

OLATOMIWA MAJARO

(903) 336 4982 | [LinkedIn](#) | olamajaro15@gmail.com | Mansfield, Texas

PROFESSIONAL SUMMARY

Experienced Database Administrator with over 10 years of expertise in SQL database development, performance tuning, and data architecture. Strong background in ETL processes, PowerBI, Tableau, and database administration. Skilled in monitoring server performance and proficient in optimizing database performance, designing scalable architectures, and working with large data sets in highly regulated environments with PII data. Adept at collaborating with cross-functional teams to implement robust database solutions.

CORE COMPETENCIES

Database Development: MS SQL Server | Oracle | PostgreSQL | MongoDB

ETL, BI & Reporting Tools: SSIS | PowerBI | SSRS | Azure Data Factory

Cloud Infrastructure: Azure SQL Database | AWS RDS | Blob Storage | Azure DevOps

Database Performance & Tuning: Query Optimization | Indexing | Partitioning | Data Modeling

Data Security & Compliance: Transparent Data Encryption (TDE) | Dynamic Data Masking | PII Data Handling

.NET-Based Development: ASP.NET | Visual Studio | Agile Development | ServiceNow

Database Administration: High Availability (HADR) | Disaster Recovery | Backup & Restore

Scripting Tools: PowerShell | Bash Scripting | Python | Redgate SQL Toolbox

PROFESSIONAL EXPERIENCE

Senior Database Administrator

DNV Katy, TX | February 2023 – Present

- Designed, developed, and optimized SQL and Oracle databases for enterprise applications.
- Developed and maintained ETL processes using SSIS, ensuring efficient data movement.
- Actively participated in change management processes, deploying database changes across environments and adhering to client standards.
- Built and optimized PowerBI reports to enhance data visualization and analytics capabilities.
- Automated repetitive tasks using PowerShell dbatools modules.
- Utilized Git, SVN for version control and collaborative development, ensuring proper code management, deployment and team coordination.
- Designed data models and architectures for scalable and high-performance databases.
- Conducted query tuning and indexing to improve performance of large-scale databases.
- Developed complex SQL queries using joins, subqueries, aggregate functions, and window functions to retrieve and manipulate data.
- Implemented data security measures, including encryption and access control for PII data compliance.
- Supported .NET-based applications, ensuring seamless integration with database systems.
- Proficiently utilized optimization tools such as SQL Profiler, DMVs, and Windows Performance Monitor to continuously monitor and fine-tune server performance, ensuring efficient database operation.
- Led SQL Server upgrade and migration projects with minimal downtime.

- Managed the full AWS lifecycle, including provisioning, automation, and security. Migrated on-premises applications to AWS, ensuring seamless functionality in cloud environments.

SQL Database Administrator

Brentwood Trade – Brentwood, NY | January 2017 – February 2023

- Developed and optimized SQL and Oracle database solutions for business applications.
- Conducted both Physical and Logical Data Modeling for databases, including Very Large Databases (VLDBs), highlighting strong data modeling skills.
- Built ETL pipelines using SSIS and automated data processing workflows.
- Designed and maintained data models for structured and semi-structured data.
- Developed and implemented stored procedures and functions using T-SQL.
- Worked closely with .NET developers to integrate databases with ASP.NET applications.
- Monitored and improved database performance using indexing, partitioning, and query optimization.
- Administered and provided comprehensive support for MS SQL environments, including clustered instances in both virtual and physical settings, ensuring robust database management.
- Successfully managed a challenging mission-critical system recovery, ensuring uninterrupted operations.
- Administered highly regulated databases containing PII data, ensuring compliance with industry standards.
- Provided on-call support for database-related issues and performance bottlenecks.

Database Administrator

Treasure Compass LTD – Lagos, Nigeria | July 2011 – December 2016

- Configured and managed database environments, ensuring high availability.
- Implemented HADR solutions such as replication and log shipping.
- Performed data modeling, analysis, and database optimization for business applications.
- Developed and maintained ETL processes for data migration and transformation.
- Ensured database security, including encryption, role-based access, and compliance with regulations.
- Planned and implemented database backup, restore and disaster recovery strategies.
- Performed periodic patching of standalone and clustered instances.
- Vigilantly investigated and responded to incidents and events, performed system checks, monitored performance metrics, managed disk space, sizing, and limits for MS SQL engines, and diligently applied security patches to maintain system integrity.

EDUCATION

Master of Business Administration, Texas A&M University

Bachelor of Science in Computer Science, Osun State University

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals

AWS Certified Data Engineer – Associate

DNV: Cyber Security Green Belt

LinkedIn Learning - PostgreSQL Essential Training
