

# Pravin Jyoti

USA

Full Stack .Net Developer

Ph: 334-245-9887

Email: [jyotipravin28@gmail.com](mailto:jyotipravin28@gmail.com)

## OBJECTIVE:

Proficient .NET Developer with over 5+ years of experience as a Senior Software Developer, specializing in designing and delivering robust applications within the BFSI (Banking, Financial Services, and Insurance) domain. Expertise in Loan Servicing using .NET Core, Python, C#, Angular, SQL, and AWS. Proven track record of designing and implementing scalable solutions that align with business requirements. Possesses strong problem-solving skills, a history of delivering high-quality code, and excellent teamwork, communication, and leadership abilities.

## PROFILE SUMMARY:

- **5+ years** of experience in designing and developing collaborative solutions using various Microsoft Technologies.
- Experienced in **Software Life Cycle** process and development methodologies with strong expertise in building **client** and **server - based solutions**.
- Experienced and passionate developer implementing new emerging Microsoft-related technologies like **PowerApps, Flow, and Power BI**.
- Experiences in **.Net Technologies** include **Object-Oriented Languages (C#), Database (SQL Server), Microsoft Visual Studio, ASP.NET, ASP.NET Core, ADO.NET, MVC, Web forms, MVVM, Server administrations (IIS)** and other supporting technologies and tools.
- Experience in developing application using **.NET 4.5/ 4.0/ 3.5, MS Visual Studio 2012/2010/2008, MVC 3.0/4.0, Razor View Engine, C.Net, ASP.Net, .Net, LINQ, AJAX, XML, JavaScript, jQuery, JSON, HTML and CSS, Oracle 10 & 11g, SQL 2008/2005, webservices and WCF**.
- Experienced and Knowledgeable in **Agile** Software Development, Rapid Application Development (**RAD**) and Test-Driven Development (**TDD**) methodologies.
- Knowledge in Application Blocks and **Design Patterns, Microsoft Windows** Communication.
- Build core platform services, data services, and **UIs** that will support team with Total-Lending Cloud offerings.
- Worked on cloud infrastructure that leverages PaaS capabilities from **Microsoft Azure**.
- Implementation of client-side validations using **jQuery** and **ASP.NET MVC5** Validation implemented at the Controller level.
- Worked on Visual Studio **2015/ 2017, Visual Studio Code V-1.33 .Net Framework 4.5** to implement Business Logic.
- Expertise in performing testing methodologies, Regression, Functional, Manual, **GUI**, and Performance, (**UAT**)
- Experienced in designing professional Web Applications using Front-End technologies like with **HTML5, CSS (Cascading Stylesheets), Node JS, JavaScript, Angular JS, and Ajax**.
- Extensive knowledge of using version control systems like **Tortoise SVN, Team-Foundation Server (TFS), Git hub**, and Visual Source Safe (**VSS**).
- Working knowledge on **DOM Layout, JavaScript functions, Cascading Styles** across Cross-Browser using developer tool integrated with browsers.
- Experience in **.NET** technology using **ASP.NET, Web Forms and Win Forms**. Experience in designing and implementing database-level **T-SQL, Views, and SQL Queries**.
- Team player with excellent communication, analytical and problem-solving skills.
- Hands on experience with Design and Development of **SQL Server** that includes **SQL Queries, Stored Procedures, Triggers and Views**.
- Knowledge in **SQL Server Integration Services (SSIS)** and in using Reporting tools like Crystal Reports, **SSRS** (SQL Server Reporting Services).
- Experience in developing **Automation Scripts**, Execution and Analysis **Test** Results using Data Driven Framework in **Selenium**. Experience in using **Angular.js** to test views and to do end to end unit testing by using Continuous Integration/Continuous Deployment (**CI/CD**).

- Good knowledge on **Microservices**, **AWS (Amazon Web Services)**, working with **EC2**, **RDS**, **Dynamo DB**, **S3**, **Cloud watch** and **Docker**.

