

Rashonda D. Ogletree

rasogltra@gmail.com • 757-266-7304 • Fairfax, VA 22031 • <http://linkedin.com/in/rashonda-ogletree-0b92784a>

QUALIFICATIONS SUMMARY:

- Developed computational tools to optimize and enhance various data products to boost analysis and decision-making.
- Advanced skills in Python and Perl, shell scripting (Bash) and OOP (Java).
- Expert in SQL for data mining and data manipulation.
- Expert in managing and interpreting large structured and unstructured datasets.
- Experienced with developing and maintaining ETL processes for integration using SQL and PySpark SQL
- Proficient in creating Tableau dashboards and reports to communicate findings to business stakeholders.
- Knowledgeable in conceptual data modeling and designing database schemas.
- Advanced skills in Excel for data analysis, including pivot tables, VLOOKUP and complex formulas.
- Proficient in cloud platform services including Azure, AWS, Google Cloud.
- Working knowledge of data warehousing concepts including Snowflake, BigQuery, SQL Management Studio.
- Strong communicator in team-based projects; worked with cross functional teams to understand business requirements.
- Adapted to evolving project requirements and new technologies, ensuring successful project delivery.

TECHNICAL SKILLS:

Languages: Python, Perl, Java, SQL and Bash Shell Scripting, R

Development Tools: SQL Management Studio, Git, Tableau, Jupyter Notebook, Airflow, Visual Studio, Alteryx, Git CI/CD

Databases: Microsoft SQL Server/T-SQL, PostgreSQL and MySQL, MongoDB, database design

Software/API: PySpark, Pandas, ServiceNow, VisualCron, Windows Task Scheduler, HP Service Management

Cloud Platforms: Azure (Databricks, ADLS Gen2), AWS (Glue, S3)

Data Techniques: Exploratory Data Analysis (EDA), data visualization, ETL processes, statistical analysis, data modeling

PROFESSIONAL EXPERIENCE:

CACI, Washington, D.C. - Data Systems Analyst - JANUARY 2022 - PRESENT | Hybrid

- Proposed and implemented solutions to identify anomalies in large datasets by transforming data into actionable insights through SQL, Python, Excel and statistics, communicated results to attorneys investigating fraud and money laundering.
- Balanced user requirements, internal team discussions, implementing analyses and project objectives to meet case deadlines.
- Proactively led the planning, development and analysis of projects as lead analyst and project case coordinator.
- Prepared analyses for configuration and design in Tableau for dashboard visualization, data processing and reporting.
- Partnered directly with ETL developers to accomplish specific data processing, needed to adhere to case requirements.
- Aggregated on 2GB of COVID-19 insurance-related data to data summarize, support analysis and optimize query performances.
- Implemented a conceptual data model that visualized entity relationships for a civil rights case to enhance user usability.
- Utilized Jira to document daily stand-ups, track project benchmarks, code development and consultation meetings.

Quest Diagnostics, Chantilly, Va - Software Engineer II- MAY 2016 - DECEMBER 2021 | On-Site

- Developed, maintained, optimized data pipelines for clinical analysis using SQL, Perl, Python, Git, and Docker, and Visual Cron.
- Designed and maintained complex queries on infectious disease datasets, to address post-production issues in NGS applications.
- Generated weekly SQL ad-hoc reports using LIMS, presenting statistical trends to medical directors and technicians.
- Diagnosed and quickly resolved software data inconsistencies, including Java web applications, Perl scripts and Python scripts.
- Prepared design specifications, SLA documentation and unit testing plans according to coding and quality standards.
- Collaborated with Business Analysts and QA partners in Agile environments to refine data software solutions.

United Network for Organ Sharing, Richmond, Va - Data Quality Analyst - JUNE 2014 - APRIL 2016 | On-Site

- Used SQL to clean, identify and analyze data quality issues in organ transplant records.
- Used data governance principles to ensure compliance and maintain data quality standards.
- Conducted independent data analysis to improve submission reports to SRTR, presented insights in Tableau.
- Improved a record linkage system to compile chronological sequences of over 3 million transplant events using R scripts; presented results to various analysts and academic professionals.

COURSES & TRAINING: AZURE DATABRICKS & SPARK FOR DATA ENGINEERS (PYSPARK & SQL) - Udemy.com

EDUCATION: Master of Science in Bioinformatics- Virginia Commonwealth University | Richmond, VA | Graduated May 2016

Bachelor of Science in Bioinformatics- Virginia Commonwealth University | Richmond, VA | Graduated 2012
