

SUMMARY

- **4+ years** of experience in designing, developing, and deploying high-performance web and enterprise applications.
- Proficient in **Java, JavaScript, TypeScript, Python**, and **SQL** for backend and frontend development.
- Expertise in frameworks and libraries: **Spring Boot, Angular, React.js, Node.js, Express.js**, and **RESTful APIs**.
- Strong database skills: **PostgreSQL, MySQL, MongoDB, Oracle**, and **SQL Server**, with a focus on optimization and query performance.
- Experienced in messaging and streaming tools: **Apache Kafka, RabbitMQ**, and **ActiveMQ** for real-time data processing.
- Proficient in **DevOps** and **CI/CD** practices using **Docker, Kubernetes, Helm, Terraform, Jenkins, GitHub Actions** and **GitLab CI/CD**.
- Hands-on with cloud platforms: **AWS (EC2, S3, Lambda), Microsoft Azure**, and Google Cloud Platform (**GCP**).
- Skilled in test automation: **JUnit, Mockito, Selenium, Postman**, and **JMeter**, ensuring software reliability and quality.
- Agile experience: **JIRA, Confluence**, and **Trello** for project management and collaboration.
- Passionate about leveraging emerging technologies to deliver scalable, secure, and **customer-focused solutions**.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, TypeScript, Python, SQL, HTML5, CSS, SASS
Frameworks & Libraries: Spring Boot, Spring MVC, Hibernate, Angular, React.js, Node.js, Express.js, JPA, RESTful APIs, SOAP
Database Technologies: PostgreSQL, MySQL, MongoDB, Firebase, Redis, Oracle, SQL Server
Messaging & Streaming: Apache Kafka, RabbitMQ, ActiveMQ
Testing & Automation Tools: JUnit, Mockito, Selenium, Cypress, Postman, JMeter
Build & CI/CD Tools: Maven, Gradle, Jenkins, GitLab CI/CD, GitHub Actions, Travis CI
Containerization & Orchestration: Docker, Kubernetes, Helm
Cloud Platforms: AWS (EC2, S3, Lambda, RDS, CloudFormation), Google Cloud Platform (GCP), Microsoft Azure
Infrastructure as Code (IaC): Terraform, CloudFormation, Ansible
Version Control: Git, GitHub, GitLab, Bitbucket
Agile & Project Management: JIRA, Confluence, Trello, Microsoft Project

EDUCATION

Missouri State University, Springfield, Missouri	Jan 2023 – Jul 2024
Master of Science in Computer Science	
Dr. K.V. Subba Reddy College of Engineering for Women, Kurnool, Andhra Pradesh, India	Jun 2015 – May 2019
Bachelor of Engineering in Electronics and communication engineering	

PROFESSIONAL EXPERIENCE

IBM India Software Developer/Associate System Engineer	Jun 2021 - Dec 2022
• Led the development of a comprehensive enterprise application, incorporating over 25 modules, using Java, Spring Boot, and React.js, enabling enhanced customer data management for 1000+ users. • Collaborated with cross-functional teams to gather requirements and design system architecture, adhering to SDLC methodologies. • Deployed the application on AWS EC2 and utilized S3 for secure data storage. Integrated Azure Services for backup and scalability, ensuring high availability through auto-scaling and load balancing features. • Developed and maintained responsive Angular components for seamless user interfaces, improving overall system performance. • Designed and implemented RESTful APIs using Java and Spring Boot for smooth frontend-backend communication. • Automated build and deployment processes with Jenkins and Maven, optimizing CI/CD pipelines to improve efficiency, reduce manual errors, and enhance software delivery speed and reliability. • Enhanced user interfaces using HTML5, CSS, JavaScript, Bootstrap, and AJAX, ensuring responsiveness across web applications. • Optimized complex SQL queries for MongoDB databases and tailored NoSQL solutions, significantly reducing query response times, enhancing system performance, and improving overall user satisfaction and experience. • Implemented Spring Beans for effective application component management and utilized Spring Security for robust authentication, authorization policies, and enhanced application security and operational reliability. • Developed and maintained React.js components, ensuring smooth integration with backend services for enhanced functionality. • Conducted unit testing using JUnit and Mockito, ensuring code quality, reliability, and performance through early issue detection. • Utilized Git for version control and VS Code as the IDE, enabling efficient collaboration and maintaining code integrity.	
Trigent Software India Software Developer	Dec 2018 – Jun 2021
• Engineered and maintained high-performance e-commerce web applications using Java, ensuring highly scalable and fault-tolerant backend solutions that effectively addressed complex business requirements. • Optimized SQL queries in MySQL, decreasing query response times to under 2 seconds, significantly enhancing database performance for real-time inventory updates, ordering processes, and overall system efficiency. • Managed project dependencies and builds using Maven, ensuring seamless integration of third-party libraries, consistent builds across multiple environments, and the successful delivery of critical project milestones. • Integrated Hibernate ORM to optimize database interactions, streamline data handling, and improve overall performance, simplifying complex database queries and reducing manual intervention in the development process. • Automated build and deployment with Jenkins and Azure DevOps, establishing consistent and efficient CI/CD pipelines, improving automation, and significantly reducing the occurrence of manual errors during deployments. • Designed and implemented dynamic, user-centric web interfaces using HTML, CSS, JavaScript, and Bootstrap, ensuring responsive designs that met customer requirements for usability and cross-device compatibility. • Contributed to all stages of the SDLC, including requirements gathering, design, development, testing, and maintenance, ensuring full adherence to project scope, timelines, and quality in 5+ e-commerce projects. • Utilized Selenium for comprehensive automated testing, ensuring the availability, functionality, and reliability of the e-commerce platform, and identifying potential defects early in the development cycle. • Leveraged Eclipse IDE for efficient coding, debugging, and project management, optimizing the overall development process, especially in version control management, and ensuring timely project delivery.
