EXPERIENCE

UX/UI Designer, Sports Excitement LLP, USA Sept 2024 – Present

- Designed responsive, cross-device UI for a social media platform, streamlining user journeys and collaborating with cross-functional teams over Slack in an Agile environment.
- Implemented Data-Driven UX Improvements by leveraging tools like Hotjar, Google Analytics, and Qualtrics XM to identify behavioural insights, reduce drop-offs, and boost conversion rates in online subscriptions.
- Created scalable Design Systems for the platform, proficiently crafting modular, reusable components in Figma and implementing WCAG-compliant systems.
- Conducted user interviews, stakeholder interviews, surveys, competitive analysis, and usability testing to drive user-centred design (UCD) approach and enhance product engagement.

UX/UI Designer, Waters Corporation, USA June 2023 – Sept 2023

- Created Design system from scratch to maintain visual consistency and streamline the design process leveraging tools like Figma, Zero-height, Adobe Creative Suite, and storybook adhering to company's branding guidelines and WCAG standards.
- Leveraged a range of user-centric design methodologies, including usability testing, heuristic evaluations, task flows, wireframing, and prototyping, to optimize navigation and enhance overall user experience for a SAAS product.
- Created designs optimized for easy conversion to front end tools like Angular and React, minimizing design-to-development discrepancies and enhancing workflow efficiency across cross-functional team collaboration.
- Created clear and compelling visualization of data using visual design principles like typography, hierarchy, colour theory while interpreting complex data sets into actionable insights for system monitoring platform.

UX/UI Designer, Tata Consultancy Services, India Sept 2020 – June 2022

- Redesigned TCS's complex internal travel system into a responsive application, ensuring a seamless user experience and compliance with WCAG, Material UI, and HIG standards.
- Utilized information architecture, empathy maps, user flows, journey maps and persona creation to refine user journeys and enhance product usability for B2C AI-Driven conversational travel application.
- Collaborated with cross-functional team of 30 in an agile set up using Teams, Jira, and Miro to align design goals with business and user needs.
- Leveraged Google cloud Dialogflow conversational agents to create gen AI chat bot using a combination of natural language processing and machine learning.
