

Recent Data Science graduate with 1+ years of hands-on experience; passionate about exploring new Data Science/Analytics & AI/ML opportunities. Demonstrates strong expertise in Python, SQL, R & data mining, with a proven track record in optimizing processes and enhancing automation through advanced analytical techniques. I've also run my own small business for a year.

EDUCATION

University of Illinois at Chicago (UIC)

May 2024

Bachelor of Science in Data Science with Computer Science, Minor in Business Administration

TECHNICAL SKILLS: Python Pandas, NumPy, Machine Learning, SQL & Databases, SAS, R Programming (R Studio), Tableau, Power BI, Excel, Data Mining, Big Data Analytics, Optimization, C/C++, JAVA (NetBeans), Dart (Flutter), Git Hub, Jira, Agile/Scrum

CERTIFICATIONS: Microsoft PowerBI Data Analyst Professional Certificate (ETL, Dashboards, DAX, SQL, Data Manipulation)

EXPERIENCE:

Data Analyst Intern, ComEd Exelon Company – Emergency Preparedness Dept.

June – Aug 2023

- Developed a predictive model to identify patterns and trends. The model optimized workforce allocation for outage restoration saving costs using Machine Learning techniques.
- Identified and analyzed industry and geographic trends, providing insights that enhanced strategic decision-making and improved overall company performance.
- Leveraged data-driven insights to propose strategic improvements in emergency preparedness protocols, enhancing operational efficiency.

Software Co-Op, Nokia – Mobile Networking, Naperville, IL

Sept – Dec 2022

- Developed programs in Python Panda using Anaconda & Jupyter for testing and modifying data sets and tickets of Radio Control Software. Actively participated in Agile/Scrum development process & code reviews.

Software Intern, ComEd Exelon Company - Large Customer Accounts Dept.

June – Aug 2022

- Developed programs to automate processes & improving operational efficiency.
- Collaborated with cross-functional teams to identify and define business problems to develop data-driven solutions. Communicated findings and insights to stakeholders.

Research Intern, NLP Labs of Prof. Natalie Parde, Dept. of CS, UIC

June – Aug 2021

- Research work is based on Natural Language Processing (NLP)

PROJECTS:

Big Data Project (Chicago Public Schools):

- Developed an early warning system for CPS using big data analytics and implemented ML algorithms for predictive modeling, along with conducting temporal and geospatial analyses on the 2011-2012 Progress Report Cards dataset.
- Skills/Tools Used: Data preprocessing, ML, interactive dashboard development, KPI(Key Performance Indicators)

Machine Learning Application for Breast Cancer Subtypes Data Analysis:

- I applied advanced statistical and ML techniques, in R including logistic regression, LDA, Naïve Bayes, and KNN classification, to distinguish between the two breast cancer subtypes. By selecting two significant genes and normalizing data, I built a robust classification model, highlighting potential diagnostic insights.
- Skills/Tools Used: Regression Analysis, Naïve Bayes, KNN, KPI, Statistical Techniques, Machine Learning Algorithms

LEADERSHIP & ACTIVITIES

- Tutor, Port Academic Center, Engineering Mentor, ENGR 100- Mentor/TA
- Clubs: Women in Computer Science & Women in Engineering Programs
- Mentor, Ignite Leadership Program (6 weeks), Student Leadership Conference & LeaderShape Institute.

HONORS & AWARDS

- Co-Curricular Leadership Medal Recipient
- Chancellor's Student Service Award Recipient
- ComEd Future of Energy Scholarships Recipient (2022 & 2024) awarded to top 40 students in Engineering
