PROFESSIONAL SUMMARY

- **4X Salesforce Certified** professional with around 12+ years of progressive experience in CRM applications development and administration using Salesforce Platform.
- Certified Salesforce Administrator and Salesforce Developer and CPQ Specialist.
- Proficient in working across various SFDC Implementations including Sales Cloud, Service Cloud, and Chatter & App - Exchange Applications.
- Proven experience in creating Custom Objects, Custom Fields, Roles, Profiles, Email Services, Page Layouts, Workflow Alerts and Actions, and Approval Workflow for Automated Alerts, Field Updates and Outbound Messages according to the business requirements.
- Profound experience in creating pick lists, multi-Pick lists, Lookups, Master-detail relationships, data insertion and retrieving, Validation and Formula fields to the different types of custom objects.
- Worked on Salesforce SOQL and SOSL query language to analyse data and get records set into Apex Class.
- Knowledge on CRM business processes like Forecasting, Campaign Management, Lead Management, Order Management, Account Management, and Case Management, SOAP, and REST based web services.
- Administration, Installation & Deployment of Salesforce 3rd party Apps, including Salesforce Lightning and Integration with social media and other web-based applications.
- Designed and customized dynamic Lightning Email Templates (LTE) using Salesforce Lightning Template Editor to enhance automated communications in workflows and case responses across Sales and Service Cloud.
- Having CRM domain knowledge and experience with Salesforce CRM and its technologies.
- Experience in interacting with all levels of customer and Sales Force management.
- Having knowledge on front-end web tier (HTML, DHTML, CSS, and cross-browser development) and back end (Java, .NET, SQL) software development.
- Experience in Sales force development including Apex Classes / Controllers, Visual force, Apex Triggers, Scheduler and Batch Processes and used Sales force API, server-to-server web services (SOAP).
- Worked with command line interface, import wizard to migrate the data from Oracle database, also used Apex Data Loader to perform the DML operations by using CSV

files.

- Implemented and configured Salesforce CTI adapters to enable seamless integration between Salesforce Service Cloud and telephony systems, improving agent productivity and first-call resolution rates.
 - Integrated Single Sign-On (SSO) using SAML/OAuth protocols with identity providers like Okta and Azure AD, enabling secure and streamlined login experiences across Salesforce and third-party apps.
 - Collaborated with IT and security teams to design, test, and deploy CTI and SSO solutions, ensuring compliance with organizational security standards and enhancing user access control.
-
- Experienced in creating the Lightning components and Lightning Applications.
 - Designed and customized dynamic Lightning Email Templates (LTE) using Salesforce Lightning Template Editor to enhance automated communications in workflows and case responses across Sales and Service Cloud.
 - Installed Salesforce AppExchange Apps, configured and maintained user security permissions in compliance with organizational needs.

- Experience in implementing Web-to-Case, Email-to-Case to generate cases for Case objects.
- Good implementation skills on Salesforce Vlocity Manage Package and Salesforce Communities.
- Used Data Raptors from Vlocity to perform ETL operations on extracting the data from the Salesforce.
- Good Knowledge on implementing Price Rules, Constraint Rules, Categories, Price list, Quote Creation and few more complex pricings functionalities using Vlocity.
- Expertise in Vlocity application modules like Insurance, Communications.
- Experience in different work environments included, Development, Test, UAT and Production.
- Experienced in Tableau integration and reporting, with a focus on creating custom dashboards and visualizations to help businesses make data-driven decisions. Strong problem-solving skills and ability to work in a team environment.

Certifications:

- Certified Administrator and Certified Advanced Administrator
- Certified Developer
- Certified Service Cloud Consultant
- Certified AI Associates

TECHNICALSKILLS:

