Education

University of Central Missouri

Master of Science in Computer Science (GPA: 3.55 / 4.00)

Expected May 2025

Lee's Summit, Missouri

Experience

Software Engineer Intern

AI LABS WEB LLC

Jan 2025 – May 2025

Charlotte, United states

- Designed, developed, and optimized web applications and AI-driven solutions using modern technologies.
- Collaborated with cross-functional teams to implement machine learning models and integrate them into web applications.
- Conducted 100+ code reviews, debugging sessions, and performance tuning tasks to ensure high-quality software solutions.

Java Developer

Monocept

July 2021 – August 2023

Hyderabad, India

- Refactored a large monolithic microservice into five specialized microservices, improving system scalability and maintainability while reducing deployment times by 40%, enabling faster feature rollouts to end-users.
- Performed a strong testing and production logs monitoring in real time, ensured software reliability and scalability functionality in a clouded environment. Received high praise from clients and management for significantly enhancing operational efficiency.
- Co-created 4-6 efficient business specific applications, using core Java to introduce an innovative set of insurance products on a yearly basis
- Refactored a big Java microservice into five granular and high performant microservices to separate communication, background task processing and data operations for better maintainability of the system.
- Proactively monitored production logs with CloudWatch and Kibana, performed extensive unit and integration testing, and worked on debugging to maintain the quality of software as well as identified issues for an accurate resolution.

Software Engineer Intern

Revature

Feb 2021 – July 2021

Andhra Pradesh, India

- Completed a 30-week intensive training in Java Full Stack development, mastering Java, MySQL, Hibernate, and the Spring framework.
- Developed full-stack applications using Angular for the fronted and deployed Cloud Native Micro services in an AWS Cloud environment. Gained hands-on experience in building and optimizing robust, scalable web applications, enhancing both back-end performance and front-end user experience.

Projects

Cloud-based Inventory Management System | AWS

- Devised an innovative cloud-based inventory management framework utilizing AWS, resulting in 50audits and a substantial reduction in manual errors across the entire supply chain process.
- Improved supply chain efficiency by 30integrated real-time data processing and multi-warehouse synchronization.

Online Quiz | Java Spring Framework, MySQL

- Developed and implemented an interactive online quiz application using Java Spring Framework, integrating MySQL for efficient data storage and management of user profiles, quiz questions, and scores.
- Optimized the backend by leveraging Spring's dependency injection and MVC architecture to ensure seamless scalability and maintainability, resulting in a 30improvement in system response time.

Technical Skills

Languages:Java, Python, C/C++, HTML/CSS, SQL

Technologies: Java Spring Framework, Full-Stack Development, Android App Development.

Developer Tools: MongoDB, Kibana, Microservices architecture, VS Code, AWS, Snowflake, MySQL.

Certifications:Java Spring Boot, AWS Certified Developer, Agile Project Management, Android App Development.
