

**Professional Summary**

- More than 19 years of experience in I.T industry and Oracle Database Administration
- Expertise in managing and leading technical teams to support 24x7 global production environments, excellent technical and interpersonal Skills
- Expertise in Golden Gate. Installation, Uni/Bidirectional replication setup and troubleshooting
- Proficient in Oracle Dataguard (Active, Physical, Snapshot Dataguard)
- Expertise in migrating On premise Oracle/Exadata databases to cloud using Golden Gate, Dataguard etc
- Expertise in Oracle Cloud /Exadata cloud administration
- Proficient in supporting BCP/DR Exercises
- Experienced in database Installation, Administration, Monitoring, Performance Tuning, Backup and Recovery using RMAN
- Adept in multi-node RAC database environments
- Experienced in OUD configuration and set up connections for Active Dataguard environment for read only users
- Adept in TDE – Tablespace encryption
- Experienced in configuring Global read only users using EUS and wallet
- Sound experience in database upgrades from lower versions to 10g, 11g ,12c,19c, Exadata
- Expertise in moving databases across different platforms like AIX, Unix ,Linux
- Sound experience in High Availability and Disaster Recovery design, implementation, and maintenance.
- Proficient in managing PeopleSoft development & production environment on Oracle 9i ,10g and 11g running on HP-UX , LINUX
- Sound experience on SQL, PL/SQL and Unix Shell scripting
- Experience in Performance Tuning using AWR, ADDM ,OEM ,Hang Analysis etc
- Sound experience in onsite-offshore Model
- Strong analytical skills
- Excellent team player and proven track record working in various team sizes.
- Strong management experience along with teamwork building and excellent communication skills.

- Excellent problem solving and analytical skills.

Technical Skills**Databases**

Oracle 8i/ 9i/10G/11G,12c,19c, Oracle Cloud ,Exadata ,Golden Gate ,Cassandra ,PostgreSQL

Operating Systems

UNIX, AIX, Linux

Programming Languages

SQL ,PLSQL ,Linux Shell script

Education

M.Sc. Computers, Kakatiya University, India

Project Name	Technologies	Period
Fedex	Oracle ,Oracle cloud ,GoldenGate, Dataguard	Nov 2021 - Till now
Keurig Dr Pepper	Oracle ,Exadata cloud	May 2019 - Nov 2021
T-Mobile	Oracle, Sql Server ,Cassandra,Linux scripting	Oct 2017 - May 2019
PepsiCo	Oracle ,Exadata , Sql Server ,Linux scripting	Oct 2010 - Oct 2017
GE	Oracle ,Peoplesoft	Sep 2008 - Sep 2010
Carrefour, CFST	Oracle , PLSql	Jan 2005 - Aug 2008

Professional Experience**HCL (Client - Fedex)****Nov 2021 - Till now****Designation: Technical Architect, DBA Team lead Location : Frisco USA**

FedEx Express is a major American cargo airline based in Memphis, Tennessee, United States. As of 2024, it is the world's largest cargo airline in terms of fleet size and freight tons flown. It is the namesake and leading subsidiary of FedEx Corporation, delivering freight and packages to more than 375 destinations over 220 countries across six continents each day. FedEx Express is also the world's largest express transportation company.

- Responsible for 24x7 global 11g/12c/19c ,Oracle Cloud Oracle database environments
- Migration of On Prem database to Cloud using Goldengate, Dataguard, Datapump
- Upgrade of RAC and non RAC databases to latest version 12.2 to 19c
- Well experienced in Oracle cloud utilities like dbaascli ,backup_api
- Upgrade of Oracle Grid Infra Structure
- Successfully managed and executed (hands-on) various technology projects RAC conversion, Data Guard, Golden gate, Oracle Enterprise Manager 12c , Flashback, Datapump jobs
- Designed and developed UNIX and SQL scripts for cloning, patching automation, and monitoring.

- Golden Gate installation and maintenance
- Successfully performed critical database maintenance and monitoring activities such as detecting and resolving block corruption, disaster recovery, RAC performance tuning, add/remove RAC nodes reorganizing, upgrading and database sizing.

