

PROFESSIONAL SUMMARY

- Around 5+ years of software development experience in object oriented programming, design and development of Multi-Tier distributed, Enterprise applications using **UI with Java** technologies in Software Development Life Cycle (SDLC) model.
- Best knowledge in **Telecom, Transportation, Finance** domains.
- Strong knowledge on **FIOS (Fiber Optic Service)** communication network.
- Strong technical skills in the areas of distributed technologies like **JAVA, J2EE (JDBC, Servlets, JSP, RMI, JNDI, JMS)**
- Experience in developing the frontend/web applications using **HTML5, CSS3, JavaScript, AJAX, XML, jQuery, JSON, Bootstrap** and **Angular JS**.
- Experience in developing distributed applications using **SOAP** and **RESTful** Web-Services.
- In-depth knowledge and experience of Analysis and Design methodologies using **OOAD, UML**.
- Extensive experience with Frameworks in ORM (**Hibernate, JPA**), Spring (**Spring IOC, Spring MVC, Spring JDBC, Spring Security**), **Maven, Ant, JUnit** and **TestNG**.
- Expertise in MVC architecture using **Spring, JSF** and **Struts framework** and implementing custom tag libraries.
- Expertise in deploying enterprise applications on WEB/Application servers like **IBM WebSphere, JBoss, Apache Tomcat 8** and **WebLogic**.
- Experience in building applications with **Maven** script and deploying on **WebSphere Application Server**.
- Experience in working with databases like **MYSQL, DB2, Oracle 8i/9i/10g/11g (SQL, PL/SQL)** **DynamoDB** and **MS SQL Server**.
- Hands on experience with source control tools like **CVS, Clear Case, SVN, GIT**
- Hands on experience of working with **NoSQL** systems like **MongoDB** and knowledge on **Cassandra**.
- Good implementation knowledge on **Garbage Collection, JVM tuning, Code Refactoring, Performance tuning, Memory optimization** and **Multithreading**.
- Hands on experience in configuration of **Hudson, Sonar** and **Jenkins** and Distributed Computing using **LSF**
- Working knowledge of **AWS Cloud** infrastructural components.
- Designed and developed the **RESTful** web services using the JAX-RS API to get the user information.
- Experience in **TDD, BDD, Continuous Integration, Continuous Delivery**.
- Experience in **Planning** and **Scheduling** project timelines and track project progress.
- Assisted in Developing testing plans and procedures for **Unit test, System test, Performance test and Acceptance test**.
- Excellent oral, written and **presentation skills, interpersonal skills** & actively participated in **organizing KT** sessions.
- Experience in **Planning** and **Scheduling** project timelines and track project progress.
- Strong experience in **Release Management, Production support, Deployment to UAT, Production environment**.
- Thorough understanding of **Software Development Life Cycle (SDLC)** and **MVC Architecture**.

EDUCATION

Masters in Computer Science

University of Bridgeport, Connecticut

TECHNICAL SKILLS

Languages	JAVA , C, C++, Python
JSE Technologies	JDBC
JEE Technologies	Servlet, JSP, JAXB, JAXP
SOA	Web Services [JAX-WS, JAX-RS], Axis API
Frameworks	Spring, Hibernate, JSF
Web Technologies	HTML5, CSS, JSON, JavaScript, JQuery, Angular JS
XML Technologies	XML, XSD, XSLT, XPath
Servers	Apache Tomcat 8.0, WebLogic, JBoss, WebSphere
Database Systems	Oracle 8i/9i/10g/11g, MySQL, MS SQL SERVER, PostgreSQL
NoSQL Systems	MongoDB
IDE	Eclipse, STS, Net Beans
Build Tool	Maven, ANT
Version Control	SVN, GIT, CVS
Operating Systems	Windows Variant's, Linux, Unix
Automated Testing Tools & Frameworks	Selenium WebDriver, TestNG, Junit
Other Tools	Jenkins, Docker, Bugzilla, Jira, JMeter, SOAP UI, Mockito

