

Priyanka Gogawale

SQL Developer

+1(502)-592-0088 ✉ priyanka.g@jobtechmail.com 📍 Pennsylvania [in/priyanka-gogawale](https://www.linkedin.com/in/priyanka-gogawale)

SUMMARY

SQL Developer with 10+ years of experience in designing, developing, and optimizing database solutions in SQL Server, MySQL, and Oracle within the USA market. Skilled in query optimization, stored procedures, functions, triggers, and database administration. Expertise in ETL processes, data warehousing, performance tuning, and data migration. Strong knowledge of SSIS, SSRS, Power BI, and cloud-based database solutions in AWS and Azure. Adept at collaborating with cross-functional teams to deliver scalable and high-performance data solutions.

SKILLS

Databases: SQL Server, MySQL, Oracle

SQL Development: Stored Procedures, Functions, Triggers, Views, Indexing, Query Optimization

ETL & Data Warehousing: SSIS, Talend, Informatica, Snowflake, Redshift

Reporting & Visualization: SSRS, Power BI, Tableau

Scripting & Programming: T-SQL, PL/SQL, Python

Cloud Technologies: AWS RDS, Azure SQL Database

Performance Tuning: Query Execution Plans, Indexing, Partitioning, Caching

Version Control & CI/CD: Git, Jenkins, DevOps Practices

Data Modeling: Normalization, Star Schema, Snowflake Schema

Security & Compliance: Role-Based Access Control (RBAC), GDPR, HIPAA Compliance

EXPERIENCE

SQL Developer, Avnet, USA

September 2024 – Present

- Designed and optimized complex SQL queries, stored procedures, and views, improving query performance.
- Developed and maintained ETL pipelines using SSIS and Talend, reducing data processing time.
- Created interactive dashboards and reports in Power BI and SSRS, enhancing business intelligence insights.
- Led database migration from on-premises SQL Server to AWS RDS, ensuring seamless data transition.
- Implemented data validation and integrity checks, reducing data anomalies by 25%.
- Worked closely with data analysts and software engineers to optimize database interactions for web applications.

SQL Developer, Humana, USA

March 2021 – August 2023

- Developed optimized stored procedures, triggers, and functions, improving application response times.
- Designed data models and schemas for new application modules, ensuring data consistency and scalability.
- Implemented partitioning and indexing strategies, leading to a significant reduction in query execution time.
- Automated database backup and recovery strategies, ensuring minimal downtime.
- Assisted in cloud migration and performance tuning of existing database solutions.
- Developed ETL workflows to extract, transform, and load data from multiple sources into SQL Server and Snowflake.
- Experience in T-SQL and PL/SQL for writing complex queries, stored procedures, functions, triggers, and optimizing database performance.
- Wrote SQL queries and indexing strategies, reducing query response times.
- Collaborated with data scientists and analysts to optimize data storage and retrieval strategies.
- Built and managed data pipelines in AWS Glue and Redshift, improving data processing efficiency.
- Enhanced SQL security policies, enforcing role-based access controls (RBAC) to maintain compliance.

SQL Developer (Software Engineer), Atos Syntel, USA

December 2015 – August 2017

- Collaborated with Business System Analysts, Quality Analysts, and SMEs to establish project approaches and work plans, analyzing pharmacy and claims data for Medicare applications.
- Gathered, explored, and cleaned structured data from multiple MS Excel sources using advanced techniques including xlookup and Power Query.
- Developed data manipulation and analysis processes using SQL to generate PARTB and PARTC Medicare information.

- Designed and maintained structured data frames for comprehensive analysis and report generation of members' Medicare information.
- Coordinated with cross-functional teams, particularly data resource teams, to ensure alignment and successful integration of data solutions.
- Worked collaboratively to identify and address client challenges related to healthcare data processing and analysis.
- Created technical documentation including design documents and specifications, while providing training to offshore team members for Claims System process (CAS), EHR, and HEDIS records.
- Improved efficiency by 10 hours per week through SQL, MS Excel, and Power BI implementations, including enhancing PDP processing for Medicare data retrieval.

SQL Developer (Software Engineer), Atos Syntel, INDIA

March 2010 – December 2015

- Worked with the credit card member processing Account Receivable (AR) team for creating and providing dashboard reports when members have delinquent card, late fees, and new credit card member processing.
- Created Report templates, Summary Reports, Master/Detail Reports, parameterized Reports and Crosstab reports using SSRS (SQL Server Reporting Services)/Crystal Report.
- Experience in all stages of Project Development including requirement gathering, writing specifications, designing & documenting, reporting needs of the Client as well as carrying out all stages of development, testing, implementation.

EDUCATION

Master's in Information Systems

Texas A&M University, Texas

December 2020

Bachelor's in Computer Engineering

Savitribai Phule Pune University, INDIA

May 2009