Salesforce Platform	Force.com, Visualforce (Page, Components, and Controllers), Salesforce CRM, Salesforce Automation, Apex Classes, Apex triggers, Apex Web Services, Lightning UI, S-Control, SOQL, SOSL, AJAX, Workflow & Approvals, Analytic snapshots, Reports, Apttus CLM and CPQ, Dashboards and Custom Objects, Eclipse IDE Plug-in.
CRM Applications	Sales Cloud, Service Cloud, Custom Cloud, Chatter, Product Offering, Reporting, Analytics of sales and services.
Programming	Apex, Triggers, C, C++, Java
Web Technologies	Java, C, XML, HTML5, SQL, Java Scripts, HTML, AJAX, Web logic.
Database	Oracle 8i/9i/10g, MS SQL Server 200/2005, MySQL, MS Access 2007/2000.
Sales Tools	Force Eclipse, Force.com Eclipse IDE Plug-in, Force.com Explorer, Change Sets, Force.com Data Loader, Force.com, Excel Connector, Ant Migration.
Operating systems	Microsoft Windows (2000/XP/Vista), Linux Ubuntu 11.10, Apache Mac, iOS, Android
Other tools	Visio, Clear Quest, Clear case, MS Project, Eclipse.

PROFESSIONAL EXPERIENCE:**Client: EmeraldX****July 2019 to Till Date****Role: Senior Salesforce Developer / Administrator****Responsibilities:**

- Involved in Direct discussions with the Business users to gather the requirements and provided input for the design from Technical Standpoint.
- Participated in the identification, understanding, and documentation of business requirements, keeping in mind the need for the application based on the project scope and SDLC methodology.
- Worked on Agile methodology.
- Designed, Implemented and deployed the Custom objects, Page layouts, Custom tabs and Components.
- Created Reports and Dashboards to track Opportunity pipeline/Stages for Management visibility
- Implemented Security and Sharing rules at object, field, and record level for different users at different levels of organization.
- Designed various Web Pages in Visual force for capturing various customer enquiries and Implemented logic for migrating cases to different queues based on the type of customer enquiry.
- Integrated the application within house legacy systems using REST API Web services
- Developed Visual force Pages, Apex Classes, Apex Triggers, Apex Controllers (standard, custom and extension), schedulable Apex classes, and Batch Apex to meet various functional needs in the application and schema builder for development.
- Performed unit testing, integration testing, bulk testing, staging and User Acceptance Test in full copy Sandbox.
- Customized existing Visual force to align with Salesforce new Lightning UI experience.
- Implemented and configured Salesforce CTI adapters to enable seamless integration between Salesforce Service Cloud and telephony systems, improving agent productivity and first-call resolution rates.
- Integrated Single Sign-On (SSO) using SAML/OAuth protocols with identity providers like Okta and Azure AD, enabling secure and streamlined login experiences across Salesforce and third-party apps.
- Collaborated with IT and security teams to design, test, and deploy CTI and SSO solutions, ensuring compliance with organizational security standards and enhancing user access control.
-
- Upgraded some Apps from Salesforce Classic to Lightning Experience to develop rich user interface and better interaction of pages.
- Worked on Salesforce1 Platform to build Mobile App by enabling Lightning Components for use in Salesforce1 mobile platform to make Lightning Application mobile.
- Performed unit testing, integration testing, bulk testing, staging and User Acceptance Test in full copy Sandbox.
- Worked on various Custom Objects, Tabs, validation rules, formula fields.
- Worked on various Salesforce Standard & Custom Objects, Triggers, Classes, Pages, Report Types, Reports and Dashboards & Lightning Application in Sales Cloud and Service Cloud.

- Managed and deployed Salesforce.com CRM solution to multiple departments within the organization.
- Performed data clean-up and/or Data migration to/from salesforce.com.
- Designed and deployed Custom tabs, validation rules, Approval Processes and Auto-Response for automating business logic.

- Created workflow rules and defined related tasks, email alerts, and field updates.
- Created and maintained the documentation for Design, Migration and Integration.
- Developed Apex Classes and Triggers to manage workflows and implemented them in the system.
- Designed, implemented, and deployed Custom objects, Page layouts, and Custom tabs to meet application requirements.
- Successfully designed and deployed campaigns using Salesforce, resulting in improved lead generation and conversion rates.
- Utilized Salesforce's campaign management capabilities to effectively track and analyse campaign performance, enabling data-driven decision-making and optimizing marketing strategies.
- Prepared documentation on Custom Apps and Objects.

