Current Designation (Role)	Principal Consultant, ERP	
Experience Summary		
- Over 8.5 years of experience in Oracle Fusion Financials Cloud, specializing in business process mapping, business analysis, configuration, and testing of Financials and Procurement modules. - Expertise in all phases of Oracle ERP Financials, from Requirement gathering and implementation to post-go-live support and ongoing activities. - Led discovery sessions, gathered requirements, and performed fit-gap analysis with users to ensure alignment with business needs. - Skilled in conducting Conference Room Pilot (CRP), Systems Integration Testing (SIT) and User Acceptance Testing (UAT) sessions, ensuring successful project go-lives and providing post-production support. - Experienced in working with banks for payment integrations and corporate card issuers for corporate card expense issues. - Strong background in integrations with external parties and custom BI reports. - Proficient in using Rapid Implementation (RI) tools for fast configuration and FSM for manual project setup. - Solid understanding of Costing and SCM modules, with the ability to effectively analyze and configure related processes. - Proficient in creating allocation rules and developing complex FRS, SmartView, and OTBI reports. - Extensive experience in GL period close processes, including revaluation, translation, consolidation, and intercompany rules using AGIS. - Ability to manage multiple tasks, meet deadlines, and work efficiently under pressure, with excellent organizational, analytical, and interpersonal skills. - Self-motivated, accountable, and results-driven, with the ability to work independently and collaboratively in team environments. - Experienced in knowledge transfer, creating documentation, and training end users and peers on various Financials modules. - Familiar with support ticketing tools and applications, ensuring effective issue management and resolution. - Delivered comprehensive training and presentations to diverse audiences, tailoring content to meet user needs.		
Number of Oracle Implementations – 7 Implementations and 9 Support Projects		
Recent Projects		
Project - 1	Pomeroy	
Project Description	Pomeroy IT Solutions, Inc. provides IT infrastructure management services. The Company offers services in the areas of the service desk, hardware and software support, desktop engineering, and asset management.	
Designation (Role)	Principal Consultant	
Modules	Finance	
Environment	Cloud Applications	
Time Period & Duration	April 2024 – Present	
Roles and Responsibilities		

- Led the implementation of key Finance modules, including General Ledger (GL), Accounts Payable (AP), Fixed Assets (FA), Cash Management (CM), and Expenses.
- Contributed throughout the entire project lifecycle, from requirements gathering to post-go-live hyper care support.
- Designed the chart of accounts and established related structures.
- Conducted CRP-1, SIT, and UAT sessions for the Finance modules, including GL, AP, FA, FA Leases, CM, and Expenses.
- Collaborated with banks to integrate Payment and Bank Statement processes.
- Partnered with corporate card issuers (AMEX and VISA) to implement corporate card expense management.
- Managed multiple integrations with external systems and custom components.
- Worked on the integration of CyberSource for payment processing.
- Worked with Vertex Tax integration to ensure compliance and accurate tax calculations.
- Collaborated with the FCCS and EDMCS teams for seamless GL implementation.
- Handled various data conversions, including:
GL conversions spanning 5 years
AP open invoices
Supplier data, Supplier Bank accounts, and Branches
FA Assets and Asset Leases
- Led the integration and implementation of Supplier Portal and Supplier Portal invoices.
- Implemented IDR (Invoice Data Recognition) for AP invoices, improving automation and accuracy.
- Successfully rolled out Mobile Expenses for enhanced user experience and accessibility.

Project - 2	Shockwave Medical
Project Description	Shockwave Medical is a Cardiovascular Medical Device Company changing how calcified cardiovascular disease is treated with Intravascular Lithotripsy (IVL).
Designation (Role)	Project Lead
Modules	Finance, Procurement, Costing and SCFO
Environment	Cloud Applications
Time Period & Duration	February 2023 – March 2024
Roles and Responsibilities	
• Led the support team for all Finance modules, ensuring smooth operations and issue resolution. • Provided comprehensive support for Financial modules, Procurement, Costing, and Supply Chain Financial Orchestration. • Validated configurations across Financial modules and developed detailed training materials for Finance teams. • Led the end-to-end implementation of IDR, including setup, testing, test script creation, user training, UAT, and the creation of training documentation. • Designed and developed complex FRS reports based on specific business requirements. • Supported the integration of CyberSource for seamless payment processing. • Assisted with the integration of OneSource for accurate tax calculations and compliance. • Supported period-end closing activities and facilitated subledger reconciliation with General Ledger (GL). • Conducted regression testing and tested new releases to ensure stability and performance.	

