MANVEL, TEXAS, 77578

**Security Clearance: Secret Clearance **

PROFESSIONAL SUMMARY

Certified BI developer with over 5+ years of extensive experience in database design, development, and administration with MS SQL Server versions 2015 and latest using SSIS, SSRS, SSAS, Power BI, Tableau, Power Automate, Power Apps, Qlik & Azure at Healthcare, Mortgage, Oil & Gas, Financial, Retail companies, Healthcare, Retail, Construction, Federal.

- Experienced in Business Intelligence development, client analysis, and database design using SQL Server, SSIS, SSAS, Power BI, Tableau, and Qlik.
- Skilled in analyzing complex business problems and delivering IT solutions to enhance productivity.
- Proficient in ETL processes, Cube development, dashboard creation, and project management throughout the software development lifecycle.
- Expertise in Power BI, including data imports, DAX, and Power Platform tools like Power Apps and Power Automate.
- Strong troubleshooting, problem-solving, and communication skills, with a proactive and team-oriented mindset.

EDUCATION

- Georgia State University: Master's Degree **Health Management System**, 2017.
- University of Benin: Bachelor's Degree **Information Technology**, 2009.

CERTIFICATION

- Microsoft Certified Technology Specialist (MCTS): **SQL Server 2008 Business Intelligence Implementation and Maintenance**.
- Microsoft Certified: **Power BI**.
- Microsoft Certified Professional (MCP): **BI Reporting**.
- Microsoft Certified: **Azure Fundamental**.
- Microsoft Certified: **Azure Data Fundamental**.
- Microsoft Certified: **Azure AI Fundamental**.
- Microsoft Certified: **Designing and Implementation Enterprise- Scale Analytics Solution Using Microsoft Azure and Microsoft Power BI**.
- Security: **CompTIA Security+**.
- Security Clearance: **Secret Clearance**, Exp 2032.

WORK EXPERIENCE:

BDO Digital

Senior Power BI Engineer

Remote

03/2023– Present

Building End to End solutions for government clients such as Army, EPA, Airforce using Microsoft stack products.

Key Responsibilities:

- Collaborate with end users and project managers on requirement gathering.
- Extracted data from Dynamic 365, Dataverse and Azure SQL Server to build reports and dashboard using Power BI and Power BI Report Builder.
- Created Views using data objects.
- Created well robust data model to fit reporting capability for various projects and business needs.
- Wrote DAX and M-query to manipulate data to meet requirement.
- Used Power Automate to automate work processes/task between applications like SharePoint, Excel, Power BI, Power Apps.
- Used Power Automate workflow to send out email notice when new entries are entered into SharePoint List using Power Apps.
- Performed data validation of reports built comparing it with source data.
- Documented report/processes using confluence and one note.
- Trained users on building Adhoc Power BI.
- Tracked progress using Azure Devops.
- Collaborate with business owners, end users, and other stakeholders to identify needs and goals and work collaboratively to design and build dashboards
- Develops, manages, schedules, and documents data operations and tasks, including extraction, movement, loading, archival, security, backup, and aggregate table creation.
- Lead the design of Power BI solutions, collaborating with stakeholders to understand requirements and architecting effective data visualizations and dashboards.
- Develop complex data models to ensure accurate and efficient representation of underlying data, supporting robust reporting and analysis.
- Create high-quality, interactive dashboards and reports using Power BI, incorporating best practices for data visualization and user experience.
- Integrate data from diverse sources, transforming and cleaning data as needed to ensure consistency and reliability for reporting purposes.
- Utilize Data Analysis Expressions (DAX) to implement sophisticated calculations and measures for in-depth analysis within Power BI.
- Optimize the performance of Power BI reports and dashboards, addressing issues related to data refresh, query performance, and overall responsiveness.
- Work closely with data engineering teams to ensure the availability and quality of data necessary for Power BI reporting.
- Provide guidance and mentorship to junior developers, sharing best practices, and conducting training sessions to enhance the team's Power BI skills.
- Conduct thorough testing of Power BI solutions to ensure accuracy, reliability, and adherence to business requirements.

- Maintain comprehensive documentation for Power BI solutions, including data models, calculations, and dashboard/report specifications.
- Assist end-users in understanding and effectively utilizing Power BI reports and dashboards, providing support, and troubleshooting when needed.
- Provide training sessions to users to understand power bi usage and offer ongoing support to ensure they can effectively utilize Power BI for their reporting needs.

Environment: SQL Server 2021, Azure, Snowflakes, DAX Studio, AML Toolkit, Power BI Pro, Power BI Premium, Apps, Power Automate, Dataverse, Dynamics 365, Power BI Pro, Power BI Premium.

KPMG

Senior Power BI Developer (Contractor)

Remote

06/2022– 3/2023

Worked with the BI team to migrate Advisory application into Power BI for executives. Using in-depth technical capability with the ability to support multiple work streams and drive assimilation of new techniques and solutions.

