMC investigate, BMC perceiver and BMC trusight, Vrops (VMware vRealize Operations Manager vRealize log Insight(vRLI) and vRealize Operations(vROPs) PowerBI, Bluecat Address Manger
Scripting	Windows Power Shell, VMware power CLI
Switching	DNS, DHCP, SAN Storage, TCP/IP

Database servers	Oracle 8i, 9.2.x, 10, MySQL, Cassandra and Sybase on Solaris and Red Hat Linux and Win NT/2000, MySQL 7, 2000, 2012
Operating System	Windows 2003, 2008, 2008 R2, 2012, 2012R2, Red hat Linux 4.x/5.x/6.x, ES3/4, and UNIX.
VMware Virtualization Skills	ESX/Six 4/5/6 Sphere 3 and 4, VI3, Virtual Center Server, P2V, V2V, Storage Motion, HA, DRS, SRM 4.0, Host Profiles, VIP, VMware Consolidated Backup, VMware Management Assistant, VMware Sphere Client, VMware View 4, VMware Thin App, Events & Alerts, Capacity Planning, Plate Spin Power Converter, VMware SDDC, Realize Automation and Realize Orchestrator.

PROFESSIONAL EXPERIENCE:

Capital One, NY
Sr. Systems Engineer

Jul 2021- Till Date

Responsibilities:

- ❖ Supporting pre-sales efforts with enterprise technical subject matter expertise.
- ❖ Providing technical solution guidance for customers and potential customers.
- ❖ Migrated applications to the PKS, GCP cloud.
- ❖ Proficient knowledge with Helm charts to manage and release of helm packages.
- ❖ Performed Daily Monitoring of System performance, capacity & managed Inventory adjust System configurations to accommodate required loads and functionality.
- ❖ Experienced in ITSM/ITIL processes, delivering against aggressive SLA & schedules in a fast pace enterprise environment.
- ❖ Utilized Dapr's workflow component to automate complex microservices orchestration, enabling seamless execution of business logic across multiple distributed services.
- ❖ Implemented Dapr's observability features, including distributed tracing with OpenTelemetry and metrics collection with Prometheus, enabling real-time monitoring of microservice interactions.
- ❖ Worked on OpenShift for container orchestration wif Kubernetes container storage, automation to enhance container platform multi-tenancy also worked wif Kubernetes architecture and design troubleshooting issues and multi-regional deployment models and patterns for large scale applications. In order to provide secured network connectivity to the containers we used Calico. Responsible for build and deployment automation using VM Ware ESX, Docker, Kubernetes containers and Chef.
- ❖ Designing and configuring proof of concept and demonstration environments for customers to include hyper-converged solutions, private cloud, hybrid cloud, & public cloud technologies, including AWS & Azure.
- ❖ Experienced in configuring, customizing, and extending monitoring tools (Grafana, Splunk)
- ❖ Configured Confidential Intune for Mobile Device Management (MDM) and Mobile Application Management (MAM) in Office 365
- ❖ Experience with Active Directory Domain Services (AD DS), Microsoft DNS, DHCP, File & Storage Services, Active Directory Federation Services (ADFS/SSO).
- ❖ Deployed function beat to send the logs from AWS services like S3, Cloud Trail and Cloud Watch to the ELK installation in cross-account environments.

