

Niharika Marella

Full Stack .NET Software Developer

Email: niharikam00018@gmail.com

Contact: 4053558250

- Over 5 years of experience, as a software developer, in Functional specifications, Analysis, Design, Modelling, Development, Configuration, Management and implementation of various web applications including health care, banking and finance projects.
- Demonstrated proficiency in development using Microsoft.NET technologies like **ASP.Net, C#, VB.Net, ADO.Net, Web Services, MVC, AJAX**, Windows Services, WCF Services, OOPS, XML, XSLT, HTML, SOAP, LINQ Text Editor, MS IIS ... **DHTML, VBScript, VSS, JavaScript, SQL Server**.
- Experience in designing web pages **using HTML, JavaScript, HTML, CSS and jQuery, Angular JS, AJAX, Bootstrap and JSON, Node JS., UML**.
- Strong Experience in Web Forms and Win Forms applications with .NET Framework ... and Visual Studio.
- Strong Microsoft Technologies in the fields of Win - forms, Web-forms, Web Services using ASP.Net ... VB.Net, C#, MVC, **Entity framework, Angular JS, ADO.NET AJAX, LINQ, WCF, WPF, Silverlight 2.0/3.0 using Microsoft .Net Framework**.
- Building and maintaining systems in **Windows Azure** for development and production systems. This applies to standard VMs as well as other **Azure services**.
- Experience of working with **Azure Monitoring**, Data Factory, Traffic Manager, Service Bus, Key Vault.
- Working Experience on Azure Storage, **Azure Cosmos Db, Azure SQL API** and in different PaaS Solutions with Web, and worker Roles and **Azure Web Apps**.
- Experience in creating Views, Partial Views, and Sections etc. In ASP.NET MVC, and Created the Controllers and Controller Actions, Filters, Routing **using ASP.NET MVC**.
- Strong experience on MS SQL Server ... using **SQL, MS SQL, SSIS and T-SQL. Have worked on ETL using SSIS and DTS packages**.
- Responsible for making AJAX Calls for the UI Interactions to the Controller Actions using Angular JS and getting the Data back as JSON and parsing it onto the UI.
- Working with RDBMS includes MS SQL Server ... Oracle 8i, 9i, 10g, 11g, 12c and MS-Access.
- Excellent skill in data modelling and implementing tables, views, stored procedures, functions, schemas, and Triggers using T-SQL Queries and PL/SQL.
- Good application deployment experience on Windows and on other platforms like UNIX, Solaris.
- Expertise on working with RDBMS like DB2 (v 8.1.2) and Oracle (v 8i, 9i, 10g) and knowledge of directory services like LDAP.
- Design & implement end-to-end automation of infrastructure and continuous delivery of the applications by integrating Cloud Formation scripts, Jenkins, Ansible and AWS.
- Designed large numbers of **WPF Forms and used XAML** for the same.
- Involved in development of projects using **SQL Server Integrated Services (SSIS), SQL Server Reporting Services (SSRS) and Data Transformation Services (DTS)**
- Good experience with Agile (SCRUM) methodology, Waterfall and Test-driven development.
- Exposure in Requirement Analysis, Architecture & Design Documentation, Reviews, System Development, System Testing, System Implementation, User Documentation.
- Experience in configuration and version management using Sub Version (SVN), Team Foundation Server (TFS), GIT and defect tracking tools like JIRA, Visual Studio Team Services, Database projects.
- Performed Unit Testing (using N-Unit), Integration Testing and Performance Testing.
- Very Good experience in handling clients & meeting their requirements and willing to adapt to new technologies/work environments, well organized team player with good analytical and leadership skills. In-depth knowledge of PL/SQL with the experience in constructing the triggers, tables, functions, user-defined data type, procedures etc.
- Proficiency in working with databases like **Oracle, MySQL, MongoDB, NoSQL**.
- Experience in using testing Tools **JUnit, Selenium, Cucumber/Gherkin**.
- Expertise in database modeling and development using **SQL, T-SQL and PL/SQL** in Oracle and SQL Server environments.
- Exposure to **Oracle, DB2, and MySQL** databases in developing applications using **SQL Scripts, Stored Procedures**.
- Experience using an Integrated Development Environment like Eclipse, RAD 7.5/8.5 for code development.
- Extensive experience on support tools like Application Life Cycle Management to perform Unit testing and Application integration testing.
- Extensive experience in developing Web Services applications using **REST Client, REST API, SOAP UI, dozer mapper**.

- Versatile team player with good communication, analytical, presentation and interpersonal skills.

EDUCATION:

Masters in Computer Science from Sacred Heart University, CT

TECHNICAL SKILLS:

Languages: C#, VB.Net, C++, XML, PL/SQL

Operating Systems: Windows (10/8.1), Ubuntu, Mac

Microsoft technologies: .Net Framework 4.5 / 4.0 / 3.5 / 2.0 / 1.1 / 1.0, ADO.Net, ASP.Net 4.0 / 3.5 / 2.0 / 1.1, MVC 5/4/3, AJAX, Web Services.