HCL (Client - Keurig Dr Pepper)**May 2019 - Nov 2021****Designation: Technical Architect, DBA Team lead Location : Frisco, USA**

Keurig Dr Pepper, formerly Keurig Green Mountain (2014–2018) is a publicly traded American beverage and beverage-maker conglomerate with headquarters in Burlington, Massachusetts. As of July 2018, the newly merged conglomerate also sells sodas, juices, and other soft drinks via its Dr Pepper Snapple (also called Dr. Pepper/7up Inc.) division based in Texas. Provided 24 * 7 support for databases , upgraded Oracle and Grid infra structure to 12.2, 19c version.

- Responsible for 24x7 global 11g/12c Oracle, Exadata database environments
- Migration of databases from on premise to Oracle cloud.
- Well experienced in Oracle cloud utilities like dbaascli , backup_api
- Upgrade of Exadata databases to latest version 19c
- Upgrade of Oracle Grid Infra Structure
- Successfully managed and executed (hands-on) various technology projects RAC conversion, Data Guard, Golden gate, Oracle Enterprise Manager 12c , Flashback, Datapump jobs
- Implementing Oracle security tools like wallets, profiles, TDE
- Designed and developed UNIX and SQL scripts for cloning, patching automation, and monitoring.
- Exadata cell maintenance and support for patching activities.
- Successfully performed critical database maintenance and monitoring activities such as detecting and resolving block corruption, disaster recovery, RAC performance tuning, add/remove RAC nodes reorganizing, upgrading and database sizing.
- Designed and executed Disaster Recovery exercise for Databases using RMAN and Dataguard
- Assisted developers with code development, testing, tuning, migration, and troubleshooting.
- Effectively managed internal and external (offshore) DBA teams to support global environments.
- Established standard policies and procedures for the team to streamline operational tasks.
- Skillfully interacted with global customers and built strong customer relationships.

- Spearheaded internal systems process improvement projects by evaluating third party products, arranging POC and presenting business proposals with cost benefit analysis and budget impact.
- Environment: Oracle 11g, 12c databases in RAC, Exadata in 12.1, 12.2, 19c

HCL (Client - T-Mobile)**Oct 2017 - May 2019****Designation: Senior Oracle DBA Location : Atlanta, Georgia**

T-Mobile Inc. is a United States-based wireless network operator whose majority shareholder is the German telecommunications company Deutsche Telekom (DT). Its headquarters are located in Bellevue, Washington, in the Seattle metropolitan area. T-Mobile is the third largest wireless carrier in the United States with 79.7 million customers as of the end of Q4 2018

Played a crucial role as Senior Oracle DBA for business-critical Oracle Databases. Provided 24 * 7 support for databases, upgraded Oracle and Grid infra structure to 12c version.

- Responsible for 24x7 global 11g/12c Oracle database environments
- Upgrade of RAC and non RAC databases to latest version 12.2
- Upgrade of Oracle Grid Infra Structure
- Successfully managed and executed (hands-on) various technology projects RAC conversion, Data Guard, Golden gate, Oracle Enterprise Manager 12c , Flashback, Datapump jobs
- Automated Database switchover using Dataguard Broker (dgmgrl)
- Designed and developed UNIX and SQL scripts for cloning, patching automation, and monitoring.
- Golden Gate installation and maintenance
- Successfully performed critical database maintenance and monitoring activities such as detecting and resolving block corruption, disaster recovery, RAC performance tuning, add/remove RAC nodes reorganizing, upgrading and database sizing.
- Designed and executed Disaster Recovery exercise for Databases using RMAN and Dataguard
- Assisted developers with code development, testing, tuning, migration, and troubleshooting.
- Effectively managed internal and external (offshore) DBA teams to support global environments.
- Implementing Oracle security tools like wallets, profiles, TDE
- Established standard policies and procedures for the team to streamline operational tasks.
- Skillfully interacted with global customers and built strong customer relationships.

Spearheaded internal systems process improvement projects by evaluating third party products, arranging POC and presenting business proposals with cost benefit analysis and budget impact.

