PROFILE

Experienced UI/UX Designer with 4+ years of expertise in user research, wireframing, and prototyping using Figma, Adobe XD, and Axure RP. Skilled in usability testing, A/B testing, and behavioral analytics with Google Analytics, Hotjar, and FullStory to optimize engagement. Proficient in scalable design systems, accessibility-first interfaces, and motion design for seamless user experiences. Adept at AI-integrated UX and immersive interactions, enhancing digital product innovation. Passionate about blending research, design, and technology to craft intuitive, high-impact solutions.

SKILLS

Tools & Technologies

- **User Research & Usability Testing:** Figma, Miro, FigJam, Optimal Workshop, UserTesting, Hotjar, Crazy Egg, Google Analytics, FullStory, Google Optimize, Wave, Axe DevTools
- **UX/UI Design & Prototyping:** Figma, Adobe XD, Axure RP, InVision, Storybook, Material UI, Tailwind CSS, ZeroHeight, ProtoPie, Principle, Lottie, After Effects, Framer Motion
- **Industrial & Immersive Design:** Blender, Rhino, SolidWorks
- **Collaboration & Agile Workflows:** JIRA, Confluence, Zeplin, Slack, GitHub

PROFESSIONAL EXPERIENCE

Endeavour Technologies, UI/UX Designer

08/2024 – present | (Remote), USA

- Spearheaded UX strategy for enterprise SaaS applications, leading design thinking workshops, journey mapping, and stakeholder alignment sessions using FigJam, Miro, and Figma, improving feature adoption by 25%.
- Redesigned complex workflows and enterprise dashboards, leveraging Figma, Material UI, and Tailwind CSS, leading to a 30% reduction in cognitive load and enhanced usability for power users.
- Developed interactive, high-fidelity prototypes with Figma, ProtoPie, and Principle, enabling rapid usability validation and reducing development rework by 40% through early stakeholder buy-in.
- Implemented motion design and micro-interactions using Lottie, After Effects, and Framer Motion, improving user engagement and responsiveness across web and mobile interfaces.
- Conducted heuristic evaluations and cognitive walkthroughs, utilizing Jakob Nielsen's usability principles and accessibility audits with Wave and Axe DevTools, ensuring ADA compliance and a 35% improvement in accessibility scores.
- Optimized form interactions and navigation patterns, running A/B tests, heatmap analysis, and session recordings with Google Optimize, Hotjar, and FullStory, resulting in a 20% increase in task completion rates.
- Designed AI-powered interfaces and chatbot UX, integrating conversational UI frameworks with multimodal interactions, leading to a 50% increase in self-service resolutions for customer support applications.
- Collaborated with engineering teams in an Agile environment, using JIRA, Confluence, and Zeplin to refine design specifications, ensuring pixel-perfect implementation and reducing QA defects by 30%.

New York Institute of Technology (NYIT),

01/2024 – 07/2024 | New York

Graduate Assistant – UX/UI Design & Peer Tutor

- Redesigned an academic advising platform, improving usability through iterative user research, heuristic evaluations, and accessibility audits, leading to a 30% increase in task completion rates and a 40% reduction in navigation time.
- Developed and standardized a scalable design system, ensuring visual consistency, accessibility compliance, and efficient collaboration, which reduced design inconsistencies by 50% and improved cross-platform usability.
- Conducted user research and usability testing, implementing persona development, journey mapping, and card sorting techniques to enhance information architecture, reducing user errors by 25%.
- Created high-fidelity prototypes and interaction flows in Figma, Adobe XD, and Axure RP, optimizing user pathways and increasing platform usability scores by 45%.
- Mentored UX/UI students in design best practices, leading portfolio workshops and case study sessions on UX storytelling, ATS-friendly structuring, and usability-focused design, resulting in a 30% higher internship placement rate.

Sureview Instrumentals, UI/UX & Industrial Designer

08/2021 – 08/2023 | India

- Conducted user research, stakeholder interviews, and competitive analysis using Figma, Miro, Optimal Workshop, and UserTesting, defining UX strategies that enhanced user task success rates by 30% and reduced friction points.
- Designed and prototyped low-to-high fidelity wireframes and interactive prototypes using Figma, Adobe XD, Axure RP, and InVision, ensuring a 20% faster developer handoff and a more consistent, accessible UI aligned with WCAG standards.
- Translated business requirements into functional specifications and 150+ user stories in Jira and Confluence, leveraging Power BI, Tableau, Google Analytics, and Amplitude to drive a 15% improvement in conversion rates.
- Developed and maintained a scalable design system in Figma, Storybook, and ZeroHeight, improving UI consistency across platforms and reducing redesign efforts by 40%.
- Conducted usability testing, A/B testing, and heatmap analysis using Hotjar, Crazy Egg, Google Analytics, and Mixpanel, leading to a 25% increase in user engagement by iterating on key design elements.
- Partnered with cross-functional teams using Jira, Slack, Zeplin, and GitHub, optimizing Agile workflows and accelerating the design-to-development cycle by 15%.
- Led design sprints, mentored junior designers, and championed accessibility-first design using Miro, Notion, Stark, and WCAG guidelines, increasing ADA compliance and usability for diverse user groups.
- Designed and optimized SaaS-based platforms with API-driven UI components, integrating cloud-based UX frameworks and multi-tenant architecture using Figma, Storybook, React UI libraries, and Postman, improving scalability and system performance.

EDUCATION

New York Institute of Technology (NYIT),*Master of Arts, UX/ UI Design & Development*

09/2023 – 12/2024 | New York, USA

MIT Institute of Design,*Bachelor of Design, Industrial & Product Design*

2018 – 2022 | India

PROJECTS

Collaborative Learning Hub – UX Research & Design

- Researched learner isolation on Coursera, identifying a 42% drop-off rate in peer interaction through surveys, interviews, and heuristic evaluation, leading to targeted UX improvements.
- Designed the Collaborative Learning Hub, integrating Study Groups, Live Chat, and Task Sharing, increasing peer engagement by 55% and boosting course completion rates by 33%.
- Conducted usability testing & competitive analysis, iterating on Figma-based prototypes, improving user satisfaction scores by 48%, and reducing task completion time by 37%.
- Applied user-centered design (UCD) & double diamond methodology, refining core features through iterative prototyping & usability testing, leading to a 25% increase in interaction efficiency.
- Delivered data-driven UX recommendations, providing actionable insights that contributed to Coursera's potential expansion into real-time collaborative learning, with early-stage adoption interest from 3,000+ active users.
