Email - rajendrasagarusa@gmail.com

With 16 years' experience in data modeling, Data Integrations (ETL), Data Quality, Master Data Management, BI- Standard and self-service reporting and data visualizations in agile way of working evolving myself in Cloud transformations and migration to Cloud native data solutions.

- **Cloud data analyst** at Metro GmbH, Frankfurt, Germany - 10th July 2020 to 31 Jan 2025.
- **Data Engineering Specialist** at Watzmann Consulting, Frankfurt -01 Feb 2020 till 30 April 2020.
- **ETL Consultant** at Capgemini India Pvt Ltd in Hyderabad, IN - 04 May 2015 till 29th Dec 2019.
- **ETL Member Technical** at ADP India Private Ltd in Hyd, IN from 20th Dec 2012 till 04 May 2015.
- **Senior Software Engineer** Accenture Services Hyd, India from 16th April 2008 till 19th Dec 2012.
- Trained and worked in **IT Campus Connect** from Infosys and Govt - 29 Oct 2007 till 14 april 2008.

BI Tools worked with:

- Informatica Power Center 9.x 10.x, Cloud Data Integration and CAI, IDMC, IDQ, MDM
- Big Query, Snowflake, Synapse Analytics, Postgress, Teradata, ORACLE, SQL Server, DB2
- Azure - Fabric, ADF, Synapse Analytics, data build tool, SQL, Shell scripting, Airflow, GIT
- Visualization - Power BI, QlikView, ThoughtSpot, Microstrategy.
- Cloud Platforms - Google Cloud Platform and Azure certified
- Data Modeling: Medallion and Data Vault strategies, ERWIN

Professional Certifications:

- Cloud Certified in GCP - Cloud digital Leader, Azure DP 900, and AZ 900 for the Cloud computing data handling routine to apply at work.
- Google Cloud Skill boost courses and MS Azure learn Courses and certification.
- Certified as Professional Informatica developer from Informatica Corporation.
- Certified in INS 21 (Property and Casualty Insurance) AICPCU and (IIA).
- Professional Memberships: Informatica Community, tdwi, dbtlabs, databricks, GCP, Oracle Community, AICPCU membership.

Education:

- **Master of Technology** in Engineering with JNTU, Hyderabad, India, November 2013.
- **Bachelor of Technology** in Engineering with JNTU, Hyderabad, India, May 2007.

Latest Project: Cloud Transformation: Enterprise DWH from Jan 2021 till date.

Cloud transformation project for existing data warehouse to rehost the data and ETL workloads from Teradata into Google Big Query. This included migrating data and rewriting the code for ETL pipelines data integration for various data sources. EDW project provides warehouse data consolidated to the Business Users in for generating dossiers and scorecard in Microstrategy. Data warehouse implementation with standard and cross-country reporting for retail clients includes data integration that implements customized visualization requirements to the Business Users in one centralized MDW integrating data from different business source systems.

Roles & Responsibility:

Tools Used: Big Query, dbt, Power BI, MSI, GCP, Teradata, Snowflake

- Working to rehost DWH workloads from Teradata On-Prem to Google Cloud, includes code/data migration to Cloud and extension for Legacy DWH Solutions.
- Lift and shift for design and implementation of dbt based data ingestion into Data-lake (Cloud Storage), batch data transformation and model data access layer with metadata management and right data lineage practices.
- Working for data quality checks and business rules/standards, create/publish Big Query models.
- Implement and assist ETL dags for orchestration and dependency management.
- Create and extend attributes and measures required for Power BI and MSI reports for the BI domain, work with prescriptive visualizations to answer critical business trends.

Project : CRM BI Data Integration Telecom Major - IT Specialist (Jan 2020 till Jan 2021)

The project is BI transformation project for CRM and Sales at the Telecom major includes data integration for various data sources, data model design with it enables ease of use, maintenance and reporting which significantly reports I am responsible for creation of Data Mockups and Visualizations, Data Quality checks/standards, Data Modelling and ETL - High Level Design and Low level design working with ERWIN data modeling for the Business to Technical modelling. This project provides customized warehouse requirements to the Business Users in one centralized Data Repository integrating data from different business source systems.

Roles & Responsibility:

Tools Used: Informatica PC, IDQ, Teradata, Azure ADF, Azure, Oracle, Unix, ERWIN

- Informatica Power Center - ETL mapping development in Communication data model , Creation of Data Mockups, Data Quality checks/standards, Data Modelling and ETL - High Level Design and Low level design required for the Telecom Giant.
- Working with ERWIN data modeling for the Business to Technical modeling.
- Model and visualize the metrics implementated of CRM and Sales data model and report dashboards with QlikView Visualizations.
- Qlikview development for intercatve and selfservice reports, filters, prompts and dashboards - CRM models and BI dashboards.
- Agile Release train, Scrum backlog grooming and rituals been practiced.

Project: Workday Data Integration Senior Consultant (Feb 2017 till Dec 2019)

The project aims at data integration for various data sources for a HCM client, involving database design with raw data vault for the ODS layer, business data vault for the EDW layer with designs flow for effective ETL development and change management, I work with DW Development team to implement data strategies, build data flows, and develop conceptual and physical data models for hubs, satellites, and links. This solution will streamline many subject areas like HR, Benefits, Pensions and allowances to employees.