HCL (Client - PEPSICO)**Oct 2010 - Oct 2017****Designation: Senior Oracle DBA Location : USA, India**

PepsiCo Inc. is an American multinational food and beverage corporation headquartered in Purchase, New York, United States, with interests in the manufacturing, marketing and distribution of grain-based snack foods, beverages, and other products.. Played a crucial role as Senior Oracle DBA for business critical Oracle Databases. Provided 24 * 7 support for databases of applications like Hyperion, Control M ,Informatica and other big dataware house environments

Responsibilities:

- Responsible for 24x7 global 11g database environments and more than 100 Oracle production databases.
- Successfully managed and executed (hands-on) various technology projects environment database upgrades, RAC conversion, Data Guard, Oracle Enterprise Manager 12c , Flashback, Datapump jobs
- Designed and developed UNIX and SQL scripts for cloning, patching automation, and monitoring.
- Successfully performed critical database maintenance and monitoring activities such as detecting and resolving block corruption, disaster recovery, RAC performance tuning, add/remove RAC nodes reorganizing, upgrading and database sizing.
- Designed and executed Disaster Recovery exercise for Databases using RMAN and Dataguard
- Achieved up to 50% performance improvement by tuning RAC and non-RAC databases.
- Assisted developers with code development, testing, tuning, migration, and troubleshooting.
- Effectively managed internal and external (offshore) DBA teams to support global environments.
- Mentored and empowered junior staff, offered hands-on training as necessary, conducted performance reviews, goal setting and formulated individual development plans.
- Established and maintained strong vendor relationships, monitored quality of service, interviewed and trained new external resources, recognized accomplishments and provided feedback.
- Proactively identified issues to ensure SLA's are met and facilitated collaborative analysis to address root causes of issues.
- Established standard policies and procedures for the team to streamline operational tasks.
- Skillfully interacted with global customers and built strong customer relationships.

Spearheaded internal systems process improvement projects by evaluating third party products, arranging POC and presenting business proposals with cost benefit analysis and budget impact.

Environment: Oracle 8i, 9i, 10g, 11g databases in RAC, NON RAC, VM etc.

UST Global (Client - GE)

S

Sep 2008 – Sept 2010

Designation: Oracle DBA (People Soft Oracle Database Support)

Client is a multinational American technology and services conglomerate incorporated in the State of New York. In 2009, Forbes ranked them as the world's largest company.

GE Corporate - People Soft Oracle DBA Team One of the primary environments in GE Corporate which caters to the entire GE's 350 thousand employees. It has around 250 odd mission critical down streams accessed by GE Global Employees. Other critical Apps environments here are the Shared Sourcing Services (SSS) & Oracle HR (OHR).

Responsibilities:

- Database Cloning/Refresh.
- Daily backup and maintenance job monitoring. (RMAN, Normal Hot and Cold backup)
- Interaction with Operations group for any job related issues.
- Interaction with UNIX group and Net backup Team for storage and tape related issues.
- Interaction with PeopleSoft development team for creating database objects and moving objects between schemas/databases
- Interaction with PeopleSoft end users regarding trouble tickets related to Oracle database.
- Interaction with PeopleSoft group for moving objects from development to test, support and production environment.
- PeopleSoft application software installation (PS Tools 8.5.07 and PS Tools 84716)
- PeopleSoft application domain configuration.
- UNIX and SQL script development for business and database infrastructure management
- Database refresh from Production to support, test and development environment (RMAN cloning)
- Periodic scheduled disaster recovery test for all Oracle databases for different applications including PeopleSoft and other applications.
- Patch/FixPack update and testing databases for all development, test, and support and production environment on every quarter.
- Routine performance monitoring and AWR analysis for identifying bottlenecks.
- Periodic statistics update for tables and indexes.
- Periodic data extraction and load for enterprise database warehouse system.

Environment: Oracle 9i, 10g, 11g, Toad, Sql Developer, OEM,

Future Focus Infotech (Client – Carrefour)**Jan 2005 – Aug 2008****Designation: Oracle DBA**

Client is one of the leading truck manufacturers in US. The primary responsibilities include providing 8/7 support for PEOPLESOFT production and non-production databases. Support activities include all database administration tasks and database and batch job monitoring, alert monitoring, people soft builds, schema builds

Responsibilities:

- Database Cloning
- Database Refresh
- Patch Management
- User and responsibilities Management
- RMAN, Hot and Cold backup
- Restoration and recovery
- Space management
- Logical Backup
- Network configurations and other database activities
- PeopleSoft Table Builds using Application Designer
- PeopleSoft Schema Cloning
- User access management

Environment: Oracle 9i**Software Used:**

- Operating system: HP-UX, AIX
- Database: Oracle 10g
- Other softwares/languages: Putty, Peoplesoft apps designer, UNIX Shell scripting.
