## SUMMARY

- **Data Engineer with 5+ years of experience** in designing and implementing scalable, high-performing ETL/ELT pipelines and cloud-based data architectures across **AWS, Azure, and GCP**, driving business growth and operational excellence.
- **Proficient in modern data technologies**, including **Apache Spark, Kafka, Snowflake, Hive, and Databricks**, delivering scalable solutions that optimize processing speed and support real-time analytics.
- **Skilled in developing and optimizing ETL workflows** using **Python, SQL, dbt, Databricks, Airflow, Informatica, and SSIS**, achieving a 40% improvement in data quality and reducing reporting turnaround time by 35%.
- **Experienced in automating manual data processes and workflows**, ensuring compliance with GDPR and HIPAA standards through robust data validation techniques and efficient data storage strategies.
- **Strong background in cloud data warehousing solutions**, including **Snowflake, Redshift, and BigQuery**, improving query performance by 50% and enabling enterprise-wide data accessibility.
- **Proficient in container orchestration tools** such as **Kubernetes**, Infrastructure as Code (IaC) with **Terraform**, and workflow automation using **Airflow and MWAA**, streamlining deployments and resource management.
- **Experience with DevOps best practices**, using **Terraform for infrastructure automation and GitHub Actions for CI/CD**, ensuring efficient and automated deployment workflows in cloud environments.
- **Expertise in database design, data governance, and compliance frameworks**, optimizing performance while maintaining adherence to industry standards through tools like **JIRA** and documentation in **Confluence**, ensuring operational transparency.
- **Proven ability to enhance data workflows** with tools like **AWS Glue, Kinesis, and Flink**, reducing processing time by 40% and increasing query response rates by 60%, ensuring high availability and reliability.
- **Strong collaboration skills**, working cross-functionally with business and technical teams to define data models, implement data governance frameworks, and drive actionable insights through effective stakeholder communication.
- **Proficient in Agile methodologies**, thriving in fast-paced environments with a focus on iterative development, collaboration, and continuous delivery of high-quality data solutions.
- **Demonstrated a proactive approach to identifying data requirements**, ensuring **data integrity** and collaborating effectively with cross-functional teams to drive **continuous learning and improvement**, fostering a culture of teamwork and operational excellence.

## RELEVANT WORK EXPERIENCE

### Associate Data Engineer | Fidelity Investments

08/2023-Present

- **Executed migration strategies** to transition legacy systems to **AWS** using **AWS DMS, Snowflake, Databricks, and dbt**, achieving a **30% boost** in data processing efficiency and ensuring **seamless, high-speed data transfer** across cloud environments.
- **Designed and optimized ETL pipelines** utilizing **AWS Glue, Apache Spark, Airflow, and Databricks**, reducing **processing time by 40%** through efficient data ingestion into **Redshift, S3, and AWS DynamoDB**, enhancing data accessibility.
- **Implemented batch and real-time data workflows** with **AWS Lambda, Kinesis, AWS SQS, and HDFS**, improving ingestion throughput by **35%**, ensuring **real-time insights** and reducing latency in distributed systems.
- **Built scalable microservices architectures** using **Kubernetes, AWS EC2, and Terraform**, automating infrastructure provisioning, enhancing deployment repeatability, and improving operational efficiency by **25%**.
- **Developed data warehousing solutions** with **Snowflake, Redshift, and Databricks**, leveraging **CSV** data formats, optimizing query performance by **50%**, and accelerating access to actionable insights.
- **Directed the development of REST APIs and GraphQL services** using **AWS API Gateway and Lambda**, increasing API response efficiency by **20%** and enabling seamless data integration via **AWS AppFlow**.
- **Orchestrated data lake architectures** with **AWS S3, Lake Formation, and Athena**, integrating **1PB+ datasets** to enable advanced analytics and machine learning capabilities, driving strategic business insights.