Frameworks: MVC Architecture, Angular, Angular 2, Typescript, Underscore, Knockout.js, Backbone JS, D3. Js, ReactJS, Redux, Express, Node, Spring Framework, Hibernate, Dust.js

Web Technologies: HTML, HTML5, XHTML, XML, XAML, XSL, XSLT, JSON, CSS 2.0/CSS 3, Azure, KnockoutJS, AngularJS, Ajax, Web Services, Boot Strap.

Databases: Oracle, MySQL, MSSQL Server, Sybase, PostgreSQL, MongoDB.

IDE: Microsoft Visual Studio ... SQL Server Management Studio 2016, 2014.

Development Tools: Visual Studio 2015 /2013 /2010

Version controls: TFS, Git, SVN, Visual Source Safe.

Protocols: TCP/IP, HTTP, FTP, and SOAP.

Reporting Tools: SQL Server Reporting Services, Crystal Reports.

Other Tools: MS Visio, NUnit, UML 2.0, MS Office, Coded UI.

Database Tools: SQL Developer, DB Artisan, TOAD, MSSQL Server Management Studio

XML Technologies: DOM, SAX, JAXP, JAXB, XML-RPC and XML Beans.

PROFESSIONAL EXPERIENCE:

Liberty Mutual Insurance, Boston, MA

March 2024 to Present

Full Stack .NET Software Developer

Responsibilities:

- Designed brand-new windows-based application from scratch to meet business requirement in short span of time.
- Interact with product owner and developer in requirements analysis, design reviews, testing and documentation for application being developed in Agile environment
- Built Web based and service-oriented platforms using Microsoft .NET technologies (C#, ASP.Net, MVC, Web API, and Entity Framework)
- Work with applications for **Azure suitability** and propose right target state on Azure considering cost, performance, and security.
- Deploy WCF services on **Azure cloud**.
- Good understanding of storage concepts. Experience in designing and implementing Azure Storage.
- Configure **Azure cloud** service for end point deployment
- Developed UI interfaces with **MVC 5 Razor Views (CSHTML), CSS JavaScript, Knockout JS and jQuery**.
- Implemented CRUD functionality with Entity framework in **ASP.NET MVC** and implemented sorting, filtering and paging with Entity framework in MVC.
- Developed and Enhanced Master Pages, User Controls, Custom Controls, User Interface by using **HTML 5, CSS 3, Bootstrap and Kendo UI Controls**.
- Used Dependency Injection Pattern to reduce the dependency coupling between classes and in Front end using **AngularJS**.
- Used ADO.Net extensively for database interactions using Data Reader, Data Adapter, Data view and Datasets.
- Created and used User Controls in developing the front-end application and multi-thread windows applications using VB.Net.

- Utilized various **JavaScript and jQuery libraries**, AJAX for form validation and other interactive features.
- Developed Web forms using **ASP.Net** server controls and validated input using Java Script.
- Created and maintained database objects like complex Stored Procedures, Tables, Views, and User Defined Functions in SQL Server 2012.
- Involved in deploying the application on IIS Server.
- Worked on **SOAP and RESTFUL** Services using **WEB API** which return JSON data.
- Implemented Authentication and Authorization security mechanisms.
- Develop and maintain system for organizing and tracking execution of test plans in Jira.
- Responsible for fine tuning the Stored procedures and SQL Queries that have been found expensive in the load testing conducted for the releases.
- Responsible for maintaining versions of source code using Team Foundation Server (TFS)
- Implemented Application logging, email for error handling and notifications.
- Prepared unit test cases and performed N-Unit testing prior to system implementation. Used Hibernate - **Object Relational Mapping** Tool for the backend data persistence
- Working with Azure cloud service offering (covering Azure Compute, Storage and Network and PaaS services including App Services, Resource Groups, Azure SQL, Cloud Services, ARM, Web Role/Worker Role, SQL Azure Database among others).
- Developed client's interface in PHP in MVC modelling using code igniter framework.
- Created logical and physical data models putting to practice, concepts of normalization and RDBMS.
- Used **Rational Application Developer** which is based on Eclipse, to develop and debug application code.
- Modified the Spring Controllers and Services classes to support the introduction of Spring framework.
- Designed and developed custom message adapter components that allowed the message to travel through IBM MQ Series XML Beans and JMS.
- Created properties files and used enhanced **JTable** for improved general performance.
- Configured Tomcat server which gave users a single point of access to the applications, services, information and social connections they need.

Environment: VS.NET 2013, .Net 4.5, Asp.Net MVC 5, VB.Net, HTML5, CSS3, jQuery, Angular JS, Knockout JS, Kendo UI, Ajax, Restful web services, Web Forms, Bootstrap, IIS 7.0, TFS, SQL Server 2012, Asp.Net Web API and LINQ, Azure.

