

PROFESSIONAL SUMMARY:

- Facilitated communication between technical and business resources, translating business needs into precise specifications.
- Fostered relationships with stakeholders through active listening, addressing business challenges, and supporting colleagues.
- Led sessions to extract ideas from business partners, understand their challenges and promote collaborative participation.
- Familiarity with working with different storage solutions for collecting and analyzing data.
- Generated innovative concepts to inspire new use cases, collaborating with colleagues on future solutions and services.
- Influenced and engaged stakeholders through compelling storytelling and persuasive narratives aligned with Client objectives.
- Navigated and addressed the diverse needs of multiple stakeholders.
- Delivered compelling oral presentations and public speaking engagements, and produced high-impact written documentation, briefing reports, correspondence, and PowerPoint presentations.
- Conducted thorough research and brain storming sessions on issues and products.
- Contributed actively to multiple projects as both a team member and occasionally as a project leader.
- Hands on experience in building data warehouse by using SQL, Postgre SQL.

PROFESSIONAL EXPERIENCE:

State of Illinois (Dept. of Children and Family Services) IL	
Role: Sr. Business Analyst	Oct 2023 – Dec 2024

Project: The project consists of three phases. The first two phases involve onboarding new employees and offboarding, both designed for the HR team using Jira software. The third phase focuses on developing a new IT helpdesk for the entire DCFS team using Jira Service Management.

- Leading the BAs to provide world-class support to customers, utilizing in-depth knowledge of customer priorities and initiatives to maintain a customer satisfaction rating of 95%.
- Identified gaps, generated potential opportunities, and collaborated with key stakeholders to increase revenue by 10%.
- Working on multiple projects parallelly coordinating with 10+ department managers for gathering requirements, writing user stories, Testing, and moving to the UAT.
- Interfaced directly with customers to coordinate project activities and support issues, resulting in a reduction of SLA for all levels of workflows by 4.5%.
- Supporting and providing assistance, troubleshooting, and resolving issues related to digital workflows, IT processes, computer hardware, and software systems.
- Constructed and reviewed design, functional, technical, and process documentation for 3 projects, ensuring compliance and efficiency which is useful for training purposes.
- Directed focus on data collection and analysis of specific issues with internal teams, leading to a 15% increase in productivity through process improvement initiatives.

SWIFT VA	
Role: Business Analyst	Aug 2022 – Sep 2023

Project: vRA Usage Analytics is a Self-Service Portal Usage Analytics by analyzes usage patterns and user behavior in the vRA self-service portal.

- Conducted comprehensive analysis of business processes and requirements, resulting in the identification of 20 areas for improvement and optimization, leading to a 30% increase in operational efficiency.
- Collaborated with cross-functional teams to develop and implement solutions, resulting in a 25% improvement in productivity and a 15% reduction in project timelines.
- Facilitated communication between stakeholders, ensuring alignment on project goals and objectives, which led to a 20% increase in project success rate.
- Utilized data analysis techniques to identify trends and patterns, providing insights for informed decision-making, resulting in a 10% increase in revenue.
- Played a role in evaluating the total cost of ownership (TCO) and ROI of on-premises storage solutions compared to cloud alternatives.
- Used postman (Get call, POST call, DELETE call) for extracting, manipulating and deleting the data.
- Used Amazon Redshift for data warehousing and QuickSight for business intelligence.
- Prepared and presented reports to management, summarizing findings and recommending strategies for business growth, resulting in a 15% increase in market share within six months.
- Built the dashboard in Tableau Desktop and published it on Tableau Server. Held 20+ UAT sessions and delivered training to 80+ users.
- Collaborated with IT teams to establish governance frameworks and data management policies for on-premises storage. This includes defining access controls, data retention policies, and audit trails to ensure data integrity and compliance with internal policies.

Project: The primary goal of this project is to implement and optimize a Human Resource Information System (HRIS) to streamline HR processes, enhance data accuracy, and improve reporting capabilities. The project aims to provide a centralized system for managing employee data, automating HR workflows, and generating actionable insights for strategic decision-making. Implementing the Jira Service Management for issue tracking in a contact center.

- Administered enterprise analysis and reporting, accessing and gathering data from disparate sources and consolidating it into meaningful reports, resulting in a cost reduction of 4% in recruiting and 2% in engagement.
- Orchestrated collaboration with the wider analyst community to develop a set of performance metrics, enabling managers to enact and benchmark their people management duties, leading to a 20% increase in employee satisfaction and retention. 6% time reduction in the contact center operations.
- Spearheaded team activities from end-to-end across the organization, resulting in a 30% improvement in onboarding efficiency and a 25% reduction in turnover rate.
- Analyzed program policies, procedures, and processes to assess their impact on business systems and functional areas, leading to optimized workflows and increased efficiency in the contact center.
- Collaborated with program area staff to solicit, analyze, and document business processes and requirements, ensuring alignment with organizational objectives and policies along with audit procedures.
- Acted as a liaison between state staff and vendors, translating operational and business requirements into actionable deliverables for successful project execution.
- Developed and maintained user stories with acceptance criteria based on Agile methodology, facilitating clear communication of business needs to technical teams.

Project: Collaborated within the Supply Chain Reporting team at an agricultural business, focusing on the development of Tableau dashboards to visualize comprehensive supply and delivery data across the entire system. Orchestrated the integration of consumables tracking into these dashboards, pinpointing areas of shortfall and critical testing needs. Generated actionable insights by forecasting supply depletion timelines utilizing a jointly developed predictive model, enhancing decision-making efficiency.

- Created use case scenarios, test plans, and exit criteria, ensuring comprehensive coverage of business requirements during system testing phases.
- Managed project schedules and deliverables, ensuring timely completion and adherence to established timelines.
- Identified project risks and issues, developing effective mitigation strategies to minimize potential disruptions.
- Executed test cases using formal testing tools, tracking and reporting testing status to stakeholders.
- Assisted in analyzing system and data deliverables to ensure business and technical requirements were met, contributing to successful project outcomes.
- Developed and maintained business user test scenarios, enhancing the quality of systems and user acceptance testing processes.
- Documented action items, business decisions, and project status updates to support effective project management and decision-making.

Project: Upskill operators by one level through targeted focus and guidance, facilitated by senior supervisors.

- Process:
 - Observing & updating the review tracker
 - Preparing GAP ANALYSIS
 - Assigning OJT along with TRAINER
 - Supervision on IMPLEMENTATION

Education

- Masters in Business Analytics from University of New Haven: 2021-2022
- PGDM in HR and Operations from ISME Business School: 2016-2018

Skills

- **Scripting:** Python, R, JS (Certified)
 - **Databases:** SQL (Certified)
 - **Visualisation:** Tableau, PowerBi (Certified)
 - **Agile Scrum Master** (Certified)
 - **Salesforce**
 - **Lean Six Sigma Green Belt** (Certified)
- **Jira**
 - **Jira Service Management**
 - **Confluence**
 - **Google Analytics**
 - **HRIS**
 - **Service-now**

Certifications

- Certificate in **Lean Six Sigma Green Belt** by KPMG
- Intermediate-level certification in **Python**
- Intermediate-level certification in **R Software**
- Basic level certificate as **Agile Scrum Master**
- Certifications in **Tableau** and **PowerBi**
- **PMP** certification