Roles & Responsibility:

Tools Used: Informatica PC, IDQ, Oracle, IFRS, Unix, SAP

- Collaborates with a cross-functional team in support of business case development and identifying modeling method(s) to provide business solutions.
- Work with the DW Development team to implement data strategies, build data flows and develop conceptual and physical data models for hubs, satellites and links.
- Work with development and data architects to provide an overall solution for the hubs, satellites and links.
- Worked for High Level design documents for data flows from Extract to Staging, Staging to Complement and C table to SAP system.

Project : ACES Reporting (Insurance domain) - Senior Consultant May 2015 till Feb 2017

The project is implementing Guidewire Insurance Suite for a Canadian Government (Workers Compensation) with DataHub and InfoCenter involving ETL design, development and change management, product OOTB extensions and post production support. This solution will streamline business operations in the areas of Claims activities under Workers Compensation claims processing. DataHub and InfoCenter will serve to provide analytics over business areas of the Claims processing.

Roles & Responsibility:

- Data Hub and InfoCenter related ETL design, development and change management for the Guidewire Claim Center. Also involved in source data validations for ETL implementation of various data models and table/column customization.
- Creation of design documents for data flows from Extract to Staging, Staging to datahub, datahub to Infocenter tables for the major data models.
- Involve in Design, Code Build, Test, Code deploy and maintenance and implement all required business validations and calculations.
- Involve in ETL Unit Testing, SIT Testing, Performance Testing, Break fix, defect fix and Regression Testing on the developed modules.

Project : ADP BI Analytics (USA) Senior Member technical from Dec 2012 till May 2015

BI Analytics project is aimed at having data integration, data mashups, data consolidation and metric reporting for inhouse business clients. This project provides customized warehouse requirements to the Business Users in one centralized Data Repository integrating data from different business source systems of the HCM domain, it enables ease of use, maintenance and reporting which significantly reports both the Operational and analytical HCM metrics for Top

level management of the respective clients.

Roles & Responsibility:

- Get involved in Source data validations for data elements extracted for ETL implementation.
- Creation of High-Level Design and Low level design documents for data flows from Extract to Staging, Staging to dimension and Fact table creation process.
- Owner of Design, Build, Test (Deploy - TBD) of Mappings, Sessions, Reusable Objects, Workflows to extract data from.
- Extracts and populates onto Data repositories with all required business validations and calculations. (From Source- Staging - Target).

USS Data Marts (Resource's domain) (USA) Senior Software Engineer Jan 2011 till Dec 2012

Work orders and Pricing project is implementing an ERP system, Oracle e-Business Suite, to streamline production and business operations in the areas of Manufacturing, Accounting, and Human Resources, Procurement and Order to Cash. The current will serve to provide broad-based analytics over multiple business areas: pricing, orders, shipping, and invoicing.

Roles & Responsibility:

- Involve in Design, Build, Test, Deploy of Asset, Work order Mappings, Workflows to extract data from EBS tables and implement all required business validations and calculations. (From Source- Staging - Target).
- Involved in RPD development and creation of basic reports, filters, prompts and dashboards.

ENABLE INTERFACES Senior Software Engineer Apr 2008 till Dec 2010

The project aims to extract and materialize critical business data from the existing legacy systems and newly developed SAP systems and other vendor databases. The project will provide robust reporting capabilities and data storage for consumers to retrieve current and historical Oil sales and production.

Roles & Responsibility:

- Plan and implement the designs in build, Test phases (Deploy - TBD) of Mappings, Workflows to extract data from.
- Extracts and populates onto Data repositories with all required business validations and calculations. (From Source- Staging -Intermediate - Target).
- Responsible for work effort estimation, the detailed task plan and assigning tasks to members and conducting peer reviews and code reviews.
- Reviews functional specifications, data mapping specs, and internal designs to ensure that they are complete and according to the development standards.

Assets and Personal Interests:

1. Possess good domain knowledge on Insurance domain, Capital Marketing, Energy (Oil and Gas) and Resources (products) and HR products.
2. Vendor Certified in Property and Casualty Insurance domain from AICPCU
3. Strong in analyzing data requirements and data profiling.
4. Ability to learn quickly and take up new tasks and responsibilities.
5. Great interest towards working in teams with good dedication.

CSR Initiatives:

- Worked with Mahita Foundation for Education to Street Children at Mehdipatnam.
- Active participation in the Centre for Environment Education mission at Necklace Road.
- Organizing and working with “Project team for Srividya” which is funded and organized by ADP.

Technical Participations and Interests:

- Bagged Q2 - Top Gun (Individual) and Best Software development Team award at ADP.
- Awarded twice as People developer for best Informatica training's score at Accenture Learning and Knowledge Management.
- Won Energizer, Team building - PD and Value Creator awards for TGIF events at Accenture.
- Submitted 5 Ideas and 2 white papers on DW topics for Idea space at Accenture.
- Active participation in Webinars on DW/BI platform at current organization and TDWI.
- Played an active role in winning Technical Quizzes, organizing Technical Fest's and Working Model Exhibition in graduation.
- Secured persistent aggregates in core technical subjects and projects.
- Participated in the Coding and Decoding Contest during “ZAVTRA-08” and “SRUJANA-07”.
