

TANVI GANDHI

Los Angeles, CA | 213-675-0426 | [linkedin.com/in/Tanvi-Gandhi](https://www.linkedin.com/in/Tanvi-Gandhi) | tanvibhu@usc.edu | github.com/tanvigandhi18

EDUCATION

University of Southern California

August 2023 - May 2025

MS in Electrical & Computer Engineering - Machine Learning & Data Science | CGPA : 3.57

Los Angeles, US

Coursework: Probability and Statistics, Machine Learning, Signal Processing, Cloud Computing, Optimization

MIT World Peace University

July 2017 - May 2021

Bachelor of Technology in Computer Science and Engineering | CGPA: 3.74

Pune, India

Publication: [IOS Press, Recent Trends in Intensive Computing, Dec 2021](#) - Computer vision based app for the blind

PROFESSIONAL EXPERIENCE

Software Engineer

November 2020 - June 2023

Apisero by NTT Data North America

Pune, India

- Designed and deployed **20+ REST APIs** on CloudHub, enhancing data flow and **reducing latency by 40%** using Amazon SQS. **Wall of Fame Award** for leading data integration for a Fortune 500 US bank.
- Optimized data integration** from Snowflake, Salesforce, and legacy systems into a Data Warehouse, cutting deployment errors by 30% with Agile practices and unit testing.
- Automated Jira task creation**, reducing manual effort by 60% using JSON solutions. **Ace Award** for independently designing a solution that improved accuracy and efficiency.

Data Scientist Intern

July 2020 - October 2020

Eatler India Pvt Ltd

Pune, India

- Conducted web scraping on e-commerce platforms to gather data on pricing and market trends, boosting insights
- Performed sentiment analysis on 25,000+ customer reviews and created a data visualization dashboard using Tableau to present actionable insights on customer preferences

PROJECTS

SmartScaler - Image Upscaling using AI

November 2024 - January 2025

- Developed an AI-driven solution to upscale low-resolution images by 4x using the Latent Diffusion Super Resolution model, processing over 5,000 images with 85% accuracy in delivering sharp, artifact-free results.
- Built the backend with Python FastAPI and deployed the solution on AWS EC2 with S3 storage, integrating Pinecone for efficient vector search and CLIP for multi-modal image retrieval, enabling image search via both text and image queries.

Big Data Processing for Sales insights

September 2024 - November 2024

- Designed a scalable Apache Spark pipeline to efficiently process 15GB of transactional records, extracting insights like total consumer expenditure and incentives, with 40% faster processing time compared to previous workflows.
- Used AWS for automated data retrieval, with the pipeline improving reporting accuracy by 30%, reducing query time by 20%

Human Activity Recognition

April 2024 - May 2024

- Developed a machine learning pipeline combining supervised, semi-supervised, and unsupervised approaches to classify human activities from sensor data, achieving 89.99% accuracy through extensive hyperparameter tuning.
- Applied clustering techniques like K-Medoids (Silhouette Score: 0.61) to identify activity patterns and performed feature engineering to improve model performance and interpretability.

Time Series Forecasting

January 2024 - February 2024

- Predicted hourly energy usage with time series data, simulating real-world energy planning needs.
- Used XGBoost with cross-validation and added time-based features, increasing prediction accuracy by 20%

CERTIFICATIONS

- Databricks Associate Developer for Apache Spark 3.0
- Mulesoft Developer Level 1 certified
- Machine Learning, ML (NPTEL), Neural Networks and Deep Learning (DeepLearning.AI Coursera)
- Google Cloud Computing Foundation Course (NPTEL)

SKILLS

Programming & Scripting: Python, C++, JavaScript (NodeJS), SQL, R, Scala, MATLAB, Java, HTML

AI/ML & Data Science: TensorFlow, PyTorch, Scikit-Learn, NumPy, Keras, Hugging Face, LLM Fine-Tuning, Prompt Engineering, Deep Learning, Computer Vision, NLP, RAGs

Cloud & Databases: AWS (S3, EC2, Lambda), GCP (BigQuery), Azure, MySQL, PostgreSQL, MongoDB, SQL Server

Tools & DevOps: Docker, Kubernetes, Jenkins, Git, CI/CD, Flask, NGINX, Kafka, Airflow, LangChain

Visualization & Platforms: Tableau, SAS, Salesforce, Mulesoft

ACTIVITIES

- Student Assistant**, USC Game Development: Assisted professor in running a class of 50+ students.
- Mobalytics Externship:** Analyzed games, player psychology, and strategies; delivered actionable insights through market research and data analysis.
- SheHacks Hackathon Finalist: Created a Telemedicine Portal, **created a chatbot** to answer COVID-19 related queries.
- Presented the "Home Garage Security" project with **automated face and number plate recognition** to 1,000+ attendees