## EDUCATION:

- Masters in computer Science from Auburn University at Montgomery, USA.

## CERTIFICATION:

- **AWS Certified Solution Architect – Associate**

## TECHNICAL SKILLS:

- **Programming Languages:** C, C++, C#, VB .Net
- **Database Systems:** MS SQL Server, Oracle.
- **Web Technologies:** ASP.NET, MVC 4/5/6, ADO.NET, Entity Framework, .NET Core 1.0, LINQ, RESTful Web services, Web API, MS PowerApps, XAML, LINQ.
- **Microsoft Tools:** .NET Framework (4.5/4.0, 3.5, 3.0), ADO.NET, Microsoft CRM SDK 5.1, MS Office Suite, MS Teams, MS One Note.
- **Tools:** MATLAB, Kibana, Xamarin, Telerik fiddler, Power Shell
- **Front End Technologies:** JavaScript, jQuery, Typescript, AngularJS, Angular2/4s, React JS, HTML5, CSS3, XML, JSON
- **IDE's:** MS Visual Studio 2017 V:15.9, Visual Studio Code V: 1.33, WPF, WebStorm, SQL, Server Management Studio.
- **Version Controls:** Jira Kanban, TFS (Team Foundation Server), GitHub, Bitbucket, SVN.

## PROFESSIONAL EXPERIENCE:

**Client: Citadel, Austin, Texas, USA**

**April 2024 - Present**

**Role: Full Stack .net Developer**

**Description:** Citadel is a global financial institution specializing in hedge funds and market-making, known for its advanced technology & quantitative strategies. Developed & implemented robust applications through all phases of the software development lifecycle, focusing on user interface design & backend integration while ensuring high performance.

**Responsibilities: -**

- Involved in various phases of Software Development Life Cycle (**SDLC**) of the application using **C#** and **.Net** Core like Requirement gathering, Design, Analysis and Code development.
- Worked in a **Scrum/Agile** environment for design and development stages of the project.
- Good experience and strong fundamental of architecture design including **Data structure**, **n - tier architecture**, **design patterns (Singleton, Factory, Builder, Iterator)**, **architectural patterns (MVC, MVP, MVVM)**.
- Developed the rich UI (user interface) using **ASP.NET MVC**, **HTML5**, **CSS 3**, **Bootstrap**, **Ajax**, **jQuery**, **Typescript**, **Angular 2**.
- Experience in Writing code and debugging skills with **WCF**, **C**, **Web** services.
- Developed **cloud**-based workflow applications using **ASP.NET 4.5** and **MVC 5/4** with **Razor** syntax, **C 5.0/4.0**, **NET 4.5**, **SQLServer 2012**, **AJAX**, **jQuery**, and **AngularJS**
- Responsible for Designing coding developing and implementing application using **C# .Net** and **VB.net**.
- Experience in using SSIS tools like Import and Export Wizard, Package Installation, and **SSIS** Package Designer.
- Experienced in installing and configuring Reporting services and assigning permissions to different levels of users **in SSRS**.
- I experienced **VB.Net** to avoid memory leaks in that **automation** functionality.
- Used **Razor** view Engine to make **UI** light weight and to improve readability.
- Used **ADO.Net** objects such as **Data Adapter**, **Data Reader** and Dataset for consistent data access.
- Created and consumed **RESTFUL APIs** in the development process on **Web API's**.
- Enhanced pages with **jQuery AJAX** methods which provided responsive user interfaces to display the data on the page and to make asynchronous **HTTP** calls to the server side.
- Hands on experience in **SQL Server** and **Oracle** database design and development, writing Constraints, Indexes, Views, Stored Procedures, **Cursors**, **Triggers** and User Defined Functions.
- Experience in developing, analysis and the **creating Unit test** cases for the whole application.