- ❖ Hands on experience with build tools like Hudson/Jenkins, ArgoCD, Concourse, VMware v center GitHub, ANT, Maven and other products like Bamboo, JIRA, BitBucket for building of deployable artifacts.
- ❖ Implementation and management of Private Cloud (IAAS) using VMWare vRealize automation (vRA) in distributed environment.
- ❖ Involved in migrated Rackspace VM'S to Azure Cloud and was responsible for setting up Backups and Site Recovery as part of Disaster Recovery Strategy.
- ❖ Created, tested and deployed an End to End CI/CD pipeline for various applications using Jenkins as the integration server for Dev, QA, Staging, UAT and Prod Environments with Agile methodology.
- ❖ Deployed Elastic Cloud Enterprise on AWS with the help of custom-written Terraform, Ansible and Shell scripts.
- ❖ Created custom report to measure performance of VMs and ESX servers using Virtual Centre and vROps.
- ❖ Experienced with BMC ProactiveNet BPPM , Patrol Central, BMC TM-ART, BMC Portal, SNMP Trap Integration and BMC Patrol knowledge
- ❖ Good knowledge and experience in using Elasticsearch, kibana and fluentd, CloudWatch, Nagios, Splunk, Prometheus and Grafana for logging and monitoring.
- ❖ Strong Proficiency in all the services offered by Confidential Azure including IaaS, PaaS and SaaS.
- ❖ Built/deployed custom Docker images from Artifactory into EKS8s cluster as part of a Gitlab CI pipeline
- ❖ Hands on experience using ArgoCD to trigger fully automated builds from GitHub for the applications which needs often build releases. Utilized advantages of GITOPS in the build and release processes for automation using Bitbucket as Version Control.
- ❖ Converted AWS Cloud Formation templates to the Terraform templates and integrated with wrapper tools like Terragrunt to make the code more reusable across various platforms.
- ❖ Linked different vCenter servers using linked mode to have a single instance of vSphere client to manage the whole Virtual environment.
- ❖ Identify and push patches and software packages to the persistent desktops using SCCM.
- ❖ Generated Billing reports using AWS services like billing dashboards, trusted adviser, cost explorer and Cloud Trail for cost optimization and Fin-Ops pipeline.
- ❖ Design, implementation, & management of Unisys Federal Cloud & Infrastructure Capability and Development lab.
- ❖ Handled the VMware solutions to support multiple storage connectivity options such as FC-SAN, iSCSI, and NFS.
- ❖ Efficiently worked on troubleshooting installation, network connectivity, certificate validation, DNS Record issues, and integration issues with Lync and Office 365 products.
- ❖ Promoted from Desktop Support Technician to System Administrator Server builds and maintenance Citrix server management VMware server builds and management Tier III troubleshooting support Project management
- ❖ Created and manage device security policies, remotely wipe a device, and view detailed device reports with Microsoft Intune (MDM)
- ❖ Integrated Dapr with cloud-based secret stores like AWS Secrets Manager and Azure Key Vault to securely manage and access secrets for microservices, improving security posture.
- ❖ Created Cron-Jobs, ArgoCD workflows to run security scans, compliance scans and trigger builds for applications run in a cluster.
- ❖ Created a site to site VPN between on premise and Azure, using RAS for secure replication of on premise domain controller, to the newly created azure domain controller
- ❖ Testing and proof of concept in Unisys Capability Lab using technologies including cloud migration, hyper-converged solutions (Nutanix, HyperFlex), private cloud and hybrid cloud solutions (VMware, AHV, AWS, & Azure), Cloud Management Platforms, End point security (Carbon Black, ForeScout, SteelCloud), IoT, etc.

- ❖ Successfully migrated 25k user mailboxes to office365 from Exchange 2013 to create a hybrid deployment. Used Azure AD Connect for directory synchronization and federation with Confidential 3.0.
- ❖ Used custom lambda scripts and AWS config service to identify non-compliant resource creations and then force tagged them with default tags for cost exploration.
- ❖ Sourced, defined, developed, tested, & implemented migration solution for DISA Rapid milCloud® 2.0 Migration.
- ❖ Experience in creating customized dashboard in vROPS to manage compute resource reservation for reclaiming resources.
- ❖ Working according to ITIL V3 handling Incident Management, Change Management, Release Management & Problem Management.
- ❖ Responsible for diagnosing, troubleshooting and resolving IT related issues involving PC hardware and software, printing, network connectivity and email
- ❖ Lead Engineer for delivery of USAF EITaaS new Windows 10 secure Endpoint solution, including Windows 10 E5 with ATP, Carbon Black Protect & Carbon Black Response, Bromium Secure Platform, & SteelCloud automated STIG compliance & remediation.

