

Pradhiep Dasari
UI/UX Developer

Location: Texas, USA | Email: pradhiepdasari@gmail.com | Contact No: (469) 468-2793 | LinkedIn

Professional Summary:

- UI/UX Developer with 4+ years of experience designing and developing user-centered digital experiences for healthcare and enterprise applications. Adept at conducting A/B testing, user interviews, usability tests & translating insights into actionable design improvements.
- Proficient in creating interactive prototypes using Figma, Axure RP, Proto.io and Invision, enabling efficient feedback integration and reducing development cycles. Collaborative in Agile environments, utilizing tools such as Jira, Zeplin, and Git for version control and project management.
- Skilled in building responsive, reusable UI components using React.js and SASS, ensuring pixel-perfect designs across multiple devices.
- Strong understanding of WCAG 2.1 accessibility standards, implementing semantic HTML5, ARIA landmarks and optimized color contrasts to enhance usability for users with disabilities.
- Experienced in performance optimization techniques including code minification, lazy loading, and service workers, resulting in improved page load times and overall application performance.
- Strong focus on data-driven design decisions with experience in user behavior analysis using Google Analytics and Hotjar to optimize user flow and engagement. Expertise in cross-browser and cross-device testing, ensuring compatibility across modern browsers and platforms.
- Proven ability to deliver high-quality, scalable UI/UX solutions that align with business objectives and improve user satisfaction.

Technical Skills:

User Interface (UI) Design:	Wireframing, Prototyping, Visual Design, Interaction Design.
User Experience (UX) Research:	User Testing, Persona Development, Hotjar, Optimal Workshop, Google Analytics, Usability Testing, User Interviews and Journey Mapping.
Front-End Development:	HTML5, CSS3, JavaScript (ES6+), Responsive Design, React.js, Angular, Vue.js, Sass, LESS, Bootstrap, Material UI, Tailwind CSS, Git/GitHub, Webpack, Gulp, Grunt, Cross-Browser Compatibility.
Design Systems:	Component Libraries, Style Guides, Atomic Design.
Accessibility:	WCAG Compliance, ARIA, Semantic HTML.
Design Tools:	Figma, Sketch, Adobe XD, Invision, Adobe Illustrator/Photoshop.
Prototyping Tools:	Marvel, Axure RP, Proto.io.
Collaboration & Workflow Tools:	Jira, Trello, Miro, Zeplin, Slack, Microsoft Teams.
Web Performance Optimization:	Lighthouse, Google Page Speed Insights, Chrome DevTools.
Version Control & Code Collaboration:	GitHub, GitLab, Bitbucket.
Testing & Debugging Tools:	Chrome DevTools, Jest, Cypress, Selenium, Storybook.

Professional Experience:

HCA Healthcare | UI/UX Developer | Aug 2023 - Current

- Worked on the redesign of a healthcare provider portal, improving overall user engagement by 35% through a detailed overhaul of information architecture, enhanced visual hierarchy and the creation of consistent design patterns, to increase usability and satisfaction.
- Designed and iterated interactive prototypes using Figma, reducing development cycles by 25% by incorporating real-time feedback from stakeholders and users during agile design sprints.
- Ensured full compliance with WCAG 2.1 accessibility standards, incorporating semantic HTML5, ARIA landmarks and optimized color contrast ratios to improve the user experience for patients and healthcare providers, including those with disabilities.
- Developed and maintained reusable, responsive UI components in React.js integrated with SASS, achieving pixel-perfect design across a variety of screen sizes (desktop, tablet, mobile), ensuring compatibility across modern healthcare application environments.
- Executed comprehensive cross-browser and cross-device testing, identifying and resolving interface bugs across Chrome, Firefox, Safari, and Edge, achieving a consistent 98% cross-browser compatibility score.
- Integrated and analyzed user behavior data using Google Analytics and Hotjar, translating insights into actionable UX enhancements that improved user flow by 20% and reduced bounce rates by 18%.
- Involved in prototyping initiatives using Axure RP and Proto.io, enabling the design team to present fully interactive and functional prototypes to stakeholders, accelerating the approval process by 30%.
- Developed and collaborated on high-fidelity wireframes and visual design elements with Zeplin, ensuring seamless handoffs between design and development teams, reducing revision time by 40%.
- Optimized front-end code and assets for performance, reducing page load times by 30% through code minification, lazy loading of images, and implementation of service workers for offline functionality in healthcare apps.
- Managed and tracked project timelines and deliverables using Jira, ensuring alignment with Agile methodology, promoting efficient sprint planning, and facilitating collaboration across cross-functional teams, ultimately delivering features on time 95% of the time.

- Conducted and analyzed A/B tests on key user flows, driving design decisions that improved task completion rates by 20% and reduced user drop-off by 12% in critical healthcare application areas.
- Implemented continuous UX improvement strategies through iterative user testing and design adjustments, decreasing user errors by 15% and boosting task efficiency, leading to a 25% increase in successful patient appointment bookings.

Accenture – India | UI/UX Developer | Jun 2020 – Jul 2022

- Achieved a 25% increase in conversion rates by implementing user-centered design improvements, utilizing A/B testing results to refine UI elements based on user feedback.
- Enhanced average session duration by 40% through the design of intuitive navigation and engaging UI components, ensuring seamless user interactions. Automated UI testing with Selenium and Python scripts, reducing manual testing time by 40%.
- Ensured 100% compliance with WCAG standards, making the site fully accessible to users with disabilities, and conducting regular audits to maintain accessibility standards. Developed interactive prototypes using Invision for user testing sessions.
- Collaborated with the DevOps team to set up scalable architecture for UI/UX components on AWS, leading to a 35% improvement in traffic handling.
- Reduced page load time by 30% through the application of responsive design principles and performance optimization techniques, utilizing tools like Lighthouse and Google Page Speed Insights. Implemented ARIA roles and semantic HTML to enhance site accessibility.
- Conducted in-depth user interviews and usability tests to gather actionable insights for redesigns, synthesizing findings into comprehensive reports for stakeholder presentations. Collaborated with developers to implement responsive design using React.js.
- Created high-fidelity wireframes and interactive prototypes using Figma, effectively visualizing design concepts and facilitating stakeholder feedback sessions, employed Sass for modular CSS development, improving maintainability.
- Leveraged Hotjar and Google Analytics to analyze user behavior, identifying pain points and opportunities for design enhancements that align with user needs—conducted regular code reviews to ensure adherence to best practices.
- Collaborated with cross-functional teams using Jira and Miro for project management, facilitating workshops to align design objectives with business goals. Conducted code reviews and optimized Java-based UI/UX designs for better scalability and maintainability.
- Utilized Git for version control, ensuring efficient collaboration with the development team and maintaining project integrity throughout the design process. Conducted performance audits on SQL queries affecting UI components, resulting in a 20% reduction in load times.
- Implemented performance optimization techniques and regularly monitored design effectiveness using analytics tools, driving ongoing improvements in user experience.
- Actively participated in sprint planning and retrospectives, contributing to team collaboration and enhancing the overall workflow efficiency.

Education:

Master of Computer Science - University of North Texas, Denton, TX, USA.

Bachelor of Electronics and Communication Engineering – Jawaharlal Nehru Technological University, Kakinada, India.