**Environment:** .Net Framework, .Net Core, ASP. NET MVC5, Razor, IIS, C#. Net, Visual Studio, Web API 2.0, SQL Server, Oracle 11g, WCF, Entity Framework, LINQ, Git, AJAX, Angular 2, CSS, SSIS & SSRS, Entity Framework, Typescript, JavaScript, Bootstrap, jQuery, ADO. NET.

**Client:** Aetna, Dallas, Texas, USA

**Aug 2023 – Mar 2024**

**Role:** Full Stack .net Developer

**Description:** Aetna offers affordable health insurance plans with 24/7 virtual care and low-cost clinic visits. Managed the development of a front-end application by collaborating with product owners, implementing user interfaces, and ensuring integration with back-end services while following Agile methodologies.

**Responsibilities:** -

- Developed Complete Front-End using **C#, HTML5, CSS3, Angular 6**, Confidential custom **Angular** Synergy components.
- Participated with product owners to understand the business requirements includes converting mock-ups or wireframes into single page applications
- Extensively utilized core **Angular** features such as **HTTP, Data Binding, Forms, Services, Resolvers, Guards** and Dependency Injection.
- Used Synergy material to build web components such as signup form and rule **form**.
- Consumed Restful web service **APIs** using **POST, PUT, DELETE** and **GET** methods.
- Worked with custom Confidential Synergy components which is like **Angular** Material and Confidential **VDL CSS framework** which is like **bootstrap** to improve the **UI** and **UX**.
- Created **Single Page Application** with loading multiple views using route services and adding more.
- Implemented a service to make asynchronous calls to the **Web API** using **HTTP** Client and checking and handling any errors that may arise using the subscribe feature.
- Each input field was validated based on the requirement and used Custom Validators when Required.
- Designed **Web API REST/JSON** applications to support backend processing.
- Created authorization using individual user accounts in order to prevent unauthorized use of **Web API**.
- Enabled **CORS** on the **Web API** to allow calls from other domains.
- Used **Jenkins** Continuous delivery / Continuous Integration (**CD/CI**) tools to deploy application.
- Worked on **Agile Methodology (Scrum Framework)** to meet timelines with quality deliverables.
- Used **TortoiseGit** for Version Control of code for incremental development and day-to-day basis to maintain the code history.
- Used **RALLY** for project management such as **Backlogs**, Iteration Status, Task assignments, bug tracking and fixture.
- Worked on **integrating** performance testing tools into **CI pipelines** to monitor application performance after every build.
- Documented all aspects of **CI/CD pipeline** configurations, tools used, and best practices for team reference and training.
- Implemented **GitHub Actions** for automating code workflows and deployment processes directly from **GitHub** repositories.

**Environment:** ASP.NET, C#,.NET,C++, VB. Net, SQL Server 2016, WCF, WPFJSON, SSIS, SSRS, WinForms, Bootstrap, Knockout JS, IIS 7.0,JQuery, Win Forms, Azure, Web API, ASP.NET MVC 4/5, ASP.NET Web API, EXTJs, JavaScript, Angular JS, SharePoint, XSLT, CASTsoftware, Visual Studio 2015/2013, Entity Framework 5.0, Team Foundation Server.

**Client:** Deutsche Bank, Mumbai, India

**April 2022 – April 2023**

**Role:** Senior .net Developer

**Description:** Deutsche Bank AG is a German multinational investment bank and financial services. Contributed to building a responsive web application by designing the database, implementing user authentication, and ensuring efficient data handling through client-side validation and API integration.

**Responsibilities:** -

- Successfully utilized code-first approach to design the database in the **.NET** environment by using, **C#** in the **ASP.MVC5** environment.
- Designed a Web application using **Web API** with **AngularJS**, leveraged Entity framework (**EF**)
- Implemented routing to allow for the use of a Single-page-application (**SPA**) with different content using route Provider in the **AngularJS** Module and ng-view in the **HTML5**.
- Implemented Client-side validation using **AngularJS** Custom Form Validation with ng-show and ng-hide.
- Utilized database normalization techniques to create memory efficient **T-SQL** tables, with data redundancy contingency triggers to prepare system against unpredictable user interactions that might jeopardize data integrity.

