

Pratik Lalit Veera

New York | (908) 219-2752 | pveera1@binghamton.edu | [LinkedIn](#) | [GitHub](#)

SUMMARY

AWS Certified Solutions Architect with hands-on experience in cloud infrastructure and DevOps practices. Strong foundation in distributed systems and containerization. Proven ability to implement and optimize cloud-native applications with a focus on reliability and scalability

TECHNICAL SKILLS

Infrastructure & Cloud: AWS (ECS, Lambda, EC2, S3, RDS, DynamoDB, CloudWatch, IAM), Azure (AKS, App Services), GCP, Docker, Kubernetes, Terraform, Ansible, Helm

DevOps & SRE: Jenkins, GitHub Actions, AWS Code Pipeline, Prometheus, Grafana, ELK Stack, DynaTrace, Splunk, Linux, GitLab CI/CD

Programming Languages & Frameworks: Python, Go, Java, JavaScript, TypeScript, Shell, Bash, SQL, PHP, C#, Spring Boot, Django, .Net, gRPC, RESTful API, React

Data & Messaging: PostgreSQL, MongoDB, MySQL, MariaDB, Redis, RabbitMQ, AWS SQS, Kafka

PROFESSIONAL EXPERIENCE

NBC Universal, Software Engineer | Stamford, CT

June 2024 – September 2024

- Contributed to Olympics streaming platform API migration using Go and AWS ECS, helping the team handle 7M+ concurrent users with high availability during Paris Olympics 2024
- Built event-driven microservices using AWS Lambda, SQS, and DynamoDB, achieving 40% reduction in service latency through optimized architecture
- Implemented hybrid caching strategy using Redis and Akamai CDN, with automated 30-minute content refresh scripts ensuring optimal balance between performance and content freshness, resulting in 35% improved response times
- Set up comprehensive monitoring using Grafana, Prometheus and Splunk for real-time performance tracking and log analysis, achieving 99.9% system uptime

Tata Communications LTD, Platform Engineer | Remote

September 2022 – July 2023

- Developed and maintained enterprise billing platform on IZO Private Cloud using microservices architecture, processing 100K+ dollars in monthly transactions
- Architected and deployed Kubernetes-based health monitoring chatbot with robust logging, automated failure detection, and self-healing capabilities, improving system reliability by 40%
- Implemented multi-region disaster recovery system with automated failover, maintaining system reliability with 30-minute RTO
- Enhanced platform security using IZO Cloud Security suite and Splunk SIEM, contributing to successful SOC2 compliance implementation.

PROJECT EXPERIENCE

SimplyOrganize | Azure Cloud, Terraform, Kubernetes Docker, GitLab, C#, .Net, React | [GitHub](#)

- Built scalable project management system using Azure AKS and Terraform, implementing infrastructure-as-code with multi-environment deployment pipelines and automated scaling policies
- Implemented comprehensive monitoring solution using ELK Stack for real-time system metrics and automated alerting
- Established robust CI/CD pipeline using Jenkins and Azure DevOps, with automated testing, security scanning, and blue-green deployments, reducing deployment time by 50%

Alexi | AWS, Kubernetes, Terraform | [GitHub](#)

- Developed cloud infrastructure automation library focusing on multi-AZ deployments using Terraform and AWS
- Created reusable infrastructure-as-code templates reducing deployment time by 30%
- Implemented Kubernetes cluster management with Ambassador API gateway for traffic routing

Andy | Decentralized Task Scheduling Platform for ML Model Hosting | [GitHub](#)

- Led the deployment of Andy on Kubernetes with Helm charts, ensuring high availability and streamlined operations.
- Configured custom monitoring and alerting systems using Prometheus and Grafana, resulting in a 30% improvement in system uptime.

EDUCATION

State University of New York at Binghamton

August 2023 – May 2025

Masters of Science in Computer Science

AWS Certified Solutions Architect – Associate

January 2025
