2022

Certified Remote work Professional Certificate

Work Experience

Quality Assurance Analyst: E-cube Global

March 2022 – To date

- Developed and executed comprehensive test plans, including functional, regression, integration, and performance testing.
- Decreased post-production defects by 40% due to setting up comprehensive test scripts.
- Effectively used the Jira, Testrail, and BrowserStack tools to test cases and report defects, resulting in a 99% bug detection rate and logging.
- Implemented test automation using Selenium and Python which led to increased test efficiency by 30%.
- Introduced the team to Agile rituals like sprint planning and PI, exhibiting high teamwork.
- Identified and resolved 70% of system compatibility issues by performing cross-browser testing using BrowserStack.

Quality Assurance Tester: Leader Publishing Worldwide

Feb 2021 – Feb 2022

- Provided comprehensive onboarding support for systems and expert cloud infrastructure support
- Supported the development of user experience (UX) and performed UI automation testing using Selenium.
- Conducted thorough reviews of requirements documents and created detailed analysis.

- Collaborated with development teams to resolve bugs promptly and created comprehensive manual test cases.
- Prepared and delivered clear and concise test reports to clients.

Quality Assurance Analyst: ARIFU

March 2020 – Jan 2021

- Led and collaborated with cross-functional teams in an Agile environment and created Use Cases, Test plans, Test scenarios, Test scripts, and test cases for various projects.
- Conducted API testing using Postman and executed test scripts, documenting bugs and monitoring their lifecycle.
- Performed User Acceptance Tests and upskilled users on system workflows.
- Prepared detailed and comprehensive test plans, test cases, and test summaries using tools like TestRail.
- Recorded, documented, and tracked bugs using Jira, Slack, and Confluence.

Quality Assurance Associate/Tester: ARIFU

Jan 2016 – Feb 2020

- Ensured compatibility of products with supply chain mobile application requirements through comprehensive testing.
- Conducted manual black box, functional, regression, positive, negative, user acceptance, systems, and end-to-end testing.
- Verified and validated user requirements through Requirements Traceability matrix and refinement of test cases.
- Led daily stand-up meetings and effectively managed product and sprint backlogs.
- Crafted test plans for various scenarios, ensuring issues were reported, repaired, and retested before go-live.
- Actively participated in field research, assisting with data collection and note-taking.