Wells Fargo, CA

March 2023 to Feb 2024

Full Stack .NET Software Developer

Responsibilities:

- Involved in the Analysis, Requirements gathering and Development of the project and used UML in preparing case and activity diagrams.
- This project was implemented using Agile and SCRUM methodology for rapid development.
- Experience in standardizing Tableau for shared service deployment.
- Implementation of 3-Tier architecture, facing key challenges on Business and Database layers.
- Developing Web application using **ASP.Net, MVC5, and C #**, Entity Framework, JavaScript, **Knockout JS, JSON, HTML5 and CSS3**.
- Developed complex stored procedures using temporary tables and loops using SQL.
- Designed dynamic and multi-browser compatible pages using **HTML, CSS, jQuery, JavaScript, RequireJs, Bootstrap and Kendo UI**.
- Using Service Bus Queues for communication in multi-tier Azure application
- Also, used Azure for Scaling and checking the reliability of the applications which were developed during the project.
- Designed a rich user interface using WPF.
- Completely designed and developed the user interface using **VB.NET and Windows User Control**.
- **Developed Web Forms using ASP.Net and C#.Net**.
- Worked with Backbone.JS and Node.JS to give a structure with rich API over a RESTful JSON interface.
- Created WCF Service to look up and retrieve the data from database.
- Developed web pages for the application using **Asp.Net MVC, Asp.Net Web API, jQuery, Angularjs, CSS, HTML 5, and Ajax**.
- Developed SQL Queries, Stored Procedures and Triggers using **T-SQL in SQL Server**.
- Used WPF to add graphics; worked heavily on custom template controls
- Involved in creating, deploying and managing reports using **SSRS**.

- Documentation of design options and solutions according to Software Development Life Cycle (SDLC) methodology.
- Used Silverlight for presentation layer and **LINQ** for Data Access Layer.
- Developed core functionality with the **ASP.NET MVC Framework** (C#.NET, ADO.NET)
- Developed Cascading Style Sheets (CSS) for User Interface uniformity throughout the application.
- Develop sequence diagrams and user flows for the application using MS-Visio.
- Development of UI using ASP.Net framework.
- Deployed the application on the IIS Server.
- Used jQuery and JavaScript for client-side validation and other purposes.
- Branching & Branch management TFS
- Perform Unit & Integration testing.
- Provide technical support to business and testing team during testing phases. React.js which allowed us to render pages on both the client and server using the same codebase.
- Used **React.js** for adding a client-side interface for JavaScript templating and function binding.
- Written and modified the technical documents.
- Used Grunt task runner on the client side along with angular.js to perform **unit testing, minification** and compiling whenever a change in a file is made.
- Involved in Creating Services and Directives which may need to be shared across the entire application.
- Designed custom directives using **React.js**.

Environment: ASP.NET 4.0, C# 4.0, MVC 3.0, VB.NET, HTML, JavaScript, jQuery, Angular JS, Knockout JS, Kendo UI, Bootstrap, Entity Framework, WPF, JSON, CSS, XML, XSLT, Ajax, TFS, VS.NET 2010, IIS 6.0, SQL Server 2008R2 and SSRS

Adobe, India

Feb 2019 to Jan 2022

.NET Software Developer

Responsibilities:

- Using Microsoft Technologies for the project development such as Visual Studio 2012, .Net framework 4.5, C# 4.5, SQL Server 2012 and TFS +2012.
- Design & Develop application using ASP.NET MVC5, jQuery, Html 5, Java Script and CSS.
- Design and implement AJAX service call using Angular JS http.
- Involved into Database Design and Created SQL Server Tables, Views, Triggers, Stored Procedure, Functions and Indexes using PL/SQL.
- Manage various AWS/AZURE environment for provisioning of Linux servers and services implemented by the providers.
- Set up and configuration of various instruments on AWS direct connect to create DEV/IT, UAT and Production environment for short-term internal projects.
- Designed and developed the UI of the website using **HTML, XHTML, AJAX, CSS and JavaScript**
- Involved in all phases of SDLC.
- Responsible for creating Web Forms using several **ASP.NET server controls**.
- Developed several stored procedures in SQL Server 2005 and optimized Queries.
- Writing the Contract models, Domain models to consume the Rest Services and converters to map between contract models and domain models.
- Configuration management of code done using VSS.
- Build **SQL, NOSQL** queries implementing **functions, packages, views, triggers, and tables**.
- Handling the day-to-day issues and fine tuning the applications for enhanced performance.
- Responsible for debugging and troubleshooting the web application.
- Used Oracle database in developing the project and used SQL statements and procedures to fetch the data from the database
- Set up preconfigured RHEL5.x and 6.x on local and in the cloud on AWS EC2
- Enhancement's to scheduling logic.
- Updating the user manual documents to help customers understand the functionalities.
- Implemented, tested and deployed the application.

Environment: Visual Studio 2012, ASP.NET4.5, C#, AJAX, Java Script, Angular JS, jQuery, MS SQL Server 2008, TFS, SQL.
