

Name: Pavan Naga Sai

Ph.no: +1 512-814-5543

Email: pavangullapalli25@gmail.com

Professional Summary:

- **4+ years of experience** in IT industry in design, development, application architecture, and maintenance of web-based technologies using Microsoft .NET technologies.
- Proven track record of team leadership, system analysis, design and implementing flexible solutions with expertise in **object-oriented software development using Microsoft technologies and RDMS**
- **Lead teams** with developers for 4+ years in implementing applications across various industries.
- Substantial experience in various .NET applications using **Visual Studio .NET 2012/2010/2008** technologies like **C#.Net, Angular 18, Node Js, React JS, VB.net, Asp.net, Microservices**.
- Vast experience in database systems namely **My SQL, MS SQL server, Oracle PL/SQL, PostgreSQL, MS Access, NOSQL, Cosmos DB and Oracle**.
- Developed and deployed **Docker** containers on Kubernetes
- Worked on creating **Azure Function apps, Azure service bus message** topics and queues
- Experienced in implementing .NET Security features like **Authentication and Authorization** using Form-based and Window-based authentication, Authorizing Users, Roles and User Account Impersonation
- Successfully led the front-end development of multiple enterprise-level applications, creating intuitive and visually appealing user interfaces using Angular 18
- Experience in working with large datasets on **Synapse SQL, Azure Data Studio**, etc.
- Built messaging microservice on **ASP.NET Core 6.0** to provide real-time SMS notifications using Twilio
- Comprehensive experience with **LINQ to Objects, LINQ to SQL, and LINQ to XML**. fffffff
- Provided 24/7 production on-call support for .NET applications, resolving critical issues such as system outages, bottlenecks, and application errors to ensure minimal downtime and maintain business continuity.
- Worked extensively with ADO.NET objects such as Data Adapter, Dataset, and Data Reader to interact with databases like SQL Server 2008/2005/2000 & Oracle 11g/10g/9i.

Technical Skills:

Programming Languages	C# 4.5/3.0/2.0, VB.NET, C, C++, VB6.0
Web Technologies	ASP.NET, MVC framework, JavaScript (jQuery plus Node, Angular 13, Angular 18, React, or Backbone) HTML 5/ CSS DHTML, CSS, AJAX, XML, Web Services, Couchbase, WCF, Silverlight, WPF, Microservices.
Databases	SQL Server 2019/2014/2008/2005, MS Access, Oracle 12g, MySQL, PostgreSQL, Cassandra, SOLR, Cosmos DB
Scripting Languages	JavaScript, Angular JS, Angular 13 4, 6, PowerShell, React JS, Node Js, jQuery, VB script.
Testing tools	NCoverage, NUnit, TFS Test Framework
Versioning tools	Visual Source Safe, TFS, SVN, GitHub.

Professional Experience:

Role: .Net Lead Developer

(March 2023 - Till Date)

Client: Northern Trust,

Location: Chicago, IL, USA

Roles & Responsibilities:

- Lead the team of 4 for rewriting the applications using **.NET core 6** for the Backend development and Front end is designed using the **Angular 14** framework to improve the application
- Worked with Agile methodologies and used **Azure Devops boards** to monitor and keep track of stories.
- Worked closely with business users to gather and analyse the business requirements and create technical documents. Actively participated in sprint meetings was and involved in the **SDLC** of the various applications.
- Worked closely with the **Business, Stake Holders** and QA teams to ensure the applications are Bug free and Assisted during the Migration of Code to various environments.
- Extensively wrote **SQL queries, triggers, cursors** for database operations using the **PL/SQL Developer**.
- Optimized Various Stored procedures in the **Oracle DB** for performance tuning.
- Using **Azure Dev ops CI/CD** for automating the software delivery to provide continued value to users.
- Experience working on consuming Restful **Web API**.
- Created POC for New application in Billing using **Blazor**.
- Experience working with ORM Models like **Entity Framework, Entity Framework Core**.

Role: Senior .Net Developer

(Jan 2022 - March 2023)

Client: Optum,

Location: MN, USA

Roles & Responsibilities:

- Gathered business needs and project objectives, via feedback sessions and client meetings.
- Performed security vulnerability test on the application and implemented best practices to avoid the security risks involved in the application.
- Used **Telerik Chart Control** to display the data in graphical format.
- The **RESTFUL API** service was developed using **.NET Core WEB API, C#, .NET Framework 4.5, LINQ, and T-SQL**. The service used a claims-based authorization model.
- Designed and implemented a Restful API layer along with calls to consume an API Layer.
- Developed the web pages using Angular Class Libraries with the best practices.
- Involved in designing and developing components of the applications using **ASP.NET, MVC, C#, VB.NET, JavaScript and jQuery**.
- Used **jQuery, Kendo UI** components for UI dialog and partial view to implementing a pop-up and Grid views.
- Developed the application to revamp the old existing **ORACLE/DB2** mainframe application to **ASP.NET** web applications.
- Working with **Bitbucket** for Version Control and source code management.
- Using **JIRA and Confluence** for Tracking the Stories and Borad items for Backlog
- Used **Urban Code Deploy** for Code Deployment and for automating the software delivery to provide continued value to users.
- Implemented the **REST Micro service** and distributed **Micro Service monitoring. Integrated swagger UI** and wrote Integration test along with **Rest Document**.

Role: Software Developer (.NET)
Client: Micro den Software Solutions,
Location: Hyderabad, India.

(Sept 2020 - May 2022)

Roles & Responsibilities:

Working on enhancements to the legacy applications using ASP.Net, C# for the backend and client-side technologies like jQuery, JavaScript, and Angular.

- Experience in Converting Legacy WPF applications to use the latest .net technologies such as Web API,
- Worked on Bug Fixes in Legacy systems.
- Experienced in training users to use the latest systems when moving from legacy systems.
- Designed the applications using **.NET core 2** and **Angular 9** for the UI.
- Utilized a wide range of connectors available in Azure Logic App to integrate with various external systems, including SaaS applications, on-premises data sources, and custom APIs, facilitating seamless data exchange and communication.
- Developed serverless applications leveraging **Azure Functions** to execute event-driven code without the need to provision or manage infrastructure.
- Implemented various triggers and bindings within **Azure Functions** to respond to events from different Azure services, such as **Cosmos DB**, and Event Grid, enabling seamless integration and automation.
- Implemented conditional logic and error handling within **Azure Logic App** workflows to handle different scenarios and ensure robustness and reliability in process automation.
- Leveraged Azure Logic App to implement real-time data processing and **event-driven workflows**, enabling timely and efficient processing of incoming data and events.
- Worked with cloud services like **Azure, AWS** and involved in **ETL** data integration and Migration.
- Experience with Cloud hosting and administration in **AWS or Azure**
- Extensively wrote SQL queries, triggers, and **table indexes** and **performed query optimization** for improving performance.
- Involved in doing **Automated tests** using **Selenium data-driven development**.
- Using **Azure Dev ops CI/CD** for automating the software delivery to provide continued value to users.
- Experience working with API testing tools like Postman, Fiddler and SoapUI.
- Experience working on consuming Restful **Web API**
- Experience working with ORM Models like **Entity Framework, Entity Framework Core and Dapper**.
- Worked on Authenticating **Web API's** using token and thereby getting the response.
- Experience with **MS Azure, Exchange Online, Active Directory**
- Experience in creating build pipelines and release pipelines for **CI/CD** process which helps in smooth deployments.
- Experience in creating and consuming web services.
- Setting up new websites and application pools on **IIS Server** and able to deploy to the specific websites using **Azure Devops CI/CD** pipeline process.