Project - 3	CSE Insurance Group - Support
Project Description	CSE Insurance Group is a multi-line provider of personal, property and casualty insurance recognized for its fairness, integrity, and exceptional service.
Designation (Role)	Lead Functional Consultant
Modules	Finance
Environment	Cloud Applications
Time Period & Duration	June 2022 - Present

Roles and Responsibilities

Time Period & Duration	June 2022 – March 2024
Roles and Responsibilities	
- Led the support efforts for the THG Group, managing all Financial and Procurement modules. - Collaborated with business and IT teams to resolve issues promptly and conducted weekly status meetings to track progress.	
Project - 5	Silvergate Bank Implementation and Support
Project Description	Silvergate Bank is a commercial bank and financial technology company that provides financial infrastructure solutions and services for the digital currency industry.
Designation (Role)	Lead Functional Consultant
Modules	Finance
Environment	Cloud Applications
Time Period & Duration	Implementation - Dec 2020 to June 2022 Support – June 2022 – March 2024
Roles and Responsibilities	
- Contributed to the end-to-end implementation of the Financial modules, including Enterprise Structures, Chart of Accounts, and configuration setups for GL, AP, AR, FA, CM, and Expense modules. - Played an active role throughout the project lifecycle, from requirements gathering and mapping existing business processes to Oracle Fusion Cloud ERP, to designing custom solutions for process gaps and implementing the complete solution. Additionally, managed the migration of suppliers, customers, employees, users, general ledger balances, and daily balances data to Oracle Fusion Cloud ERP. - Assisted in preparing Financial reports using FR Studio and Smart View and contributed to the creation of test scripts. - Implemented Average balances for Bank	
Project – 6	Sangamo Therapeutics inc - Implementation and Support
Project Description	Sangamo Therapeutics is a biotechnology company based in Brisbane, California. It applies cell and gene therapy to combat haemophilia and other genetic diseases. The company has implemented Oracle ERP Financial (GL, AP, AR, CM, FA), Procurement, Purchasing and EPM: Enterprise Planning & Budgeting Cloud Service (EPBCS) to streamline their internal processes.
Designation (Role)	Functional Consultant
Modules	Financials and Procurement

Environment	Cloud Applications
Time Period & Duration	Implementation: Dec 2019 to Nov 2020 Support: Dec 2020 – March 2024
Roles and Responsibilities	
- Actively participated in all phases of the project lifecycle, including requirement gathering from business users, mapping existing business processes to Oracle Fusion Cloud ERP, designing custom solutions to address process gaps, and implementing the complete solution. Managed the migration of suppliers, customers, employees, users, and general ledger and daily balances data to Oracle Fusion Cloud ERP. - Provided post-production support by collaborating with Oracle Support and the product development team to resolve technical service requests related to Oracle Fusion products and integrations. - Resolved production issues reported by users, including reporting, configuration, and training issues. Delivered timely resolutions and documentation within SLA and created service requests with Oracle Support for product bugs, ensuring follow-up based on issue severity and priority. - Oversaw post-production support for all Finance and Procurement modules, ensuring smooth ongoing operations.	
Project - 7	Aimmune Therapeutics inc – Implementation and Support
Project Description	Aimmune Therapeutics is a biopharmaceutical company developing and bringing new treatments to people with potentially life-threatening food allergies. Aimmune has implemented Oracle ERP for streamlining their financial operation process from Self Service Requisitions, Purchasing, ADP, Concur, Oanda, Bank Integrations with multiple countries and TM1 (Planning & budgeting) integration.
Designation (Role)	Functional Consultant
Modules	Financials, Procurement, Costing and SCM
Environment	Cloud Applications
Time Period & Duration	Implementation: Dec 2019 to Nov 2020 Support: Dec2020 – Dec 2021
Roles and Responsibilities	
- Contributed to the end-to-end implementation of the Financials module, including Enterprise Structures, Chart of Accounts, and configuration setups for GL, AP, FA, and CM modules. - Actively participated throughout the project lifecycle, including gathering requirements from the business, mapping existing business processes to Oracle Fusion Cloud ERP, designing custom solutions to address process gaps, and implementing the complete solution. Managed the migration of suppliers, customers, employees, users, and general ledger balances data to Oracle Fusion Cloud ERP. - Provided post-production support by collaborating with Oracle Support and the product development team to resolve technical service requests related to Oracle Fusion products and integrations. - Addressed production issues reported by users, such as reporting, configuration, and training issues, ensuring timely resolution and documentation within the SLA. Created service requests with Oracle Support for product bugs, following up based on issue severity and priority. - Managed post-production support for all Finance and Procurement modules, ensuring continuous and efficient operations	
Project – 8	Scopely Inc. support and Digit Gaming Implementation.
Project Description	Scopely, Inc is an American interactive entertainment company and mobile-first video game developer and publisher. The company is headquartered in Culver City, California, with offices across the US, EMEA and Asia. Digit gaming has been acquired by Scopely.
Designation (Role)	Functional Consultant
Modules	Financials