Key Responsibilities:

- Coordinate and independently develop BI content (reports, dashboards, scorecards, more complex analytic solutions) through the entire development life cycle to provide data necessary to effectively make business decisions and measure goal attainment and overall performance.
- Share expertise with business areas to assist in understanding enterprise data content, definitions and usage and the available BI tools.
- Deliver end-to-end reporting solutions including requirements gathering, data sourcing, data cleansing, data normalization and reporting.
- Work closely with the BI Data Engineers to identify necessary data, understand the schema and ETL, as well as build the metadata needed to satisfy business requirements.
- Support business and IT users to extend their knowledge of the available tools used to create visualizations and data analytics while following client development standards.
- Maintain knowledge on current and emerging developments/trends for assigned area(s) or responsibility, assess the impact, and collaborate with management, and business areas to incorporate new trends and developments in current and future solutions as well as self-service solutions.
- Migrating data from Azure data lake into Azure Synapse using Azure Data Factory.
- Pulling data from several data sources like Azure SQL Server, Snowflakes, Azure Synapse, Power BI data set into Power BI and creating robust data model for reporting.
- Analyze requirements from the team to design appropriate Power BI reports. Strong capacity to convert general requirements to specs and to commit to iterative development to reconcile different project visions or objectives.
- Implementing tooltips, drill-throughs, bookmarks, comprehensive slicers, Power BI custom themes and creating desktop and mobile versions where appropriate.
- Provide guidance and share best practices regarding Power Platform (PowerApps, Power Automate, Power BI) development.

- Develop PowerApps canvas and model driven applications. Develop PowerApps list-based applications as well as Power Automate flows designed to run based on events in SharePoint Online or from PowerApps application.
- Streamline systems, processes, and ways of working through continuous improvement & optimization including conducting technical research to identify/implement findings to further the digital transformation.
- Design, develop and maintain the deployment pipeline for reports into workspaces and apps.
- Participate in regular SDLC activities ranging from estimation, status reporting, SCRUM sessions, design meetings, code reviews etc.

Environment: SQL Server 2021, Azure, Snowflakes, Power Automate, Power Apps, Visual Studio, Power BI Pro, Power BI Premium.

ACCENTURE

Senior Power BI Developer

01/2019– 06/2022

Technology/Application consultant practitioner for several client. Identified opportunities for business automation and drove process improvements using data-driven processes across the enterprise and serve as a key member of the team that will set the direction for all BI efforts moving forward techniques BI solutions for Halliburton, Medexcel, CDC, Veteran's Affair, Humana, Starbuck, Nestle etc.

Key Responsibilities:

- Collaborate with business owners, end users, and other stakeholders to identify needs and goals and work collaboratively to design and build dashboards.
- Perform development activities from gathering requirements and designing solutions, through developing code/reports, to testing and release/deployment.
- Manage multiple, variable tasks and data review processes with limited supervision within targeted timelines and thrive in a demanding, quickly changing environment.
- Built Views, CTE and Stored procedures codes using SQL and PL/SQL for visualization.
- Proficient in converting raw data sets into actionable business insights.
- Used Azure and Dremio to create ETL packages to validate, extract, transform and load data to Azure Synapse databases from sources like Text Files, Json files, XML Files, Excel, and SQL Server.
- Designed and developed data warehouse, data marts and business intelligence using multi-dimensional models/ Tabular model - star schema and snow flame schema.
- Experience using Databricks, Azure Data Lake, Azure SQL server, Azure Data Factory and Azure Synapse.
- Scheduling ETL automation building codes using python and scalar in Databricks and Trigger in Azure Data Factory.
- Designed and developed data warehouse, data marts and business intelligence using multi-dimensional models/ Tabular model - star schema and snow flame schema.

- Used SSIS to create ETL packages to validate, extract, transform and load data to data warehouse databases from sources like Text Files, Json files, XML Files, Excel, and SQL Server.
- Debugging SSIS packages, Performance tuning on **Slowly running SSIS Packages**.
- Deployed report to Test and Production Environment using Deployment Pipeline.
- Responsible for data modelling, data analysis, data integration and data visualization using Power BI Desktop.
- Used Power Automate to automate work processes/task between applications like SharePoint, Excel, Power BI, Power Apps.
- Created Paginated Reports using Power BI Report Builder to enable executive view report in PDF format.
- Develop complex Data Analysis Expressions (DAX) formulas to calculate key metrics and performance indicators related to claims processing, risk assessment, and Medicare analytics.
- Create compelling and insightful visualizations to represent claims and risk adjustment trends, Medicare performance, and other relevant data points.
- Created Row Level Security with Power BI and integrated it into Power BI service Portal.
- Creates and maintains highly visual, user-friendly, and interactive Dashboards, user interfaces and other reports using Tableau and Power BI.
- Responsible for building, publishing customized interactive reports and dashboards, report scheduling using QlikView server.
- Responsible for creating calculated fields, filters, parameters, combined fields, and hierarchies using Tableau Desktop.
- Created User Guide for business user for every process created. Develop complex Stored Procedures and views to generate various Drill-through, Drill Down reports, parameterized reports and list reports using SSRS.
- Create complex survey reports using SSRS according to the requirement using complex SSRS expressions.
- Analyzed business requirements, created business/process flow charts, database flow charts and reporting tool database for Research Revenue Management tracking.
- Worked on all types of transformations that are available in Power bi query editor.

Environment: SQL Server 2015 and latest, MS Excel, Visual Basic, SharePoint Online, Visual Studio, BIDS, SAP, Oracle, Snowflakes, AWS, Azure Sql, Azure Synapse, Power Automate, Power Apps, Tableau, Report Builder, Power BI, SSRS & Qlik.