PROFESSIONAL EXPERIENCE

VERIZON, NY
Sr. Java Developer

December 2023 – Present

Responsibilities:

- Involved in analysis, specification, design, implementation and testing phases of Software Development Life Cycle (**SDLC**) and followed **Agile** methodology (**SCRUM**) for developing the application.
- Designed and developed the presentation layer using **Model View Architecture** implemented by **Spring MVC**.
- Designed Java components and integrated using **Spring** framework for **Hibernate** Object/Relational persistence mechanism.
- Designed powerful **JSF** and **JSP** tag libraries for reusable web interface components.
- Created web front end using JSP pages integrating **AJAX** and **JavaScript** coding that provide a rich browser based user interface.
- Participated in developing the user interface for the application using **JQuery**, **JavaScript** and **CSS**.
- Developed **SQL**, **PL/SQL**, **Stored Procedures** using **SQL Developer** for **Oracle database**.
- Created and Consumed **RESTful Web Services** using **Spring RestEasy API**.
- Implemented **Hibernate** to persist the data into Database and wrote HQL based queries to implement CRUD operations on the data.
- Implemented **Spring** transaction management for some database transactions.
- Used **Hibernate3 Annotations** and created **Hibernate POJOs**.

- Created **UNIX** shell scripting for periodic generation of reports.
- Used **Spring Boot** which is radically faster in building cloud **Micro Services**.
- Effectively participated in every day **Agile Scrum** stand-up meetings and participated in iteration, planning and retrospective meetings.
- Involved in deploying the application under **Apache Tomcat Web Server**.
- Used **JIRA** for storing, maintaining the test repository, bug tracking and reporting.
- Automated the complete set of functional test cases using **Selenium WebDriver** to ensure correctness of new source code.
- Used **Jenkins** as continuous integration server to run automated test suites and scheduled the periodic builds.
- Implemented **Spring Dependency Injection** and Annotated Mappings.
- Installed and configured **MySQL** on **Linux** and **Windows** environments.
- Created **stored procedures** for maintaining SQL Server, Written Stored Procedures, Triggers and functions for Application Developers.
- Designed and developed web interface using **JSP, Servlets, JavaScript** and **JDBC** for administering and managing users and clients.
- Established **JDBC** connection between the web application and the **My SQL** Database.
- Designed and documented **REST/HTTP APIs**, including **JSON** data formats and API versioning strategy.
- Virtualized the servers using **Docker** for the test environments and dev-environments needs, also configuration automation using **Docker** containers.
- Involved in review and analyze of user stories, solution specifications architecture and project design.
- Extensively used Core Java concepts such as **Exception Handling, Collection Framework** and **Multithreading**
- Used **MAVEN** to define the dependencies / plugins and build the application.
- Used **Log4j** to maintain application logs.
- Developed code in Java language using **Eclipse IDE** and used **GIT** for source code management.

Environment: Agile Methodology, Java EE 7/8, Spring 4.0, Hibernate, **RESTful** Web services, AJAX, JQuery, Spring Boot-Microservices, HTML, CSS, XML, JSON, JSF, Oracle, GIT, log4j, UNIX shell script, Tomcat 8 , Maven, TestNG, JUnit, Windows, Unix, Jira, Docker, Eclipse, MySQL.

DXC Technology, UP, India
Java Developer

July 2020 – March 2023

Responsibilities:

- Worked closely with the business analysts in gathering, understanding, development and implementing the requirements. Followed **Agile Methodology**, participated in **Scrum**, Sprint planning and retrospective meetings.
- Developed the GUIs using **HTML, CSS, JSP** and JavaScript Components.
- Developed the GUI module using Struts Framework, Tiles, **JSP, AJAX, HTM** and JavaScript.
- Developed **XML** Schemas – **XSD, DTD** for the validation of XML documents
- Used **AngularJs** in a JavaScript Framework with directives and expressions for UI development.
- Also used AngularJS bootstrapper for simplification of development and testing purposes.
- Extensively worked on developing UI components using JavaScript and JSON to interact with **RESTful** webservices.
- Implemented Rule base techniques and others for Text Analytics to better understand the hidden issues.
- Used search and encryption algorithms for better searching methods and security improvisation.
- Worked on improvement and support to the existing Ecommerce environment.