Environment	Cloud Applications
Time Period & Duration	Apr 2019 to Dec 2019
Roles and Responsibilities	
▪ Provided support for all Financial modules at Scopely Inc. post-go-live. ▪ Played a key role in the end-to-end implementation of the Digit Gaming roll-out project, overseeing the successful implementation of all Finance modules. ▪ Led the implementation of European tax configurations in Oracle Fusion to ensure compliance and accurate tax calculations.	

Project – 9	Instacart Implementation and Support
Project Description	Instacart is an American delivery company that operates a grocery delivery and pick-up service in the United States and Canada. The company offers its services via a website and mobile app. The service allows customers to order groceries from participating retailers with the shopping being done by a personal shopper. Instacart has implemented Oracle Cloud Fusion ERP to manage their entire Financial systems AP, AR, GL, Fixed Assets, CM and Expenses.
Designation (Role)	Functional Consultant
Modules	Financials and Procurement
Environment	Cloud Applications
Time Period & Duration	Mar 2018 to Apr 2019
Roles and Responsibilities	
▪ Contributed to the end-to-end implementation of the Financials module, covering Enterprise Structures, Chart of Accounts, and configuration setups for GL, AP, AR, FA, CM, and Expense modules. ▪ Actively participated throughout the project lifecycle, including gathering business requirements, mapping existing business processes to Oracle Fusion Cloud ERP, designing custom solutions to address process gaps, and implementing the full solution. Managed the migration of suppliers, customers, employees, users, and general ledger balances to Oracle Fusion Cloud ERP. ▪ Handled configurations for custom roles, Subledger Accounting, allocation rules (Formula and Rule-based), consolidation, translation, revaluation, and elimination. ▪ Managed data conversions, including customer and supplier loads, and processed US 1099 invoices. ▪ Prepared FRS and Smart View reports to meet business requirements. ▪ Analyzed new features, conducted demos for users, gathered feedback, and successfully implemented R13, ensuring smooth post-upgrade tasks. ▪ Configured and completed the Fusion Financials roll-out (extension) for a new business acquisition, providing ongoing support after go-live for all Financial modules.	

Project – 9	TBN Implementation and Support
Project Description	The Trinity Broadcasting Network is an international Christian-based broadcast television network and is considered the world's largest religious television network. TBN has implemented Oracle Cloud Fusion ERP to manage their entire Financial systems AP, AR, GL, Fixed Assets, Purchasing and Reporting.
Designation (Role)	Functional Consultant
Modules	Financials
Environment	Cloud Applications
Time Period & Duration	Jan 2017 to Mar 2018
Roles and Responsibilities	
▪ Contributed to the end-to-end implementation of the Financials module, covering Enterprise Structures, Chart of Accounts, and configuration setups for GL, AP, AR, FA, CM, and Expense modules.	

- Played an active role throughout the project lifecycle, including gathering requirements, mapping existing business processes to Oracle Fusion Cloud ERP, custom designing solutions to address process gaps, and implementing the full solution. Managed the migration of suppliers, customers, employees, users, and general ledger balances to Oracle Fusion Cloud ERP.
- Provided post-production support by collaborating with Oracle Support and the product development team to resolve technical service requests related to Oracle Fusion products and integrations.
- Addressed production issues reported by users, such as reporting, configuration, and training issues, ensuring timely resolution and documentation within the SLA. Created service requests with Oracle Support for product bugs and followed up based on issue severity and priority
