Summary

Senior Systems & Infrastructure Engineer with 15+ years of expertise in cloud infrastructure (AWS, Azure, Oracle), automation, and DevOps. Proven track record in optimizing system uptime (**99.9% reliability**), enhancing performance (**30% response time improvement**), and streamlining operations via automation (**40% reduction in recurring issues**). Skilled in CI/CD, large-scale data pipelines (**10TB+ daily processing**), cloud identity integrations, and cross-functional collaboration. Passionate about self-healing infrastructure, reducing MTTR (**25% faster incident resolution**), and driving cost-effective, scalable solutions.

Work Experience

Amazon Web Services Inc.
Senior System Engineer

Bellevue, WA
Jan 2022 - Sep 2024

- **Improved System Reliability** – Led initiatives to enhance **system uptime to 99.9%**, ensuring high availability and reliability of critical environment telemetry solutions.
- **Optimized Data Pipelines** – Designed and maintained **real-time data pipelines processing over 10TB of data daily**, enabling faster decision-making and operational efficiency.
- **Performance-Driven Development** – Developed and optimized back-end services, achieving a **30% improvement in response times** and reducing latency for critical applications.
- **Automated Testing & Deployment** – Implemented **automated unit and integration test suites**, increasing test coverage by **85%**, reducing deployment failures.
- **Cross-Team Collaboration** – Partnered with **five+ cross-functional teams** to design, develop, and successfully launch new features that enhanced business functionality.
- **Automated Cloud Infrastructure Qualification** – Developed a centralized automation framework using **Bash, PowerShell, and Python** with AWS tools (**EC2, Lambda, Step Functions, DynamoDB, CloudFormation, Athena, Glue, S3, SNS, QuickSight**), **eliminating 100% of manual effort** in qualifying Windows and Linux EC2 servers for AWS WorkSpaces.
- **Optimized Server Performance & Compliance** – Maintained and fine-tuned **Windows & Linux servers**, ensuring **100% compliance** with enterprise security and operational policies.
- **Accelerated Cloud Identity Integration** – Enabled **AWS Workspaces Personal** integration with **Azure Entra ID & Intune**, reducing setup time by **40%**, increasing user adoption by **20%**, and supporting **JumpCloud** for additional identity solutions.
- **Automated Workflows & Accelerated Deployments** – Developed a **custom PowerShell-based automation framework** integrating **CI/CD pipelines** with **Jenkins, GitLab, and Docker**, streamlining **10 workflows**, reducing **manual effort by 90%**, and cutting **deployment time by 40%**.
- **Led Microsoft 365 Strategy** – Served as **SME for Microsoft 365 services**, defining long-term strategic roadmaps and improving **platform reliability** for enterprise collaboration tools.
- **Designed High-Availability Data Center** – Led the implementation of a **new data center & server infrastructure**, supporting **120K+ subscribers** and achieving **95% uptime** post-launch.
- **Enhanced Cloud Monitoring & Incident Response** – Implemented **AWS CloudWatch, Azure Monitor, and Datadog**, improving **real-time performance tracking, proactive alerting, and uptime monitoring** for cloud applications.
- **Improved Incident Resolution by 25%** – Collaborated with **cross-functional teams** to rapidly diagnose and resolve technical challenges, reducing issue resolution time by **25%**.
- **Managed a 5-Member Engineering Team** – Led a team handling **over 1M+ customer requests**, maintaining **95% customer satisfaction**, and addressing system complaints with swift resolutions.

Royal Bank of Canada
Senior Infrastructure Engineer

Toronto, ON
Jan 2016 - Jan 2022

- **Database Optimization & Security** – Upgraded **MS SQL patches and security protocols**, enhancing **database performance and security compliance by 100%**.
- **Virtualization & Infrastructure Management** – Configured, deployed, and managed **VMware and Hyper-V virtual servers**, optimizing resources for **critical business applications** and ensuring **high availability**.

