SOFTWARE ENGINEER

Salesforce Development | Full Stack Engineering | System Integration

Results-driven Software Engineer with proven expertise in developing enterprise-level Salesforce solutions and automated systems. Demonstrated success in optimizing development processes through automation and custom integrations, driving measurable improvements in deployment efficiency. Strong technical foundation in both embedded systems and web applications, with exhibited strength in mentoring team members and maintaining code quality standards across complex projects.

CORE COMPETENCIES

Systems Architecture | Project Implementation | Systems Integration | Technical Documentation
Process Automation | Quality Assurance | Agile Development | Stakeholder Communication
Team Mentoring | Code Review | Problem-solving | Requirements Analysis

TECHNICAL SKILLS & LANGUAGES

Software Development: Salesforce, Apex, LWC, SOQL, Python, Django, Flask, JavaScript, TypeScript, C, Matlab, OOP, AWS, SQL, API Development, Automated Testing, Git/GitHub, UNIX Shell, SDLC, CI/CD, databases, SaaS, backend, multithreading, algorithms, debugging and troubleshooting

Language: English-Fluent, Portuguese-Native, Spanish-Intermediate

PROFESSIONAL EXPERIENCE

Associate Software Engineer

nCino Inc | Wilmington, North Carolina

2021 - 2025

Led development initiatives for Salesforce-based loan origination systems, focusing on custom implementations and automation solutions. Contributed to framework-level projects while working within Scrum/Kanban methodology. Maintained high standards for code quality through careful reviews and documentation while supporting team growth through mentoring.

- Automated deployment and configuration of Salesforce orgs using Python and Salesforce API, streamlining development environments
- Developed custom data models for financial products while maintaining deep understanding of Salesforce data model
- Implemented automated testing frameworks using TypeScript, Playwright and Selenium to enhance quality assurance
- Provided comprehensive code reviews and documentation to maintain team best practices
- Mentored new team members through development processes and codebase understanding

Systems Developer

Solar Operations Solutions LLC | Cornelius, North Carolina

2020 - 2021

Led full-stack development initiatives for custom SCADA systems and industrial control solutions. Designed and implemented cost-saving measures while collaborating with a cross-functional development team in an agile environment.

- Developed custom SCADA system using Python, JavaScript, SQL, Bootstrap, and jQuery
- Created embedded software solutions for Rockwell PLCs and integrated with monitoring systems
- Improved Quality Assurance and Control protocols to enhance system reliability

Research Assistant

Universidade Federal Fluminense | Niterói, Rio de Janeiro, Brazil

2017 - 2019

Developed software solutions for communication systems optimization using Python and Matlab platforms.
Collaborated with research team resulting in published work.

Research Assistant

Ohio University | Athens, Ohio

2016 - 2016

Developed embedded software for wireless-enabled microcontrollers focused on health applications using C and Python.

CERTIFICATIONS

AWS Certified Developer – Associate (DVA-C02), Expected March 2025

EDUCATION

Bachelor of Telecommunications Engineering

Universidade Federal Fluminense | Niterói, Brazil

Exchange Student, Electrical Engineering

Ohio University | Athens, OH
