

QUALYNN WELLS

Senior Software Engineer

@ QualynnWel@gmail.com 📍 Boyd, TX

EXPERIENCE

Senior Software Engineer

Pluto TV

📅 10/2021 - 12/2024

- Led the development of an intricate internal platform using **.NET Core** and **React.js**, improving system architecture and user experience.
- Integrated **microservice** architecture, promoting continuous delivery and deployment, and enhancing the speed, efficiency, and quality of software releases.
- Utilized **Docker** in the development and deployment process, ensuring consistency across different environments and simplifying microservices management.
- Managed the orchestration of **Docker** containers using **Kubernetes** to streamline the deployment, scaling, and management of application services.
- Leveraged **Azure** services for **hosting** the application, managing databases, storing files, and automating application deployment, reducing operational costs and simplifying **cloud infrastructure** management.
- Adopted **Agile** methodologies, specifically **Scrum**, to improve team collaboration and accelerate the software development cycle.
- Implemented **CI/CD pipelines** using **Azure DevOps**, automating build, testing, and deployment processes, which significantly improved the project's delivery timeline.
- Developed and integrated **RESTful APIs**, improving real-time data synchronization between frontend and backend, and enhancing the overall user experience.
- Leveraged **Apache Kafka** and **RabbitMQ** within the **.NET** architecture for optimal video processing and delivery, reducing latency and improving streaming quality.
- Conducted comprehensive **code reviews** and provide feedback for **pull requests** regarding best practices and standards.
- **Mentored** junior developers, sharing best practices and providing technical guidance to boost the team's overall skills and productivity.

Senior Software Engineer

WebFox

📅 04/2019 - 09/2021

- Spearheaded the development of an advanced **e-commerce** platform using **ASP.NET** and **Angular**, ensuring efficient collaboration within the team for maximum output and impact.
- Worked with various teams to enhance **customer experience** through the integration of technology, services, and retail expertise, aligning with the company's mission.
- Pioneered the transition of a traditional system to a **microservice** architecture using **Docker** and **Kubernetes**, enhancing system scalability and reliability.
- Designed an efficient solution using **AWS S3** and **CloudFront services**, providing high availability and performance for users.
- Implemented solid security measures using **Azure Active Directory** for identity and access management, and **Azure KeyVault** for constant threat detection and **security** policy implementation.
- Enhanced the efficiency of data operations by utilizing **LINQ** queries with **Entity Framework** for data retrieval and manipulation.
- Enhanced **data reporting** speed and accuracy by implementing performance improvements for **SQL Server** report components.
- Utilized **Tableau** to create interactive dashboards and reports, delivering real-time insights into customer data, sales performance, and supporting data-driven decision making.
- Refined the software development process and guaranteed quick, reliable product delivery by using **Azure DevOps** for **continuous integration and deployment** (CI/CD).
- Ensured top-notch code and reduced regression risks by utilizing .NET testing frameworks (**NUnit** and **xUnit**) for unit testing.

SUMMARY

Seasoned Senior **Software Engineer** with a demonstrated history of **7+** years in developing innovative and impactful software solutions. Proficient in **.NET, React.js, Angular, Docker, Kubernetes**, and cloud platforms like **Azure** and **AWS**. Excelled in evolving traditional systems to **microservices** architecture, enhancing system **scalability** and **robustness**. An enthusiastic leader and mentor, dedicated to cultivating an environment of **high-quality** coding, continuous learning, and effective **teamwork** to steer successful completion of substantial, complex projects.

SKILLS

C#	ASP.NET	.NET Core	MVC
Web API	Blazor	Razor	LINQ
Entity Framework	REST API	Python	
HTML/CSS	JavaScript	ES6	
TypeScript	jQuery	React	
Angular	Node.js		
Microservices	Jest	TDD	
Cypress	NUnit	Power BI	Git
JIRA	Docker	Kubernetes	CI/CD
RabbitMQ			
MySQL	PostgreSQL	MongoDB	
SQL Server	T-SQL	SSRS	SSIS
GraphQL	Redis		
AWS S3	AWS EC2	AWS ECS	
AWS Lambda	AWS DynamoDB		
AWS SQS	Azure DevOps		
Azure Event Hub	Azure App Service		
Cosmos DB	Azure Function		
Azure Blob Storage	Azure KeyVault		

EXPERIENCE

Software Engineer

Virta Health

📅 06/2017 - 03/2019

- Developed multiple advanced **healthcare** platform ensuring compliance with HIPAA regulations, utilizing **React** and **Angular** for front-end tasks, along with **ASP.NET Core** Web API for back-end operations.
- Maximised the potential of **Angular**'s advanced features like type checking and faster compilations, leading to more secure and optimized code.
- Implemented modern **React** features such as Hooks and the Context API, facilitating efficient state management and modular component design. Transitioned class modules of React to functional components using Hooks.
- Used **SQL** skills to develop and refine complex stored procedures, enhancing both the application's speed and the database's efficiency.
- Applied **T-SQL** to construct and optimize complex stored procedures, significantly enhancing database efficiency and application performance.
- Utilized **Jest** and **Cypress** for comprehensive testing of application, ensuring high-quality code and reducing the risk of regressions.
- Enhanced application performance and reliability by integrating **Azure Event Hubs** with stream processing solutions like **Azure Functions** and **Azure Stream Analytics**.
- Implemented robust security measures using **Azure Active Directory** for **identity** and **access management**, and **Azure KeyVault** for continuous threat protection and security policy enforcement.
- Managed security and access control for both **Azure Blob Storage** and **Event Hubs** using Shared Access Signatures (SAS) and **Azure Active Directory**, ensuring data integrity and confidentiality.
- Proactively identified and mitigated potential system bottlenecks, leading to improved system responsiveness and user experience.
- Practiced **code reviews** and pair programming to maintain high coding standards and fostered knowledge sharing among the team.

HACKERRANK CERTIFICATIONS

EDUCATION

Bachelor's Degree in Computer Science

Texas Tech University

📅 2013 - 2017 📍 Lubbock, United States

KEY ACHIEVEMENTS

📺 Streaming TV Service Tool Development

Led a pretty big project where we developed an internal platform. It turned out really well and improved our operational efficiency by 27%. Not only that, but it also made our system more scalable. We saw a direct impact on our customer satisfaction and business growth because of it.

💓 Healthcare Management Platform

Had a big hand in creating two platforms, 'Healthcare Plus' and 'Patient First'. They're really advanced healthcare management systems. We really saw improvements in how we operate and deliver our services. Plus, our patient satisfaction ratings went up, which was awesome to see.

PERSONAL INTERESTS

💎 Problem Solving

I really get a kick out of tackling tough problems and coming up with cool, new solutions. It's even better when those solutions make people's lives better.

🔗 Code Quality

I love writing code that's clean, efficient and easy to maintain. I'm always pushing for high-quality code and regular code reviews in my teams.

👥 Teamwork

I'm all about teamwork - working together, sharing ideas, and getting great results. It's how we make awesome things happen, like boosting operations and satisfaction ratings.

🗣️ Effective Communication

I value clear and concise communication. It's about ensuring everyone is on the same page, reducing errors, and promoting a positive work environment.

🔄 Adaptability

I strongly believe in the power of adaptability. It's about being open to change and learning to evolve with it. I am willing to constantly update my skills and get ready to tackle new challenges head-on.

🎓 Proactive Learning

I'm a firm believer in continuous learning. It's about staying ahead of the curve, actively seeking new knowledge, and applying it in my work. I can bring fresh ideas to the table and fuel innovation.
