

# ROHIT SHRESTHA

Dallas, Texas · +18323027850

· [roheitshrestha@gmail.com](mailto:roheitshrestha@gmail.com) · <https://www.linkedin.com/in/rohit-shrestha/>

---

Motivated software developer with 7 years of experience in the industry. Seeking to leverage my skills in full-stack web development and project management to contribute to the success of a dynamic and forward-thinking company.

## PROFESSIONAL SUMMARY

- Experience in working with RESTFUL Web Services and implementing RESTFUL API's.
- Good Understanding of Document Object Model (DOM) and DOM Functions.
- Expertise in developing rich Web UI interfaces using HTML5, CSS, JavaScript, Angular (version 5 or higher) and Bootstrap.
- Hands-on knowledge in using JSON with back-end applications.
- Profound knowledge in Angular concepts like Dependency Injection, Promises, Services, Scopes, Components, Controllers and Directives.
- Experience in Applications using Object Oriented (OO) JavaScript, Angular and JSON.
- Hands-on experience in consuming RESTful service using JavaScript, jQuery and Angular (version 5 and higher).
- Used various Angular custom directives and developed reusable components and templates that can be reused at various places in the application.
- Worked with Angular to develop single page applications, worked with NGRX for managing Angular applications.
- Created Typescript reusable components and services to consume REST API's using Component based architecture provided by Angular.
- Good knowledge in Docker cloud services in the category of deployment.
- Excellent experience in Git source code management and for version control.
- In-depth knowledge of the Angular framework with angular CLI, RxJs.
- Good Understanding of Postman for API testing.
- Good knowledge in debugging and troubleshooting existing code.
- Worked with JIRA for bug-tracking and Confluence for documentation.
- Experience in working with microservices.
- Good knowledge of spring boot applications and other backend applications.
- Experience with unit tests using automated TDD tasks.
- Good understanding of financial sectors and terms.
- Hands on experience in using Jenkins, open shift, docker
- Experience in perform the accessibility testing.
- Involvement in agile development processes including sprint planning daily standup and retrospectives.
- Collaborate with cross-functional teams, including designers, back-end developers, and product managers, to deliver high-quality software solutions.

# Experiences

**MAR 2022 – PRESENT**

**SOFTWARE DEVELOPER**, PNC BANK, PITTSBURG

- Developed and maintained a customer relationship management system using angular 16 in Front end and java in backend.
- Implemented new features and functionality to improve efficiency and user experience.
- Created and executed unit tests to ensure the stability and reliability of the system.
- Collaborated with cross-functional teams, including business analysts, quality assurance, and project managers.
- Assisted in the development and maintenance of wire transfer functionality using Java and Angular 16.
- Worked closely with senior developers to learn best practices and industry standards.
- Contributed to the design and implementation of new features and enhancements.
- Utilized agile development methodologies to deliver high-quality software on tight timelines.
- Contributed to the design and implementation of new features and functionality.
- Assisted with the testing and debugging of applications.
- Improved the performance and reliability of existing systems through code refactoring and optimization.
- Developed and maintained multiple web applications using Angular and a range of related technologies.
- Worked closely with designers and backend developers to ensure seamless integration and functionality.
- Participated in code reviews to ensure compliance with coding standards and best practices
- Used NGRX for app state management.
- Worked with microservices.
- Performing unit testing in the application for smooth operation of the application.
- Involved in designing models and guidelines for developing the application.
- Used a shared module for using different reusable components.
- Used bitbucket for code and version management.
- Used figma for creating UI designs and mockups
- Used confluence for task tracking and Jira for report management
- Writing extensive unit tests using automated TDD tasks.
- Performing accessibility testing for different-able users.
- Experience on leading the project related to payee management.
- Participated in releases and can handle production issues.
- Used Jenkins for CI/CD.
- Knowledge of different environments used in the project.
- Used openshift to deploy, and manage container-based applications.
- Daily standup meeting for exchanging day to day updates with the team.
- Provide knowledge transfer (KT) session and guide junior developers about the project and environment of the company.
- Involvement in agile development processes including sprint planning daily standup and retrospectives.

