

PRASANNA VEERA REDDY DEVAGIRI

Plano, Texas, 75074 | +1-9728980220 | veerajava875@gmail.com | <https://www.linkedin.com/in/veerareddydevagiri/>

Summary

- **Lead and senior java developer** with 13+ years of experience managing the full software development lifecycle
- Proficient in **Java/J2EE, Spring Boot, API development (REST/SOAP), microservices**, distributed systems, **Kafka, Redis, MySQL, MongoDB, AWS**
- Skilled in collaborating with teams and clients to deliver high-quality solutions on time.
- Strong leadership in guiding application design, development, and implementing best practices, while mentoring junior developers and supporting team growth.
- Strong experience with **AWS** cloud technologies, including **EC2, S3, Lambda, RDS, API Gateway, SQS, SNS**, and CloudWatch, **EKS,ECS**, building cloud-native applications and optimizing infrastructure costs.
- Proficient in Object-Oriented Programming (OOP), design patterns, microservices architecture patterns, multithreading, asynchronous processing for building scalable and high-performance applications and services
- Experienced in **leading** and **mentoring** engineering teams, driving technical roadmaps, and delivering scalable solutions while fostering collaboration and best practices.
- Extensive experience across multiple domains, including **Fintech, CRM, Ad-Tech, E-Commerce, and Retail**, delivering scalable and high-performance solutions
- Proficient in Spring Boot and its core modules, including **Spring Security, Spring Data JPA, Spring MVC, Spring Batch, and Spring WebFlux**, for building secure and scalable applications

Career Snapshot

Cashfree Payments – Tech Lead (2023-2024) | Salesforce LMTS (2019-2023) | AirPush-Lead Engineer (2016-19) | Airpush SDE-II (2014-16) | Amazon – SDE (2012-14)

Education

B.Tech : Computer Science and Engineering
International Institute of Information Technology

2011
Hyderabad, TG

Skills

- **Java**
- Cassandra, DynamoDB, MongoDB, MySQL
- Redis,Memcache, hazelcast
- **AWS (S3, RDS,ECS,EKS,ECR,SQS,SNS,Redshift**
- **Spring, Spring Boot, Spring Security**, REST APIs, Spring MVC, Spring Data JPA, Spring Batch
- Kafka
- Docker , K8s, Helm, Jenkins, ArgoCD
- **Microservices**
- **GIT,Github,Perforce**
- Data Model design & System architecture
- Software Development Lifecycle
- Distributed Systems
- Multi-threading and concurrency
- Scaling
- Technical leadership
- Project management
- Agile Methodologies

Experience

Tech Lead
Cashfree Payments

09/2023 to 12/2024
Bangalore, India

- Drove the design and architecture of a microservices-based, distributed payments orchestration platform (flowwise), transitioning it from concept to a robust, scalable system
- Personally led the effort to build and deploy the product, ensuring high standards of code quality, and scalability..
- Scaled the payments orchestration platform to handle 10K qps , ensuring high availability and reliability.
- Led the scaling of Cashfree's payment system to manage peak traffic during major events like IPL
- Successfully developed and deployed Flowwise native, a self-hosted payments orchestration platform that enables all payment actions to be executed directly on the merchant's infrastructure
- Optimized and scaled the payment system for high-traffic IPL transactions by implementing caching, read-write database separation, efficient transaction management, and graceful service shutdown/start. These improvements increased the system's capacity from 800 TPS to 1300 TPS, ensuring seamless handling of peak traffic during IPL.

Technologies : Java, Springboot, MySQL, MongoDB , Redis,Kafka, Elastic search, Redshift ,AWS, K8s,Helm, Docker

Lead Member of Technical Staff
Salesforce

08/2019 to 04/2023
Bangalore, India

Generic Visit: Part of Common services cloud in industries that enables visit use cases (Ex: Sales rep visits in retail Execution, partner visits in Manufacturing cloud, Inspection in public sector cloud)

- Led a **team of 8 software engineers**, ensuring timely milestone delivery and high-quality results.
- Designed a **scalable** and extensible **data model** and **system architecture** for the generic visit application
- Refactored the back end for improved modularity and extensibility, enabling the development of flexible REST APIs
- Collaborated with stakeholders to seamlessly integrate generic visit APIs and components into multiple applications (Retail Execution, Manufacturing Cloud, Public Sector Cloud), resulting in accelerated releases and generating a cumulative **revenue of 50M** within 6 months.
- Implemented effective technical processes, achieving **90% test automation**, a 80% reduction in bugs, and improved customer satisfaction

Einstein Relationship Intelligence (ERI):

- Led the efforts to integrate Diffeo, a powerful relationship search engine acquired by Salesforce, into the Salesforce platform, resulting in the creation of the Einstein Relationship Intelligence solution
- **Architected** the system and implemented APIs to facilitate robust and encrypted communication between Salesforce and Diffeo
- **Architected the asynchronous notification delivery** from Salesforce to Diffeo resulting in reduction of latency from 2s to 1s.

Technologies: Java, Spring, Spring boot, MySQL, Oracle DB, Kafka, Redis, Salesforce, Aura, LWC, Docker, K8s

Lead Engineer
Airpush

08/2016 to 06/2019
Bangalore, India

- Demonstrated exceptional **technical leadership** and hands-on development as Lead Engineer at Airpush.
- Spearheaded the complete **re-architecture** of the ad serving system, transitioning from PHP to Java and modernizing legacy systems with open-source distributed technologies. Personally contributed to core development efforts, resulting in a **50% infrastructure cost reduction**, doubling throughput from 250M to 500M requests per day, and reducing latency from **500 ms to 150 ms**.
- Led a team of 9 software developers, ensuring adherence to best coding standards and practices while actively participating in code reviews and technical problem-solving.
- Drove the implementation and launch of innovative products, including Mobile Web Ads, Virtual Sky Ads, and Web Push Notification Ads, contributing to both product design and development

Senior Software Developer
Airpush

09/2014 to 08/2016
Bangalore, India

- Joined Airpush as a senior software developer and swiftly adapted to new technologies.
- Identified and resolved system bottlenecks, proposing and implementing fixes to enhance performance and scale the legacy ad-serving system
- Conducted code reviews, ensuring high code quality and adherence to best practices.
- Recognized as a **star performer of the year** twice, subsequently **promoted** to the role of Lead Engineer

Technologies: Java, Spring, Spring boot, MySQL, MongoDB, Cassandra, Hazelcast, Netty, Akka, Kafka, Clickhouse, Docker, K8s, Jenkins

Software Development Engineer
Amazon

06/2012 to 09/2014
Hyderabad, India

DEW :

- Part of the team responsible for the **complete re-architecture** of a legacy reporting system DEW (Data event warehouse)
- Played a pivotal role in **migrating services to the AWS** platform, leveraging its scalability and cloud capabilities resulting in 200% improvement with a peak processing capacity of 265,000 messages per minute

SLCS :

- **Implemented the Sourcing Landed Cost Service**, responsible for accurately calculating the landed cost of purchasing and delivering ASINs to Amazon Fulfillment Centers, enabling the selection of the lowest cost vendor for each specific ASIN.
- Achieved a peak processing rate of **180K requests** per second, ensuring efficient and high-performance cost calculations for a large volume of vendor options.
- Designed and implemented a user-friendly UI for the service, receiving positive feedback from internal customers and peers for its intuitive design and usability

Technologies: AWS, Dynamodb, SQS, SNS, Java, Spring, Hibernate, RDS, S3, JQuery
