

Noah R. Green, Experienced Data Scientist, CPA, CFE

(702) 861-5983
noah@noahgreencpa.com

Key Technical Skills:

Machine Learning Engineering, Model Deployment, Natural Language Processing (NLP - OpenAI API, Hugging Face Transformers), Cloud Technologies (Azure, GCP, AWS), Feature Engineering

- Neo4j Graph Data Science, Cypher, Data Modeling
- Auto-ML, SMOTE, ChatGPT API
- XGBoost, Hugging Face Transformers for NLP
- Statistics
- Data Science / Machine Learning / SQL
- Python (Torch, Scikit-learn, Pandas, XLWings, OpenPyXL)
- Advanced Cash Flow Modeling
- MS Office, MS Power Pivot, MS Power Query, PowerBI

Education and Certifications:

Anticipated coursework includes Graph Data Science, Machine Learning, and NLP, particularly from the University of Michigan program.

- MS in Applied Data Science, University of Michigan
Expected Graduation 2026
- BBA Accounting, University of Houston, Houston TX
- Coursera - [Statistics with Python Specialization](#) & [Python 3 Programming Specialization](#)
- Certified Public Accountant (CPA) – Nevada, California and Texas Active Licenses
- Certified Fraud Examiner (CFE) & Certified in Financial Forensics (CFF) (AICPA)
- Multilingual: Native English, fluent Spanish and Brazilian Portuguese
- [Neo4j trainings and certificates](#)

WORK EXPERIENCE

KBR, Inc

September 2023 – Present

Data Scientist / Machine Learning Engineer.

- Supporting the data science and machine learning initiatives, including the implementation of a private Large Language Model (LLM) tailored to meet specific company needs.
- Developing machine learning workflows, pipelines, and predictive models to generate actionable insights and informed decision-making.
- Supporting data engineering efforts by ensuring efficient ETL processes, data preparation, and seamless integration with machine learning systems.
- Designing and implementing knowledge graphs to uncover and enhance data relationships, fostering better contextual understanding.
- Engineering and optimizing prompts for LLMs to achieve superior performance and deliver impactful outcomes for complex business use cases.

Sheepdog Prosperity Partners, LLC

September 2023 – Present

As a contract employee for an aerospace and defense employer, provided prompt engineering and machine learning engineering services with the following: highlighted data science models: XGBoost, Random Forest, Neural Networks.

Extensive use of feature engineering, model evaluation (accuracy, precision, recall), and data pipeline development.

- Engineered machine learning models and optimized prompts using large-scale corporate datasets for internal use, improving model performance and operational efficiency.
- Performed data cleaning and pre-processing to enhance machine learning model accuracy and ensure robust data pipelines.

- Developed graph database, knowledge graphs, and applied graph data science to corporate data using Lang chain agents, neo4j enterprise graph database.

Noah Green CPA LLC / Sheepdog Prosperity Partners, LLC

April 2011 – Present

Applied predictive modeling for tax liability assessment, using financial data analysis with Python and SQL.

- Provide tax resolution services to US taxpayers and representation before the IRS (i.e. Offer-in-Compromise, Partial Payment Installment Agreements, tax audits)
- Perform outsourced financial and accounting data analyses, financial statement audit support as a remote contractor within banking capital markets, related data science projects for the following firms: (Ernst & Young LLP, PricewaterhouseCoopers LLP, Deloitte & Touche LLP, KPMG LLP, CBIZ Inc.)

Thinkful / Chegg – Educational Advisor (Contractor) Remote

October 2020 – August 2024

Taught machine learning concepts, model evaluation techniques, and Python libraries such as Pandas and Scikit-learn for data analysis and ML competitions.

- Provide education to a cohort of 20 students in all aspects of data analytics careers including MS Excel, Tableau, SQL, Statistical and Mathematical analyses, Data-driven performance and financial dashboards, and Python programming language including Pandas, OpenPyXL and other libraries.
- Teach conceptual and practical use of Git, Github, Anaconda and PyCharm IDE. Provide instruction in essentials of data privacy, data cleaning, data structures, algorithms, machine learning competitions on Kaggle, and related ethical considerations when using data.

Prime Trust, LLC Las Vegas, NV– Chief Financial Officer

May 2018 – May 2019

- Primary responsibility for all aspects of financial management of financial technology entity (40 full-time employees) with a State of Nevada Trust charter specializing in block-chain driven cryptocurrency custody and escrow solutions for the crowdfunding industry
- Designed and implemented policies, procedures and practices which resulted in the capacity for revenue growth from \$300,000 a month to \$850,000 a month

Contiguity Capital, LLC NYC – Chief Financial Officer / Chief Information Officer

March 2015 – May 2018

- Designed and implemented policies, procedures and practices which resulted in the capacity for revenue growth from \$0 to \$1 million in revenues for 3 years
- Established month-end closing procedures, internal financial controls, chart of accounts structure, and GAAP financial statement reporting processes
- Identified, selected, negotiated, and implemented online marketplace agreements and data transfer protocols for sales and fulfillment of inventory
- Performed extensive data modeling, analyzation and data engineering of digital assets throughout lifecycle (from validation, acquisition, warehousing and distribution, to fulfillment)

DZ Bank NYC – Asset Securitization Group – Vice President

September 2004 – April 2011

- Due diligence officer for asset-backed commercial paper program responsible for identifying credit, financial and operational risks for portfolio management
- Performed detailed data mining and analysis, sample selection, planned the scope and managed onsite due diligence reviews at client sites, correspondent banks, and backup servicer locations

Ernst & Young LLP NYC – Senior Analyst

June 2002 – September 2004

- Lead Senior Analyst on structured finance advisory engagements, asset backed servicer operational due diligence (domestic and Latin American assignments) including mortgage escrow account banking, special mortgage servicer and cross border mortgage servicing
- Created credit risk and financial operational risk models of complex financial processes for asset securitization data and transactions

Arthur Andersen LLP Houston, TX

September 1999 – June 2002

Business Risk Consulting - Senior Consultant, Structured Finance Team

- Supervised a team of analysts and auditors in performing agreed-upon procedures on securitization products
- Modeled and performed statistical data analyses of financial data (asset securitization) for client reporting and attestation assignments

United States Marine Corps, Non-Commissioned Officer

November 1991 – August 1995

- FAA licensed Air Traffic Controller - Provided safe, orderly, and expeditious flow of air traffic for both military and civilian aircraft by adhering to Federal and Department of Defense Aviation Regulations

- Analyzed air traffic control data for FAA watch supervisors for purposes of staffing, workload balancing and risk management