- **Ensured data security and compliance** by implementing **IAM policies, AWS KMS encryption, and adherence to GDPR/HIPAA standards**, reducing security risks by **25%** and ensuring regulatory compliance.
- **Automated CI/CD pipelines** with **Jenkins, AWS CodePipeline, and dbt Cloud**, cutting deployment cycles by **30%**, enhancing code quality and operational efficiency through rigorous version control practices.
- **Optimized infrastructure performance** with **AWS CloudWatch, AWS X-Ray, and AWS CloudFormation**, leading to a **20% improvement in uptime** and proactive issue resolution for mission-critical applications.
- **Developed data transformation scripts** using **Python, PySpark, and Databricks**, improving data enrichment processes by **40%**, enhancing reporting accuracy and data-driven decision-making.
- **Created interactive dashboards and reports** using **Power BI, Tableau, and QuickSight**, providing real-time insights, reducing report turnaround time by **35%**, and facilitating informed business decisions.
- **Collaborated with cross-functional teams** to define and implement **scalable data models and dimensional modeling techniques with dbt**, reducing data inconsistencies by **25%** and enhancing governance.
- **Ensured seamless project collaboration** by leveraging **Bitbucket, GitHub, and JIRA**, improving development cycles by **15%**, and maintaining high standards for source code management.

#### Data Engineer | Cardinal Health

01/2020 to 06/2022

- **Designed and deployed scalable ETL/ELT pipelines** using **AWS Glue, AWS Lambda, and EMR**, accelerating data processing speed by 40% and ensuring seamless data ingestion into **Amazon Redshift and S3**, supporting critical healthcare data workflows.
- **Implemented cloud-based data warehousing solutions** utilizing **Amazon Redshift, RDS, and EMR**, improving query performance by 35% and streamlining enterprise data access for healthcare analytics and reporting.
- **Automated end-to-end data workflows** with **AWS Managed Workflows for Apache Airflow (MWAA), dbt, and AWS Glue**, reducing operational costs by 50% and enhancing data pipeline reliability and scalability for clinical data processing.
- Leveraged **AWS DevOps** tools, including **AWS CodeBuild for CI/CD** and **Terraform for automated infrastructure provisioning**, ensuring scalable, repeatable cloud deployments with version control best practices, enabling seamless **HIPAA-compliant rollouts**.
- **Strengthened data security frameworks** with **AWS IAM, KMS (Key Management Service), AWS CloudTrail**, and compliance with **HIPAA and GDPR standards**, reducing security vulnerabilities by 20% while ensuring patient data privacy.
- **Built and optimized data lakes and analytics solutions** using **Amazon S3, Lake Formation, Redshift, and EMR**, enabling seamless integration of structured and unstructured healthcare datasets exceeding 1PB+, supporting research and predictive analytics.
- **Orchestrated infrastructure optimization efforts** with **Amazon CloudWatch, AWS CloudTrail, and Amazon Redshift**, achieving a 25% reduction in cloud costs and improved resource utilization for healthcare data processing workloads.
- **Developed API integrations** using **AWS API Gateway and AWS Lambda**, improving microservices interoperability and increasing response efficiency by 30%, facilitating secure healthcare data exchanges between systems.
- **Applied data validation and governance frameworks**, ensuring compliance with regulatory requirements and improving data accuracy across pipelines, enabling reliable, business-critical insights for stakeholders.
- **Collaborated with business analysts and data scientists** to define healthcare data models and implement reporting solutions using **Amazon QuickSight and Tableau**, enhancing reporting accuracy by 35% and enabling better patient care insights.
- **Managed CI/CD workflows and version control** using **AWS CodeCommit, CodePipeline, and Jenkins**, streamlining deployments and reducing failures by 20%, ensuring high availability for healthcare applications.

#### Data Engineer | Target

07/2018 to 12/2019

- **Transformed data pipeline performance** by implementing **Apache Spark, Kafka, and AWS Glue**, boosting **processing efficiency by 45%** and reducing **latency**.
- **Automated ETL workflows** with **Python, AWS Glue, and dbt**, cutting **manual intervention by 50%** and enhancing **operational effectiveness**.
- **Directed migrating on-premises systems to AWS**, utilizing **EMR, Snowflake, and S3**, reducing **infrastructure costs by 30%**.

and enabling **scalable cloud solutions**.