- **Automated Infrastructure Deployment** – Developed **Infrastructure as Code (IaC)** solutions using **Terraform and Ansible**, improving **configuration management efficiency** by **30%** and enabling **consistent automated provisioning**.
- **Incident Resolution & RCA** – Investigated and resolved **over 200+ customer-reported incidents**, implementing proactive solutions that reduced recurring issues by **40%**.
- **Scalability Enhancements** – Identified and implemented **self-healing automation** mechanisms, reducing manual intervention and improving service manageability.
- **Customer Escalation Management** – Managed **high-priority customer escalations**, achieving a **25% reduction in mean time to resolution (MTTR)**.
- **Monitoring & Observability Improvements** – Integrated **advanced monitoring and alerting tools**, leading to a **50% improvement in issue detection and response time**.
- **Efficient Feature Delivery** – Delivered multiple product features ahead of schedule, improving overall project timelines and reducing time-to-market by **20%**.
- **Optimized Cloud Infrastructure & Uptime** – Implemented **network architecture and security best practices** in AWS, achieving **99.99% uptime** for customer-facing production systems and reducing **security incidents by 30%** through **VPC, VPN, and Load Balancing** solutions.
- **Accelerated Troubleshooting & Network Performance** – Reduced **troubleshooting time by 40%** by fine-tuning core Internet protocols (**IP, TCP, NTP, DNS**) in high-availability environments, ensuring **faster issue resolution** and enhanced reliability.
- **Ensured Regulatory Compliance** – Strengthened **data privacy** by implementing **GDPR and HIPAA-compliant security protocols**, improving **data access controls** and ensuring **100% compliance** with industry standards.
- **Data-Driven Decision Making** – Designed **intuitive Power BI dashboards** to present actionable insights, enhancing stakeholder decision-making and enabling **faster business responses**.
- **Led High-Impact Projects** – Directed **cross-functional teams** in **data-centric projects**, ensuring on-time delivery of key initiatives by managing **timelines, resources, and deliverables** effectively.

CSI Consulting Inc.
System & Network Engineer

Toronto, ON
Jun 2014 - Jan 2016

- **Optimized Network Performance** – Led **network optimization** initiatives, configuring **LAN, WAN, and VLAN setups**, improving overall network performance by **20%** and enhancing connectivity efficiency.
- **Enhanced Email System Resilience** – Managed **SMTP and clustering configurations**, improving **email deliverability** and system resilience by **20%**, ensuring seamless communication.
- **Successful Server Migrations & Office 365 Deployment** – Migrated **5+ ADDS and Exchange Servers** from **2003 to 2010/2013**, and deployed **Office 365** for **5,000+ users**, integrating **SharePoint and Skype for Business**.
- **SQL Server High Availability Configuration** – Configured **SQL Server Always On Availability Groups**, ensuring **99.99% uptime** for critical business applications and enhancing database resilience.
- **Virtualization Management & High Availability** – Administered **VMware vSphere environments** supporting **200+ virtual machines**, ensuring **high availability of mission-critical applications** and optimizing resource utilization.
- **Automated User Provisioning & Access Control** – Administered **Office 365 tenants**, streamlining **user provisioning, license allocation, and access control** for **150 users**, reducing **manual overhead by 90%**.
- **File System & Data Integrity Management** – Managed **EXT4 and NFS file systems**, ensuring data integrity and availability by effectively managing **network-attached storage and shared file systems**.
- **Implemented Monitoring Solutions** – Deployed **Grafana** for performance metric visualization, ensuring **high availability** and proactive system monitoring.
- **Oracle Infrastructure Performance Optimization** – Managed **Oracle Enterprise Manager (OEM)** to monitor databases and infrastructure, optimizing **system performance** and increasing operational efficiency.
- **Security Compliance & Patch Management** – Administered patching and updates via **SCCM (Windows)** and **YUM (Linux)**, ensuring **security compliance** and **system stability** across enterprise environments.
- **Infrastructure Capacity Planning** – Conducted **system performance monitoring and capacity planning** for both **cloud-based and on-premise infrastructure**, ensuring optimal resource utilization and minimizing over-provisioning.
- **Optimized Server Performance** – Managed and configured **Cisco UCS infrastructure**, improving **server performance and resource allocation**, resulting in reduced hardware downtime and increased operational efficiency.
- **Streamlined Cloud Migrations** – Deployed **Infrastructure as Code (IaC)** solutions, streamlining **cloud migrations** and improving **deployment consistency**, reducing **provisioning time by 50%** across multi-cloud environments.

