Skills

- **Data Analysis:** Advanced data analysis, statistical modeling, regression analysis, machine learning (familiarity)
- **Programming:** SQL, R, Python
- **Visualization:** Power BI, Tableau, Shiny
- **Tools:** Microsoft Excel, Google Analytics (familiarity), GitHub Copilot AI, Amazon Redshift
- **Other:** Project management, data governance, report and dashboard development, documentation, training

Professional Experience**Consortium for Elections and Political Process Strengthening (CEPPS), Washington, DC**

Data Analytics Advisor June 2023 - February 2025

- Collect, clean, analyze, and visualize data from various sources, including the internal Global Democratic Trends practitioner survey.
- Develop and maintain interactive dashboards using R and Power BI for country context monitoring, programmatic indicator analysis, and organizational activity tracking.
- Provide data analytics guidance and support for program evaluations, ensuring data integrity and accuracy.
- Utilize GitHub Copilot AI for efficient R coding and development of calculated measures in Power BI.

Tuvli, Washington, DC Senior Data Analyst April 2021 - June 2023

- Focused on electoral violence risk forecasting, democracy and governance, and inter-bureau data coordination at the US Department of State.
- Develop and maintain Tableau dashboards for the Instability Monitoring and Analysis Platform (IMAP) portal utilizing Amazon Redshift for initial data queries and R for more advanced data manipulation.
- Conduct data cleaning, manipulation, analysis, visualization, and modeling across multiple projects.
- Support the implementation of the Global Fragility Act (GFA) and collaborate on Monitoring, Evaluation, and Learning (MEL) indicators.

ERPI, Washington, DC Senior Consultant July 2020 - March 2021

- Provided exploratory and predictive data analysis services for the Department of Veterans' Affairs Community Care project.
- Automated data analytics through the use of advanced SQL and some C# programming for the Department's health equipment supply chain in order to improve efficiency and accuracy.

Booz Allen Hamilton, Washington, DC *Senior Consultant* September 2018 - July 2020

- Lead Data Analyst for the United States Air Force and Senior Operations Research Analyst for the Department of Homeland Security's Immigration and Customs Enforcement (ICE).
- Conducted exploratory trend analysis and predictive modeling for quarterly reports and future developments utilizing R and R Shiny.

National Consortium for the Study of Terrorism and Responses to Terrorism (START), University of Maryland, College Park, MD *Senior Faculty Specialist* August 2013 - September 2018

- Member of the Global Terrorism Database (GTD) project team
- Responsible for raw data collection, specific domain variable coding, and quality control

Education

American University, Washington, D.C. *Master of Science* January 2011 - May 2013

University of Virginia, Charlottesville, VA *Bachelor of Arts* August 2005 - May 2009

Awards

- Department of State: Honorable Mention - Data for Diplomacy Award (2022)
- Department of State: Franklin Certificate of Appreciation (2022)

Special Projects

- **Event Data and the Construction of Reality:** Compared automated, manual, and hybrid data collection techniques. Presented findings at an international conference.
- **Lone Actors: Unaffiliated Individual(s) Terrorist Attacks in the United States and Western Europe, 2002-2016:** Analyzed trends in weapons, casualties, and perpetrator ideologies. Presented data at Georgetown University.
- **Too Good to be True? Evaluating the Accuracy of Automated Data Collection:** Compared terrorist attack datasets and developed a standardized coding scheme.
