

Ron Aldrich
678.755.1556 - ronnieald123@gmail.com

SKILLS

- Database Principles
- Human Computer Interaction
- Project Management Languages
- Python/CSS/HTML
- Information Technology
 - Computer Programming
 - Application Development
- Systems Analysis & Design
- Network Essentials
 - Web Development
 - Programming
- Java Script & React

EDUCATION

Middle Georgia University, Bachelor of Science Information Technology - Class of 2024

Duluth High School - Class of 2017

EXPERIENCE

FedEx Ground - Package Handler - Braselton, GA

2024 - Present

- **Managed package sorting, loading, and unloading operations** in a fast-paced logistics environment, ensuring timely and accurate delivery by maintaining **efficiency, attention to detail**, and adherence to safety protocols.

Cox - Software Engineer Intern - Doraville, GA

2024

- **Enhanced application performance and reliability** by assisting in the design and development of **maintenance frameworks** for web-based applications, utilizing industry best practices to identify and resolve performance bottlenecks.
- **Contributed to the development of industry-leading products**, leveraging **modern technologies** and **scalable architecture** to deliver innovative solutions that meet business and technical requirements.
- **Improved code quality and maintainability** through active participation in **code reviews**, providing actionable feedback and fostering collaboration with cross-functional teams, including **Senior Engineers**, to uphold high coding standards.

National Software Management - Junior Python Developer Intern - Atlanta, GA

2023

- **Designed, implemented, and maintained Python-based applications**, ensuring scalability, performance, and maintainability by applying best practices and efficient code architecture.
- **Developed and optimized back-end components, APIs, and data pipelines** using Python frameworks (e.g., Flask, Django), improving data flow and system integration.
- **Collaborated in code reviews and troubleshooting sessions**, executing **unit tests** to ensure code quality, identify performance bottlenecks, and continuously refactor existing code for optimization.

Middle Georgia University - Helpdesk Intern - Macon, GA

2017-2019

- **Provided end-user technical support** by diagnosing and resolving hardware, software, and network issues, including **printer setups, password resets, and software installations**, while assisting with the installation, configuration, and updates of software applications on workstations.