**Environments** : Angular, JavaScript, Typescript, Spring Boot, Python, REST Web service, jQuery, JSON, Postman, and HTTP, MVC, Bootstrap, GIT, SQL server, HTML5, CSS, SCSS, SASS, SQL, Tomcat Server, Jenkins, Figma, Openshift, Docker

**Environments** : Angular, JavaScript, Typescript, Spring Boot, Python, REST Web service, jQuery, JSON, Postman, and HTTP, MVC, Bootstrap, GIT, SQL server, HTML5, CSS, SCSS, SASS, SQL, Tomcat Server, Jenkins, Figma, Openshift, Docker

**NOV 2017 – FEB 2022**

**FRONT END DEVELOPER-ANGULAR, INFO DEVELOPERS, KATHMANDU**

- Integrated NGRX for state management in Angular framework.
- Developed custom directives and custom tables throughout the application.
- Used various languages for localization.
- Integrated charts such as chart.js, highchart.js pie chart etc. for representation of list of data in Angular.
- Used various third-party packages using CLI in Angular.
- Developed applications for different financial institutions like banks and cooperatives regarding the budget management, fund transfer and payment gateway.
- Implemented auth guard and other various authentications for the strong security of the application.
- Integrated pggrid for custom design of tables.
- Developed client side drop down menus, toggles and search bars using Bootstrap and jQuery.
- Responsible for parsing JSON data to & from the server for presentation & storage purposes in the project.
- Used Local Storage to store & retrieve insensitive user data during transition between the different pages.
- Enhanced and built reusable components across different modules using Custom directives and CSS classes.
- Consumed JSON messages using Angular framework.
- Used validators, converters, jQuery, and JavaScript inbuilt functions in the application for validation.
- Worked Extensively with Angular for creating components, Services, pipes, Directives.
- Used shared module for reduction of the reusable components and modules.
- Used Gitlab and GitHub for code and version management throughout the project.
- Deployed the application in the live and testing server using Jenkins.
- Developed custom validations for the easy and quick validations.
- Used Jenkins for CI/CD Continuous Implementation and Continuous Delivery.
- Followed Agile Rational Unified Process throughout the lifecycle of the project.
- Accessed Restful resources with HTTP protocol, the URL of the resource serves as the resource identifier and GET, PUT, DELETE and POST are the standard operations.
- Responsible for designing and reviewing web structures using Figma and other designing tools, data types and operations with the Application architect team.
- Involved in design and decision making for development of the application.
- Worked on Reusable components and routing to implement navigation between the components using Angular framework.
- Involved in implementing APIs in Angular framework.
- Experience creating custom Angular components and building SPA.
- Involved in designing a fully distributed system with the use of Restful API.
- Worked on many custom modules and widgets using Angular/CSS/HTML and made those cross browsers consistent.
- Collaborated with the Python and Java team for the development and enhancement of Restful APIs.
- Applied Dependency Injection, Inversion of Control, Annotations, and auto-wiring principles to enable scalability and flexibility in applications.
- Used Docker for build and deployment, created tags to tag images.
- Worked with Angular routers, forms, modules, DOM, expressions, controllers, filters, and Http Request.
- Applied Object-Oriented concepts (inheritance, composition, interface, etc.) and design patterns.
- Involved in Agile Scrum Methodology and Test-Driven Development (TDD) for the software development process to produce high quality applications.
- Used Jenkins to build applications, Visual Studio Code as the IDE for application development.
- Deployed it on to the universal control plane, Managed Docker cluster and applications through a single interface.
- Worked closely with other developers, UX designers, business, and systems analysts.

## EDUCATION

■ 2018  
■ **BACHELOR'S IN INFORMATION AND TECHNOLOGY**, LONDON METROPOLITAN UNIVERSITY  
■

## SKILLS

- Strong problem-solving and communication skills
- Experience with agile development methodologies
- Capable in leading the project
- Proficient in Java, Angular, and SQL
- Proficient in using version control systems such as Git
- Proficient in using multiple tools and environments