Bank of America, NY
Systems Consultant

Mar 2019 – Jun 2021

Responsibilities:

- ❖ Contracted direct full time to Nutanix as Sr. Systems Consultant.
- ❖ Post sales, customer facing design, configuration, and implementation of Nutanix based hyper-converged solutions using vSphere ESXi hypervisor and Nutanix AHV hypervisor.
- ❖ Planning to move from VCLOUD to GCP
- ❖ Created Azure automated assets, Graphical runbooks, PowerShell run books that will automate specific tasks.
- ❖ Automated the deployment of Dapr-enabled microservices using CI/CD pipelines with Jenkins and GitHub Actions, reducing deployment times and improving release reliability.
- ❖ Leveraged Dapr's service invocation capabilities to simplify and secure communication between services across different programming languages, ensuring fault tolerance and retries.
- ❖ Designed and deployed AWS solutions using E2C, S3, RDS, EBS, IAM Elastic Load Balancer, & Auto scaling groups.
- ❖ Supported system users by troubleshooting system issues, and documented solutions for future reference.
- ❖ Used built in Exchange migration tools to move data from on premise into Office 365 environment
- ❖ Directed users to proper site for refresh and need for desktop support on a daily basis
- ❖ Azure network experience, VPN and Express route, Azure DNS, Traffic Manager, and Load Balancers.
- ❖ Created various powershell/vbscripts as per the requirements for CI's in Intune
- ❖ Built and Maintained VMware infrastructure with Windows Servers, Windows XP/7 Clients across Test and Demo Environments. Implemented VMware View 4.6 to distribute Client Desktops to user accounts
- ❖ Installed the Splunk server and configured AWS for Splunk add-on to receive logs.
- ❖ Migrations from existing infrastructures to hyper-converged infrastructures.
- ❖ Migrations from existing hypervisor virtual infrastructures to Nutanix AHV hypervisor virtual infrastructures.

- ❖ Design Dashboards with GRAFANA Software, generate reports and private dashboards to verify data metrics for entire CDN Platform
- ❖ Working on ITIL process Model in which handling Incident Management, Change Management & Problem Management.
- ❖ Worked on VROPS to manage, troubleshoot and analyze VDI Infrastructure for future needs.
- ❖ Configured a tool using PERL to start/stop WebLogic and apache servers and to get status of WebLogic servers, view WebLogic server logs, deploying applications using web browser.
- ❖ Assist with provisioning, MDM auto enrollment configurations, Company Portal Branding, Enrollment Restriction Rules, and alerts and notifications within the Intune Endpoint Manager application
- ❖ Created an automated PowerShell/Azure SQL/Power BI solution to analyses and present their Azure billing information in a very user and business friendly way in insurance project.
- ❖ Build servers using GCP, importing volumes, launching EC2, RDS , creating security groups, auto-scaling, load balancers (ELBs) in the defined virtual private connection.
- ❖ Delivery of services to large enterprise and medium to small business in all verticals across North America including, manufacturing, health care, finance, DoD, higher education & k-12 education, federal government, local government, etc.

Macy's, Johns Creek, GA
Asst. System Admin

Dec 2017 – Feb 2019

Responsibilities:

- ❖ Imaging workstations using Ghost. Desktop administration, including software and hardware upgrades, encryption, and VPN connectivity.
- ❖ Provided web solution as per the requirement of the client.
- ❖ Assigned permissions to resources on the application servers for licensed software.
- ❖ Installed, configured and maintained printers for entire company.
- ❖ Designed, installed, and managed Microsoft Cluster Servers (2000, & 2003)
- ❖ Configured and install new PC's, servers and network equipment in support of customer and internal projects.
- ❖ Windows PowerShell was used to extract the data from those servers and loaded to the data mart. SSRS reports were created to send to IT team for monitoring.
- ❖ Responsible for configuring and maintaining Exchange Mail Server and Internet Information server, FTP & SFTP Server and VPN server on Windows 2000/2003 Platform.
- ❖ Configured and Managed VMware server technology for managing windows based network environment.
- ❖ Resets MDM O365, Intune, and SCCM authorities dat determined how devices are managed.
- ❖ Experience with scripting in a Microsoft environment using VBScript or PowerShell ability to work in a fast-paced environment where organizational skills are essential
- ❖ Set up Windows Azure Active Directory for directory synchronization.
- ❖ Provided all types of technical support to the company which included maintaining LAN/WAN connectivity and other required services on Windows 2000 professional, server and advance server
- ❖ As per the requirement of the company I had been provided all types of technical support to the company, which includes marinating LAN & WAN connectivity and other required services on win2k professional, XP, Vista, 2000 server and advance server and Windows 2003 series.