- Utilized **AngularJS** Route for creating **Single Page Application (SPA)**, and incorporate Model-View-Controller (MVC)
- development pattern allowing efficient unit testing, and appropriately utilizing Controllers, Services, and Factories with dependency injection.
- Implemented ng-repeat to display tabular data and utilized **CRUD** features such as sorting, filtering, paging and data manipulation and by using **AngularJS**.
- Utilize **jQuery AJAX** library to call **Web API** to populate dropdown list and utilize jQuery UI autocomplete to call action method in controller. Use jQuery UI dialog and partial view to implement a pop-up.
- Wrote **LINQ** queries and lambda expressions to perform **CRUD** operations.
- Used Action Filter to authorize user, use forms authentication method to authenticate user.
- Conducted tests on the **Web API** by using Fiddler web debugging proxy.
- Implemented code by using Continuous Integration and Continuous Development using **Azure DevOps**.
- Worked with **Azure Dev Ops** and Octopus deployments tool to implement **CI/CD pipelines**
- Used **CSS3** and **HTML5** to design fully responsive user interface and utilized **Bootstrap**.
- Performed automated data scraping to gather investor's data into the database by using Mozenda and various automated scraping tools.
- Took part in a team environment which implements agile, scrum software development approach.

**Environment:** C#, ASP.Net, Visual Studio, MVC, JavaScript, jQuery, HTML, XML, CSS, SQL SERVER, WCF, WPF, Bootstrap, SOAP UI Webservices, SSRS, Ajax, LNIQ, ADO.net.

**Client:** Jio, Mumbai, India

**May 2019 – Mar 2022**

**Role:** .net Developer

**Description:** Jio is a leading telecommunications company, known for revolutionizing digital connectivity and offering affordable high-speed internet services. Involved in the development and support of a web application to enhance business functions, while collaborating with stakeholders for requirements gathering and ensuring effective data flow.

**Responsibilities:** -

- Interacted with **Business Analyst** team for gathering Requirements.
- Primarily responsible for maintaining, design, development and providing development support to the **web** application.
- Developed View Models in order to restrict the Controllers to control the dataflow between the model and view.
- Involved in preparing the documentation for design and code module that developed.
- Developed **Facets** system automates and streamlines critical business functions across the enterprise, including member enrollment, premium billing, claims processing and customer service
- Integrated FACETS database with the **.NET** applications using **TriZetto** Integration Solution.
- Providing FACETS application configuration support to the client.
- Used **MVC** Architecture Based Development for creating views and partial views UI and the middle tier for various modules.
- Developed user stories using **ASP.NET MVC with C#.Net, JavaScript, AJAX, Razor view engines, Entity Framework 6.0 and MSSQL 2016**.
- Implementing Validation using **JavaScript** (Regular expression, custom, required field, Validation summary) are used.
- Designed a Web application using **Web API** with **AngularJS**, leveraged Entity framework (**EF**)
- Implemented routing to allow for the use of a Single-page-application (**SPA**) with different content using route Provider in the **AngularJS** Module and ng-view in the **HTML5**.
- Implemented Client-side validation using **AngularJS** Custom Form Validation with ng-show and ng-hide.
- Utilized **AngularJS** Route for creating Single Page Application (**SPA**), and incorporate **Model-View-Controller (MVC)** development **pattern** allowing efficient unit testing, and appropriately utilizing Controllers, Services, and Factories with dependency injection.
- Implemented ng-repeat to display tabular data and utilized **CRUD** features such as sorting, filtering, paging and data manipulation and by using **AngularJS**.

**Environment:** C#, ASP.Net, Visual Studio, MVC, JavaScript, jQuery, HTML, XML, CSS, SQL SERVER, WCF, WPF, Bootstrap, SOAP UI Webservices, SSRS, Ajax, LNIQ, ADO.net.
