

NEELIMA KODURI

PROFESSIONAL SUMMARY

Over 6 years of experience as a Full stack developer working through the entire software development lifecycle of design, analysis, implementation, and testing of Web applications.

SKILLS

Java, Spring Boot, React, Angular, JavaScript, HTML5, CSS3, Node.js, AWS, Docker, Kubernetes, Microservices, REST API, GraphQL, SQL, NoSQL, Git, Jenkins, Agile, CI/CD, Spring Data JPA, Hibernate, Kafka, Rabbit MQ, Agile.

EMPLOYMENT HISTORY

FULL STACK DEVELOPER

Oct 2022 - Present

State of Texas- Health and Human Services

Austin, TX

- Developing microservices using Spring Boot, Spring Cloud Config along with Hibernate/Spring Data JPA.
- Optimized container management by integrating Docker with Kubernetes, streamlining deployment processes and reducing operational overhead.
- Implementing event-driven communication patterns between microservices using Kafka.
- Used GIT to maintain the version of the files and took responsibility for doing the code merges and creating new branches when a new feature implementation started.
- Developed and deployed the applications using AWS services such as EC2, S3, Lambda, DynamoDB.
- Designed and developed RESTful APIs using AWS API Gateway and Lambda.
- Developed containerized applications and orchestrated with both ECS and Fargate AWS services.
- Developed and maintained cloud infrastructure using AWS services such as CloudFormation and CloudWatch.
- Responsible for Server migration from various TIBCO platforms to the native Apache Tomcat servers.
- Configured and customized logs using Log4j.
- Working on JSX using Bootstrap, JavaScript, ES6, and React.js for building front-end framework.
- Designed intuitive and user-friendly interfaces tailored to healthcare professionals, patients, and administrators using ReactJS HOC, React promises, Redux for state management, and React Router for navigation.
- Developed various screens for the front end using ReactJS and used various predefined components from NPM (Node Package Manager).
- Implemented real-time data updates using React.js along with technologies like WebSocket or server-sent events (SSE).
- Used Babel to transpile ES6 and JSX code into JavaScript that can load on the browser.
- Hands-on experience with Tailwind CSS framework to optimize the complexity of abstracting styles.
- Implemented Snapshot testing using Jest for React project along with Enzyme test utilities.
- Working with SonarQube for maintaining the proper coding standards across all applications.
- Worked on different environments like Dev, UAT, and PROD.

REACT JS DEVELOPER (GRADUATE ASSISTANT)

Aug 2021 - Jul 2022

Innovation Hub- Florida State University

Tallahassee, FL

- Replaced all React class components with functional components. For stateful management, replaced with new Hooks like useState, useEffect, useReducer, and useRef.
- Working with React Router for developing Single Page Applications SPAs, using lifecycle methods and React async await methods.
- Integrating third-party D3 elements into React components.
- Setting up Hopi/Express web servers with RESTful Node.js endpoints.

- Developed performant and scalable web applications using GraphQL API.
- Applied Oriented Programming techniques to track UI components being added to DOM and to change the behavior of framework methods
- Worked on npm commands and package.json for managing dependencies and dev-dependencies of node js applications.
- Used Middleware Redux-thunk, and Redux-Promise in application to retrieve data from Back-End and also to perform RESTFUL services.
- Used Bootstrap Grid System and CSS3 Media Queries to develop single responsive application with good user experience in all platforms like desktops, tablets and mobile phones.
- Debugged and logged using Chrome developer tools, configured test environment using Karma, and wrote unit test cases using Jasmine.
- Used Node.js to run Grunt tasks and to build the project (compile, minify, concat etc.)
- Developed Servlets and JSPs based on MVC pattern using Spring Framework
- Wrote SQL queries, stored procedures, and modifications to existing database structure as required for the addition of new features using MySQL database.
- Worked on GitHub for maintaining versions and source code of the application.

FULL STACK DEVELOPER
Tata Teleservices Limited

Dec 2018 - Dec 2020
Hyderabad, India

- Developing microservices to automate the workflow using Spring Boot application with Test-Driven Development (TDD).
- Developing responsive and cross-platform compatible web applications using HTML5, CSS3, Bootstrap, JavaScript and Angular.
- Developed user interface by using the React JS, Flux for SPA development.
- Used Middleware, Redux-Promise in application to retrieve data from Back-End and to also perform RESTFUL services.
- Implemented react JS code to handle cross-browser compatibility issues.
- Responsible for working with Rest-based web services using Spring Boot and Spring Cloud.
- Working on the JaCoCo- Java Code Coverage library for the complete code coverage of the developed business logic which ensures the 80% of branch and line coverage for the developed workflow.
- Resolving bugs that have come from Unit testing using the Jest JavaScript testing framework.
- Managed Kubernetes pods and responsible for maintaining the secrets in all DEV, UAT and PROD environments.
- Responsible for Jenkins file scripting for CI/CD pipeline and to build end-to-end orchestration life cycles.
- The defects are tracked and reported using the JIRA software tool and the versions are maintained using ClearCase.

SOFTWARE DEVELOPER
TATA Sky

Dec 2016 - Nov 2018
Hyderabad, India

- Designed the Front-End applications, user interactive (UI) web pages using web technologies like HTML, CSS, JavaScript, and JQuery.
- Worked on HTML5, and CSS3 for web page development and styling.
- Worked on form validations using JavaScript, JQuery functions, and regular expressions.
- Used AJAX in specific scenarios to reduce page refreshing and improve performance.
- Worked on Bootstrap and used media queries to create a responsive web application with in-built templates for buttons, navigations, and forms.
- Used JSON object to send and retrieve data from external services using Rest API calls.
- Wrote SQL queries, stored procedures, and modifications to existing database structure as required for the addition of new features using MySQL database.
- Used Rest API calls for requesting data from external services to the web page.
- Worked on SVN (Subversion) for maintaining versions and source code of the application.
- Tested cross-browser compatibility issues between multiple browsers.
- Facilitated discussions with the Systems Analyst to identify technical requirements.

- Developed and designed the various screens and their architecture in accordance with UI Specs.
- Handled all aspects of the web application including maintaining, testing, debugging, deploying, and printing.

EDUCATION

MASTER OF SCIENCE IN INFORMATION TECHNOLOGY
Florida State University

Jan 2021 - Jul 2022
Tallahassee, FL

BACHELOR OF TECHNOLOGY IN COMPUTER SCIENCE AND ENGINEERING
Jawaharlal Nehru Technological University

Sep 2012 - May 2016
Kakinada, Andhra Pradesh India