- ❖ Configured network servers and trained local administrators on standard network server procedures, including virus protection and other security measures.
- ❖ Development and upkeep of documentation relating to the clients Azure Active Directory environments.
- ❖ Experience in the areas of DevOps and AWS, setup, integration, and maintenance of CI/CD.
- ❖ Upgraded entire enterprise from Windows Server 2000 running in mixed mode to Windows Server 2003 Native mode that included a step by step reversion plan and without effecting production.
- ❖ Responsible for managing a small-scale network.
- ❖ Integrated EMC storage array VNX, VMAX with vCenter server using VSI plugins, and enabled VAAI and VASA.
- ❖ Worked monitoring tools Such as RTMT and Elk, Grafana on Voip Platforms.
- ❖ Participate in strategic planning and guidance of ESXi environment, which includes various sites, and DR solutions including SRM and VSphere replication.
- ❖ Assigned user accounts and granted permissions to shared resources. Assured senior management of data protection by demonstrating permission settings.
- ❖ Installed, configured, and updated server-based applications, including accounting system and records database.
- ❖ Strong design and live migration experience from on-premises to Azure IaaS & PaaS
- ❖ Maintained software and hardware inventory and was responsible for purchasing new products and dealing with multiple vendors.
- ❖ Established a backup and fault tolerance strategy to insure the reliability of data and decrease downtime for end-users.
- ❖ Worked closely with the Office 365 migration team during large client migrations to assist and provide support
- ❖ Planned, implemented and maintained all IT equipment, including firewall, Web/E-mail servers and modem pools for a startup ISP.
- ❖ Configured and installed new PC's, servers and network equipment in support of customer and internal projects.

Optum, Eden Prairie, MN
Linux Engineer

Apr 2015 – Nov 2017

Responsibilities:

- ❖ Provided support for a large-scale Linux desktop environment, handling complex integrations with Active Directory, Kerberos, and NFS.
- ❖ Designed and deployed automation strategies using Ansible, focusing on image management and reducing manual interventions.
- ❖ Managed developer tooling integration, ensuring smooth operation and configuration across the Linux VDI platform.
- ❖ Creating the AWS Security groups to enable the firewall.
- ❖ Created users, manage user permissions, maintain User File System quota on Redhat Linux and AIX.
- ❖ Developed ECS Terraform module to deploy microservices into AWS.
- ❖ Written Templates for AWS infrastructure as a code using Terraform and Cloud Formation to build staging and production environments.

- ❖ Enhanced monitoring capabilities with Prometheus and Grafana, providing real-time insights into system performance and health.
- ❖ Experience with Windows PowerShell and Visual Basic.
- ❖ Working experienced with Blade Logic Infrastructure on Linux OS.
- ❖ Collaborated with developers to understand their needs and developed tailored solutions to improve their desktop experiences.
- ❖ Deployed various Red Hat Enterprise Linux builds using VMware Templates. Also configuring ifcfg files in Linux and NIC's in Windows servers.
- ❖ Led efforts to improve system stability, reducing downtime and improving overall system performance by 20%.
- ❖ Created and maintained detailed documentation and self-service portals, enabling developers to troubleshoot issues independently.
- ❖ Administered the UNIX/Linux System for clustered HP Servers with fiber attached SAN storage.
- ❖ Administered Citrix VDI infrastructure, improving remote work experiences for developers.
- ❖ Worked closely with security teams to ensure that Kerberos and AD configurations were in line with security protocols.
- ❖ Experienced in installing LAMP Linux, Apache, MySQL, and PHP for different applications.
- ❖ Supported NFS configuration and troubleshooting, improving performance and addressing latency issues.
- ❖ Automated routine tasks and configuration management, improving operational efficiency and reducing human error.
- ❖ Installing, maintaining, upgrading and supporting Redhat Linux systems w/ Oracle 10G RAC with Cluster Ready Services CRS and Sybase database.
- ❖ Conducted performance tuning and system optimization, leading to a significant increase in system responsiveness.
- ❖ Developed and supported the Red Hat Enterprise Linux based infrastructure in the cloud environment.
- ❖ Integrated self-hosted GitLab CI/CD pipelines with developer environments, streamlining the build and deployment process.
- ❖ Played a key role in enhancing the developer desktop environment, resulting in a 25% increase in satisfaction scores from developers.
- ❖ Improved monitoring accuracy by developing custom Prometheus alerting rules to track critical service health metrics.

EDUCATION: Bachelor's in computer science 2010 JNTU
