

Oksana Kostikov

QA Engineer

Concord, California, 94521

Contacts: oksanaveligor@outlook.com, <https://www.linkedin.com/in/oks-v/>

Professional Summary:

Detail and process-oriented QA Engineer with 5 years of experience with a demonstrated history of working in financial domain. I am proficient in front-end and back-end software testing of multi-tenant SaaS, web and mobile applications, with strong problem solving and analytical skills, with a priority of providing high quality software to customers. Hands-on experience in Agile and SDLC, all phases of manual and automation testing and managing multiple projects, experience as a QA Lead. Able to work under tight deadlines and rapidly refining priorities. Work well in a team as well as independently. Never stop learning, well organized, and capable to quickly learn new technical skills. Excellent communication skills.

Technical skills:

Python, Pytest, Selenium WebDriver, Gherkin, Cucumber, SQL, REST API, HTML, CSS, Jenkins, CI/CD, Git, GitHub, Jira, Trello, Rally, Confluence, Figma

Professional Experience:

November 2021 – Present

Moody's Analytics

QA Engineer

Responsibilities:

- Developing and executing test plans, scenarios, and cases based on system requirements, ensuring thorough coverage. Creating and executing automation test scripts - covering 90% of critical flows.
- Writing and reviewing BDD test scenarios, defining test data strategies, and collaborating with automation engineers on Cucumber scripts
- Participating in code reviews and providing feedback on the testability of the application
- Identifying CSS/XPath locators for web elements, updating step definitions, and working with Selenium WebDriver, Cucumber and Git/GitHub – improving Regression TCs pass rate from 85% to 99%
- Performing front-end and back-end testing (SQL/API), uncovering software bugs, evaluating UI/UX, and conducting functional, performance, regression, accessibility and integration testing
- Taking an active part in user story breakdowns, identifying module inter-dependencies, and establishing integration and end-to-end test strategies
- Working closely with both local and offshore teams, collaborating with BAs, developers, and stakeholders. Participating in Show and Tell events as a speaker
- Estimating testing efforts at the story and sprint levels to support planning and execution
- Defining and refining test strategies, overseeing QA governance, monitoring key metrics, and improving testing processes
- Contributing to sprint planning, providing early feedback, finding potential risks, and developing mitigation plans
- Mentoring and training QA testers and other stakeholders on QA processes, test strategies, and product features. Managing a team of 5+ QA testers.

January 2020 – October 2021

Kode Ploy

QA Engineer

- Created detailed test plans, test scenarios, test cases, collected test data.

- Took an active part in manual mobile testing using Android Studio.
- Took an active part in writing and executing automation tests (JavaScript)
- Improved test coverage by evaluating existing test cases and finding useless test cases for both Web-based and Mobile apps.

Education:

Bachelor's degree