Environment: Salesforce platform, Service cloud, Apex, Salesforce communities, Sales Cloud, Marketing Cloud, Visual Force Pages, Component Controllers, Data Loader, HTML, Security Controls, Force.com Eclipse IDE, Data Loader.

Client: HMSA/ Eworld Enterprise solutions, Hawaii **Dec 2013 to June 2019**

Role: Salesforce Integration Developer

Responsibilities:

- Involved in Direct discussions with the Business users to gather the requirements and provided input for the design from Technical Standpoint.
- Created Workflow Rules, Approval Process, Validation Rules, Tasks, Email Alerts, Field updates and Outbound messages to manage the Workflow and Approvals.
- Worked on Aura based components, Attributes, controllers which can be compatible to access through Lightning App builder.
- Developed Visualforce Pages to include extra functionality and wrote Apex Classes to provide functionality to the visual pages.
- Developed UI/UX changes for better user interface using Salesforce Lightning Design system Administered Salesforce by mapping and loading data into Salesforce, building and managing dashboards, views, and reports, and designing and developing workflows and assignment rules to automate manual processes, managing Users, profiles, permissions.
- Worked on various salesforce.com standard objects like Accounts, Contacts, Leads, Campaigns, Opportunities, Quotes, Activities, Dashboards and Reports.
- Used Data Loader for insert, update, and bulk import or export of data from Salesforce.com objects. Used it to read, extract, and load data from CSV files.
- Customized page layouts for Opportunity, Contacts, and Accounts depending upon user roles, and groups.
- Deploying Apex using Force.com IDE, Force.com Migration Tool and Web Services API.
- Created modern Enterprise Lightning Apps combining Salesforce Lightning Design System (SLDS), Lightning App Builder and Lightning Component features. Created

multiple Lightning Components, added CSS, HTML and Design Parameters that makes the Lightning component look and feel better.

- Created and enhanced Batch Apex, Schedule Apex, Queueable Apex and Future Methods.
- Developed complex to highly complex software code to meet solution requirements and design specifications for assigned applications.
- Worked on Velocity Calculation matrices, procedures to configure the medical, dental rating tables.
- Worked on enhancing the current look and feel of the UI by applying latest velocity templates.
- Configured Calculation matrices in velocity to load the input data that is used for calculations
- Provided ongoing salesforce.com maintenance and administration services including periodic data cleansing, custom objects, Standard Objects (Accounts, Contacts, Opportunities, Cases, Leads).
- Created Lookup, Master Detail, many-to-many (junction objects) and enabled various processes like Validation Rules, Field Dependencies, Custom Formula Fields, Workflows, pick list, Field Updates, Email Generation, Process Builders, Flows and Approval Processes for automated alerts.
- Integrated Salesforce Communities with external systems and databases to provide a unified experience for end-users and implement branding elements, including logos, colors, and themes, for a consistent and professional appearance.
- Prepared various test cases to test the functionality of the code in accordance to the governor's limits.
- Developed a Salesforce community application for the end user using modern Lightning Web Components achieving greater performance along with using the latest ES6 JavaScript features.
- Translator stakeholder requirement into different tangible deliverables such as functional specification, user cases, user stories, workflow/process diagram, data flow/data model diagrams
- Wrote SOSL and SOQL queries with consideration to Governor Limits to export bulk data and data modifications.
- Design and Develop customer solution in Visualforce, Apex, CSS, JavaScript, and other technologies.
- Performed inbound, outbound integration with external systems using REST, SOAP Web services API and JSON Serialization and Deserializations.
- Involved in creating Apex Class and Visual Force pages for RFP (Request for Proposal) and CPQ (Configure, Price and Quote) as per the business.
- Performed administrative tasks such as managing Accounts, Contacts and Cases, setting workflows and approval process for approving new accounts.

Environment: Salesforce.com, Vlocity platform, Apex Language, Visual Force (Pages, Component & Controllers), Pages, Data Loader, HTML, Java Script, Workflow & Approvals, Reports, Custom Objects, Lightning, Custom Tabs, Email Services, Security Controls, Sandbox data loading, Eclipse IDE Plug-in, Ant tool, Windows XP.

Education Details:

- Anna University, Chennai: Bachelor's in economics – 2000
- Southern Illinois University: Master's in criminology - 2004
