

Ravikanth Putta QA Manager / Lead Analyst Irvine, CA

ravikanthputta@gmail.com +1 714 824 1222 <https://www.linkedin.com/in/rputta>

Objective

QA professional with 15+ years of experience in test strategies, plans, and defect management for Fortune 500 enterprises. Proven track record in optimizing QA processes, driving efficiency and collaboration. Skilled in agile methodologies, test automation, and cross-functional team leadership.

Professional Experience

QA Manager *First American Title, Santa Ana, CA Aug 2013 – Present*

- Supervised a QA team of 5 direct reports and a Production Support team.
- Managed quality for commercial business applications and coordinated integration testing for upstream and downstream applications.
- Created test procedures, tracked metrics, generated reports, and supervised execution
- Initiated programs to improve testing efficiency.
- Conducted functional, regression, integration, and performance testing.
- Promoted continuous process improvement.
- Monitored and reported on testing progress.
- Implemented change management strategies to ensure seamless integration of new processes and tools within the QA team.
- Performed risk management assessments to identify potential issues and mitigate risks within the testing process.
- Mentored QA engineers, managed QA/product support teams, and trained new team members on the application.
- Assisted in the preparation and execution of internal and external audits, ensuring compliance with regulatory standards and internal policies

Achievements

- Proved QA necessity, boosting project quality by 30%
- Established a QA team by recruiting top talent and successfully launching its operations
- Reduced defect rates by 40% and accelerated time to market by 20%.
- Identified key indicators, significantly decreasing quality oversights.
- Boosted team efficiency through strategic data analysis.
- Partnered with test automation to cut test time.
- Developed QA procedures, enhancing efficiency and slashing training time.
- Implemented test automation tools, improving development speed.

- Elevated client satisfaction and reduced error rates with refined testing procedures.
- Resolved customer complaints efficiently, increasing loyalty by 20%.
- Decreased recurrence of customer complaints through effective issue investigation

QA Manager / Coordinator *Cognizant Tech June 2010 - July 2013*

- Managed QA for clients including Hyundai Information Systems & Health Net clients.
- Handled QA for custom mainframe ABS application.
- Developed TDM strategy, work orders, and test data environments, and created EDI files.

Sr. QA Lead Analyst Comsys *January 2009 to May 2010*

- Managed QA for BCBS Care First Owings Mills, MD (Trizetto Facets).
- Established data collection framework and analyzed project data.

Knowledge Areas

- Software Development Life Cycle (SDLC)
- Testing Methodologies: Functional, Regression, Integration, Performance, Load, Security
- Test Automation: Framework design and implem and QA Best Practice implementation
- Risk Management: Identification, analysis, and mitigation
- Metrics and Reporting: Key performance indicators (KPIs), defect density, test coverage
- Continuous Improvement: Process evaluation and refinement
- Communication and Collaboration: Cross-functional team coordination
- Mentoring and Leadership: Training and guiding team members
- Integration Testing: Ensuring seamless component integration
- Security Testing: Identifying and addressing vulnerabilities
- User Experience (UX) Testing: Evaluating usability and user satisfaction
- Incident Management: Prompt defect resolution and incident handling
- Documentation: Comprehensive and accurate test documentation
- Customer Feedback Management: Analyzing feedback to improve quality

Tools

Azure, Azure Test Plan, Azure Pipelines, AppInsights, Fullstory, Jira, TestCafe, Playwright, Selenium, Git, GitHub, Azure DevOps, AWS, MS Teams, Slack, Atlassian Confluence, Figma, iOS, Android

Work Authorization

U.S. Citizen