- **Applied Snowflake and Redshift on AWS**, optimizing **query execution** and improving **stakeholder data accessibility by 40%**.
- **Engineered scalable data ecosystems** using **Hadoop and Hive on AWS EMR**, improving **processing speeds by 60%** for large datasets.
- **Streamlined ETL workflows** with **Informatica PowerCenter and AWS Glue**, reducing **execution times by 35%** and enhancing **system efficiency**.
- **Generated custom data models** using **Informatica**, leading to a **20% increase in reporting efficiency** and **data consistency**.
- **Introduced version control best practices** with **Git, AWS CodeCommit, and Bitbucket**, reducing **deployment errors by 25%** and improving **collaboration**.
- **Worked collaboratively with cross-functional teams** to identify and resolve **pipeline inefficiencies**, achieving a **30% reduction in downtime**. **Implemented data quality frameworks** to ensure compliance with **industry regulations**, maintaining a **98% data accuracy rate**.
- **Mentored junior engineers**, increasing **team productivity by 40%** and promoting **best practices** within **Agile environments**.

## TECHNICAL SKILLS

---

- **Programming Languages:** Python, SQL, Scala, Java, R, JavaScript, C, C++,Golang,C#.
- **Data Processing & Pipelines:** ETL/ELT, Apache Spark, Apache Airflow, Kafka
- **Cloud Platforms:** AWS, Azure, GCP
- **Databases:** SQL Server, NoSQL (MongoDB, Cassandra), Data Warehousing
- **Big Data Technologies:** Hadoop, Spark, Hive, Pig
- **Machine Learning:** Python libraries (Scikit-learn, TensorFlow, PyTorch), Model building, Evaluation
- **Data Visualization:** Tableau, Power BI, Python libraries (Matplotlib, Seaborn)
- **Data Engineering Tools:** Apache Kafka, Apache NiFi, Luigi, Apache Beam
- **Cloud Services:** AWS Glue, EMR, Redshift, Azure Data Factory, Databricks
- **Data Modeling:** Dimensional modeling, Star/Snowflake schemas
- **Data Governance:** Data quality, metadata management, data lineage
- **Operating System:** MacOS, Windows, Linux
- **Web Technologies:** HTML5, CSS3, Bootstrap, RESTful APIs, Microservices, AJAX, JSON, GraphQL
- **Cloud Computing and Deployment Tools:** Amazon Web Services (AWS), Google Cloud Platform (GCP), Docker, Jenkins, Kafka.
- **Database Technologies:** MySQL, PostgreSQL, MongoDB, Oracle Database, Cassandra.
- **Development Tools:** IntelliJ IDEA, Eclipse, Visual Studio Code, Jupyter Notebook, MySQL Workbench.
- **Project Management and Methodologies:** Agile, Scrum, kanban, Waterfall, SDLC.
- **Testing:** JUnit, Selenium, Cucumber, Postman, Unit Testing.
- **Version Control and Build Tools:** Git, Maven, Gradle.
- **Orchestration:** Apache Airflow, AWS Managed Workflows for Apache Airflow (MWAA), Dagster, Luigi, Azure Data Factory, Google Cloud Composer, Kubernetes, Apache Oozie, IBM DataStage, DBT, Talend, Fivetran
- **Soft Skills:** Time management, Leadership, Problem-solving, Collaboration, Decision-Making, Documentation and Presentation, Verbal communication
- **Other Skills:** Object-oriented Programming, OOAD, Data Structures and Algorithms, Problem-Solving and Critical Thinking, Communication and Presentation Skills, Code Review and Quality Assurance.

## EDUCATION

---

University of Texas at Arlington, Arlington, Texas ( Master's degree in computer science)

A u g 2022 – May 2024

## CERTIFICATIONS

---

AWS Cloud Practitioner ([https://www.credly.com/badges/03a4dc83-b94f-4c78-83d4-ee5f8a5f83b7/linked\\_in\\_profile](https://www.credly.com/badges/03a4dc83-b94f-4c78-83d4-ee5f8a5f83b7/linked_in_profile))
