Strong Business Acumen  
Performance Tracking & Enhancements  
Technology Trends

## TECHNOLOGY

Databases & Data  
T-SQL  
MySQL  
MS Access SQL  
Structured & Unstructured  
Reporting & Visualization  
PowerBI  
Excel (Advanced)  
MS Access (Advanced)  
VBA  
Oracle Business Intelligence  
Business Objects  
PeopleSoft  
Data Science & Platforms  
R, Python

## PROFESSIONAL PROFILE

I'm a seasoned data professional with over 15 years of experience across multiple industries, including energy efficiency, retail, healthcare, and finance. I've designed and optimized data systems, from building a 36-million-record database for AstraZeneca and Pfizer's global surveillance studies to creating automated reporting processes for major energy companies like Consumers Energy and ComEd. With a strong background in SQL, MySQL, and business intelligence tools like Excel, Business Objects, Power BI, and Oracle Business Intelligence, I specialize in data normalization, QA/QC systems, and risk modeling.

I've led teams, improved operational efficiencies, and developed scalable solutions that save organizations time and money. My expertise spans database management, data governance, and project management, and I'm always looking for ways to leverage data to drive business decisions.

## PROFESSIONAL EXPERIENCE

### DNV

#### Senior Consultant / Senior Program Analyst

Sept 2019 - Jan 2025

Energy Efficiency Programs (Illinois, New Jersey, Michigan, and Arizona)

- Supported Energy Efficiency programs across multiple states, leading various initiatives to enhance data management and reporting processes.
- Developed and maintained Trade Ally Risk-Based Scoring (RBS), optimizing performance tracking and identifying opportunities for improvement.
- Automated QA/QC processes, ensuring high-quality, accurate data across all reporting functions.
- Created stored procedures in SQL Server to streamline data processing and enhance reporting efficiency.
- Led a team of 5 business analysts, overseeing data loads, troubleshooting ETL failures, and ensuring smooth operations.
- Managed data governance and documentation, ensuring that all standardized reporting processes were up to date and aligned with best practices.

pharmaceutical surveillance studies, creating a 36 million record database and improving data integrity.

- Led data integration efforts for large-scale global pharmaceutical surveillance studies, creating a 36 million record database and improving data integrity.
- Merged AstraZeneca and Pfizer's global surveillance microbial studies (2002-2018), resolving scientific discrepancies and ensuring data consistency.
- Developed and implemented stored procedures to automate data validation and ensure the accuracy of test results across various studies.
- Collaborated with lab directors to define customized reporting requirements and deliver comprehensive data analyses.

## PROFESSIONAL EXPERIENCE continued

### GE Capital

Risk

Analyst

Aug 2010 - July 2014

Leadership Team with the Field Services Group

- Optimized risk analysis processes for a \$13 billion portfolio, driving efficiency and accuracy in financial audits and risk assessments.
- Automated risk-based scoring for the portfolio, reducing process time from 4 days to 1 hour, and improving operational efficiency.
- Redesigned and automated Risk-Based Scheduling for 35,000 accounts, reducing scheduling time from a month to minutes and ensuring 100% accuracy in audit schedules.
- Collaborated with audit and finance teams to develop and implement a new reporting system using Oracle Business Intelligence, replacing legacy systems.

### Ready Set Companies

IT

Manager

Oct 2008 - Nov 2009

- Served as Business Analyst to build variance models of call volume by month to optimize mobile phone plan saving over \$200,000/per year. Other savings were also realized through conference calls and eFax plans.
- Coordinated implementing FTP Dropbox, Time and Attendance Modules, and HRB Integration between multiple vendors.
- Effectively managed, directed, and coordinated the workload of the IT team.

### Ready Set Companies

Business

Analyst

May 2007 - Oct 2008

Enterprise KPI  
Data Strategies & Roadmaps  
Data Compliance & Governance

## CERTIFICATIONS AND EDUCATION

Bachelor of Science  
Multidisciplinary Studies  
Michigan State University

- Saved the company \$181,000/annually in manager salary hours through the implementation of automated reporting procedures.
- Interfaced with HR to gather payroll requirements then reverse-engineered Enterprise eTime Reports (ADP) to create an ETL process facilitating comprehensive Employee Hours Reporting.
- Gathered requirements and developed the Outside Labor Management Application for the Administrative Team.
- Developed complete transformation, integration, and reporting process for Home Depot's post-ISS TMO and WebClock systems.

### **Detail at Retail**

MIS

Mar 2002 - April 2007

- MySQL, Access, Excel. Back End and Front End solutions across departments.
- Gathered requirements for reporting needs within the Home Depot ISS Reporting Model, then developed a conversion application (ETL process) using the transformed data.
- Gathered requirements from the HR Director and then developed a payroll application managing 250+ Reps.
- Working with HR and CEO, defined performance metrics for employee evaluations, then built a Business Intelligence Dashboard to display results by employee.
- Provided monthly Microsoft Access and Excel Training to the management team to help them better understand the entire reporting life cycle.