- Built a custom cross-platform architecture using Java, **Spring** Core/MVC, **Hibernate** and Messaging Routing Service Active-MQ.
- Implemented Model View Controller (**MVC**) architecture at the Web tier level to isolate each layer of the application to avoid the complexity of integration and ease of maintenance.
- Created and managed **Microservices** using **Spring Boot**. Microservices were being used as a strategy to gradually replace a core monolithic application while still adding business features.
- Involved in writing **Spring** Configuration **XML**, file that contains declarations and business classes are wired-up to the frontend managed beans using **Spring IOC pattern**.
- Developed application service components and configured beans using **Spring IOC**.
- Installed, configured and administered **WebLogic Server 10.3**
- Used **Hibernate** for mapping java classes with database and created queries with **HQL**.
- Implemented **Hibernate ORM** for **persistence management**.
- Used **SQL** statements and procedures to fetch the data from the database.
- Build application with **ANT** tool and deployed on IBM Web Sphere application server.
- Implemented Web-Services to integrate different applications internal and third party components using SOAP and **RESTful** services using **Apache-CXF**.
- Implemented Hibernate ORM tool integration with Spring MVC to interact with back end persistence system Oracle11g.
- Developed Hibernate entity **POJOs** based on **Database** schema. Implemented Criteria Query and Lazy implementation.
- Developed and published web-services using **WSDL**, **SOAP**, **XML** and Jax-B.
- Involved in pre-testing the Web-Service calls with SoapUI using end-points.
- Developed and deployed application in **JBoss** application server.
- Used various cloud computing tools and worked on **AWS** environment.

Environment: JDK 8.0, JEE, JAVA, **EJB**, JMS, JAX-WS, WebServices, Eclipse, Spring, Hibernate, JBOSS, JSP, Servlets, Spring IOC, Web Sphere, Log4j, JDBC, SQL, PL/SQL, JQuery, Oracle 11i, SQL Developer, Tortoise SVN, AWS, Red Hat Enterprise Linux, Solaris.

DXC Technology, UP, India
Software Engineer

March 2019 – July 2020

Responsibilities:

- Worked closely with the business analysts in gathering, understanding and implementing the requirements.
- Involved in analysis, design and development of the project.
- Developed application by using **Servlets** and **JSPs**
- Developed the application using **J2EE** architecture.
- Designed and developed web pages using **HTML** and **JSP**.
- Used Entity Beans to persist the data into database.
- Used **JMS** to establish message communication
- Responsible for the performance **PL/ SQL** procedures and SQL queries
- Implemented the project using JSP and Servlets based tag libraries
- Involved in developing **JSP** forms.
- Deployed applications on **JBoss 4.0** server
- Used **Web Services-WSDL** and **SOAP on SOA** architecture.
- Developed Session Beans which encapsulates the workflow logic
- Used **Log4j** logging framework to debug the code

- Used **CVS** for the concurrent development in the team and for code repository
- Deployed applications on **Linux** client machines
- Deployed the EARs and WARs in **WebSphere Application** server using **ANT** script
- Used **STS IDE** for code development
- Used **GIT** as version control
- Worked on Data Structures, multi-threading concepts in Core Java.
- Performed **JUnit** Testing on various modules by generating the Test Cases.
- Used Subversion for maintaining the component and for release and version management, and **JIRA** for defect tracking.
- Involved in regression testing, evaluating the response times, and resolving the connection pooling issues

Environment: Java7, J2EE, Junit, Servlets, JSP, JMS, JBoss 4.0, SQL Server 2000, Ant, CVS, PL/SQL, WSDL, SOAP, Eclipse, CVS, Linux, log4j.