- **Delivered End-User Technical Support** – Provided **technical support** to **500+ end-users** across **Canada**, resolving **95% of issues** on first contact for major telecom companies like **Bell Canada, Rogers, Shaw, Cogeco, Videotron, and TELUS** via **online, in-office, and telephone communication**.
- **Ensured Network Security & Connectivity** – Demonstrated expertise in **networking concepts** such as **routing, DNS, firewalls, and load balancers**, ensuring **network security** and **connectivity** across **distributed systems**.
- **Resolved OS, Storage & Hardware Issues** – Applied **strong troubleshooting skills** to resolve **OS, storage, and hardware issues**, ensuring **high availability** for **application platforms** and **databases**.
- **Effective Communication & Documentation** – Utilized excellent **communication skills** to provide **clear documentation** for system procedures and collaborate effectively with **global teams**.
- **Monitored PBX Servers for Uptime** – Monitored **Huawei PBX Server** and **digital audio recording servers** daily, achieving **100% uptime** and resolving connectivity issues in less than **2 hours**.
- **Maintained Network Security** – Performed **daily network operations** including startups, backups, and diagnostics on **Dell SonicWALL firewalls**, maintaining a **99% success rate** in preventing security intrusions.
- **Optimized Exchange Server Performance** – Managed **Exchange servers (2003, 2010)**, including **hardware upgrades** and **email archiving**, reducing **downtime by 15%** through proactive management.
- **Optimized Network Capacity** – Monitored **network traffic** for **voice and data**, managed **VPN accounts**, and optimized **network capacity**, achieving a **20% improvement** in **system efficiency**.
- **Administered Network Services** – Administered **DNS, DHCP, and WINS** services, ensuring efficient **IP address management** and **domain name resolution** for a **multi-site network** supporting **2000+ users**.

Education

Humber Institute of Technology and Advanced Learning
Post-Graduation, Wireless Telecommunications

Toronto
Jan 2009 - Sep 2009

Jawaharlal Nehru Technological University
Bachelors of Technology, Computer Science and Information Technology

Hyderabad
Sep 2003 - Sep 2007

Certifications

Microsoft Certified Solutions Expert (MCSE):
Cisco Certified Network Administrator (CCNA):
VMware Certified Professional (VCP):
Amazon AWS Certified Solutions Architect -Associate:
Microsoft Azure Administrator - Associate:
CompTIA Hardware A+:

Skills

Skills: Systems & Infrastructure Design, Disaster Recovery Planning, Agile & DevOps Methodologies, Vendor & Project Management, System Administration, Server Provisioning, Backup & Restore Operations
Operating Systems: Windows Server, Red Hat, AL2, CentOS, Ubuntu, Oracle Linux (OL)
Cloud Platforms: AWS, Azure
Patching Operations: SCCM (Windows), YUM (Linux)
Virtualization: VMware, Hyper-V, Docker, VDI, VMware, Oracle Linux Virtualization Manager (OLVM), KVM (Kernel-based Virtual Machine), Oracle Cloud Infrastructure (OCI)
Networking: VPC, LAN, WAN, Network Security, Firewalls
Automation Tools: Terraform, CloudFormation, Jenkins, Kubernetes
Languages: PowerShell, Bash, Python, TypeScript
Databases: MS SQL, DynamoDB
Monitoring: CloudWatch, Power BI, QuickSight, Prometheus, Grafana, Oracle Enterprise Manager (OEM)
DevOps: GitHub, GitLab, Jenkins, IAaC, Maven, Ansible
Identity Management: Azure Entra ID, Jump Cloud, IAM
