SUMMARY

Senior Full Stack Engineer (.NET, C#, React, Angular, Azure)

- As a dedicated Senior Full Stack Engineer with a decade of experience, I specialize in designing, developing, and optimizing resilient web applications that meet modern business needs.
- I bring a deep proficiency in leveraging advanced technologies like **React**, **Angular**, **.NET**, **ASP.NET**, **C#**, **C++**, and cloud platforms such as **Azure** and **AWS** to craft scalable, high-performance solutions.
- My expertise extends to implementing Microservices architecture, ensuring systems are modular, maintainable, and easily scalable.
- I have a comprehensive understanding of the software development life cycle, from initial concept and architecture to deployment and ongoing maintenance. My skill in creating seamless user experiences is matched by my ability to build efficient and reliable backend systems.
- I've successfully led cross-functional teams, mentoring members while fostering collaboration to achieve project goals.
- My focus is always on translating business objectives into technical solutions, leading to the creation of impactful, value-driven software products.
- I am committed to continuous learning, staying ahead of industry trends, and driving innovation in Full Stack Engineering to deliver excellence in every project.

SKILL SET

Front-End Development

- Frameworks & Libraries: React, Angular.js, Angular 8/12/14
- Styling: HTML5, CSS3, Sass, Bootstrap, TailwindCSS.
- Tooling: Angular CLI, Webpack, Babel, Prettier, ESLint, TSLint.

Back-End Development

- Languages & Frameworks: .NET, ASP.NET, C#, .NET Core, MVC, Razor Pages.
- Data Access: Entity Framework Core, LINQ, ADO.NET.
- API Development: RESTful API, Web API, GraphQL API, gRPC.
- Microservices Architecture: Designed and implemented using .NET Core and Azure.

Cloud & DevOps

- Platforms: Azure App Service, Azure Functions, Azure SQL Database, Azure Blob Storage, Azure Virtual Machines, Azure Kubernetes Service (AKS), Azure DevOps
 - Messaging & Event-Driven Systems: RabbitMQ, Azure Service Bus, Apache Kafka.
 - Continuous Integration/Continuous Deployment: Azure DevOps, Jenkins, GitHub Actions
 - Containerization & Orchestration: Docker, Kubernetes.
-

EDUCATION

B.S. Bachelor of Computer Science – California State University, 2012

PROFESSIONAL EXPERIENCE

Senior .NET Full Stack Engineer
Microsoft, Pennington, New Jersey
May 2020 – Present

- Designed and Implemented Web Applications using **ASP.NET MVC 6.0**, **Web API**, **React**, Entity Framework (EF), ensuring high-performance and scalable solutions.
- Engineered and optimized web applications leveraging **C#**, **.NET**, and **React** to improve user engagement and application responsiveness.
- Built cloud-based solutions by incorporating **Azure services** such as **serverless** functions, web hosting, and relational databases, fostering integration and flexibility across the platform.
- Partnered with **senior engineers** and interdisciplinary teams to develop unique features that enriched user experience and bolstered platform functionality.
- Streamlined deployment processes by establishing **continuous integration** and delivery (CI/CD) workflows, ensuring efficient and reliable updates.
- Contributed to team learning and code quality by actively participating in **reviews**, offering constructive feedback, and sharing technical **insights**.
- Diagnosed and resolved technical issues across both frontend and backend layers to maintain system reliability and meet **performance** standards.
- Took ownership of smaller projects, working across various stages of development to deepen technical proficiency and improve project outcomes.
- Enhanced security, scalability, and performance through targeted optimizations and best practices, contributing to a smoother user experience.
- Leveraged **Jira** to manage task assignments, track development progress, and communicate effectively with the product team to align on project goals.
- Demonstrated self-motivation and time management skills while working remotely, coordinating smoothly with team members and stakeholders.

Senior Software Engineer
Capital One, Columbus, SC
Sep 2016 – Apr 2020

- Designed and implemented client-side and server-side validation checks, session management, and efficient data access using **ASP.NET MVC 5.2**.
- Developed rich content front-end using React, HTML5, and CSS3, creating and integrating various components in **React/NextJS** with the backend ASP.NET Web API.
- Worked extensively with **React JS**, leveraging the Virtual DOM and React Views to build efficient user interfaces with custom HTML tags and component-based architecture.
- Built and optimized Web APIs using **.NET Core 2.1** & EF Core 2.1, including unit testing to ensure reliability and performance.

- Utilized C# and .NET techniques, such as lazy loading and reflection, to enhance application performance and maintainability in .NET 4.5 environments.
- Designed and implemented features integrating **NextJS**, C#, **ASP.NET**, and SQL Server for robust, full-stack development.
- Developed front-end components using ReactJS/Redux, Materialize CSS, and Toolbox API, creating interactive and responsive web applications.
- Applied Object-Oriented Programming (OOP) principles using C# to design applications with **ASP.NET** Web Forms, JavaScript, MVC, and WebAPI.
- Created and consumed Web APIs on the .NET Core 2.1 platform, integrating third-party APIs for processes such as check scanning and depositing.
- Extensively used **React JS**, **Node JS**, Express, HTML, and CSS for full-stack development, focusing on modern JavaScript frameworks and libraries.
- Implemented client-side validation using ASP.NET validators to ensure data integrity on the user interface.
- **Deployed and managed applications using Azure Kubernetes Service (AKS), optimizing container orchestration and scaling for high-demand environments.**
- **Implemented Azure Functions for serverless computing, enabling efficient execution of code in response to events and reducing operational costs.**
- Created and managed SQL Server databases, handling dynamic data access components and leveraging NoSQL for flexible schema management.

Software Engineer

Tata Consultancy Services, Columbus, SC

October 2013 – Feb 2016

- Directed the modernization and optimization of Medical Platform, a key product ensuring secure and seamless medical services.
- Developed **ASP.NET MVC** and Web APIs (HTTP/REST Services) for N-tier web-based applications using Visual Studio 2013 and 2015.
- Followed **Agile** methodology, participating in daily **SCRUMs** to ensure timely project delivery.
- Utilized **ASP.NET**, C#, and MVC 5.0 with Razor for application development and validation.
- Led front-end development with **ASP.NET**, CSS, JavaScript, AJAX, and Telerik Controls.
- Enhanced UI/UX using Twitter Bootstrap and upgraded CSS for responsive design.
- Integrated content management features with Web APIs and designed RESTful services.
- Managed databases with SQL Server and Oracle, writing stored procedures and queries.
- Developed dynamic web applications by integrating AngularJS with Bootstrap.
- Implemented unit tests with **NUnit** and MS Unit, adhering to TDD principles.
