

David Martinucci

Professional Summary

Highly accomplished IT Professional with extensive experience in technology and service management across multiple locations and countries. Demonstrates exceptional verbal, listening, and written communication skills, effectively engaging with at all levels of organizational and public. Renowned for swiftly resolving challenges with precision and efficiency, committed to delivering first-class service and support in the dynamic landscape of software and hardware.

- Managed a comprehensive IT department servicing three locations across the US and Mexico, ensuring seamless operations and support.
- Provided end-user support to nine branches in five countries: Brazil, Canada, Chile, Peru, and the USA, enhancing productivity and user satisfaction.
- Successfully hired and managed a diverse team of consultants, contractors, and employees, fostering a collaborative work environment.
- Designed and installed Microsoft Domains to streamline operations and improve system reliability.
- Maintained robust network security through the implementation of firewalls and email/web filtering, safeguarding organizational data.
- Monitored and managed the infrastructure of servers, routers, and switches, ensuring optimal performance and minimal downtime.
- Efficiently closed Helpdesk tickets, maintaining high service levels and user satisfaction.
- Developed and executed comprehensive disaster recovery plans, ensuring business continuity in the face of unforeseen events.

Professional Experience

Service Corporation International (SCI) Houston TX.

2021 - 2024

Information Security Access Analyst - Identity and Access Management

The Information Security Access Analyst is a vital member of the Information Security (InfoSec) team, responsible for managing and supporting Identity and Access Management (IAM) systems and tools. The role involves evaluating and customizing SailPoint's IdentityNow/Identity Security Cloud to ensure robust access control while maintaining compliance with regulatory standards.

- IAM System Management: Evaluate, customize, and manage SailPoint's IdentityNow/Identity Security Cloud. Create and maintain access profiles, roles (Role-Based Access Control - RBAC), and workflows to enforce security policies.
- Compliance and Auditing: Collaborate with Internal Audit to ensure compliance with SOX controls, segregation of duties, and other regulatory requirements. Implement and maintain appropriate security controls in a manner that is both auditable and manageable.
- Access Management: Support Multi-Factor Authentication (MFA) and Single Sign-On (SSO) solutions, including OKTA. Manage user access requests, including resetting multi-factor authentication, resetting behavior profiles, suspending, and deactivating user accounts.
- Integration and Protocols: Add and configure applications using OpenID Connect (OIDC) and Secure Web Authentication (SWA). Maintain familiarity with SAML and OAuth protocols for secure access management.
- Technical Support and Issue Resolution: Address daily tickets related to access issues, quickly resolving problems and provisioning users and system access. Utilize Powershell for managing Exchange Mailbox, file shares, and scripting for new user setups.
- Administration: Manage Active Directory (AD) for information security administration. Oversee Microsoft 365 and Azure administration to ensure secure and compliant access.
- Data Management: Utilize SQL for data management tasks, demonstrating a firm understanding of SELECT and JOIN statements to extract and manipulate data as necessary.

Skills and Qualifications:

- Strong experience in IAM systems, with a focus on SailPoint IdentityNow.
- Proficiency in RBAC, Active Directory, and Microsoft 365/Azure administration.
- Familiarity with MFA, SSO, OIDC, SWA, SAML, and OAuth.
- Experience with Powershell scripting for user and system administration tasks.
- Knowledge of compliance frameworks, particularly SOX.
- Excellent problem-solving skills and the ability to resolve technical issues efficiently.

Deugro (USA) Inc. Houston TX.

2018 – 2021

Support Engineer for Deugro Americas

As a dedicated Support Engineer for Deugro, a specialized freight forwarder company, I serve as the primary point of contact for end users facing hardware, software, or system issues. My role involves effectively liaising between end users and various IT departments to swiftly comprehend and resolve technical challenges.

- Provide day-to-day technical support to employees, troubleshooting and resolving computer-related issues.
- Administer Active Directory and Azure accounts, ensuring seamless user access and security.
- Manage and support IBM Lotus Notes, CargoSoft, Microsoft Windows Deployment (PXE), Quest (KACE) helpdesk, and Microsoft Teams.
- Leverage extensive experience in designing Microsoft networks to facilitate the successful establishment of new branches and the relocation of offices across Canada and the USA.
- Conduct online training and support for Microsoft applications, enhancing employee proficiency and productivity.

Technical Expertise:

- Over 2 years of hands-on experience with the Microsoft Azure Cloud Platform.
- Completed online training for Microsoft Certifications AZ-900 (Fundamentals) and AZ-103 (Administrator).
- Proficient in managing Microsoft Office 365, including Exchange, OneDrive, Teams, SharePoint, and Azure CLI.
- My commitment to providing exceptional support and my in-depth technical knowledge contribute to the overall efficiency and effectiveness of our IT operations.

Hewlett Packard (DXC) (Kforce, Insight Global). Houston TX.

2015 – 2018

System Administrator

Infrastructure Development: Collaborated with teams to build servers over a four-month period, followed by 17 months in the Shared Web Hosting Department. Gained comprehensive understanding of HPE roles, policies, and procedures which facilitated effective project execution.

Public Key Infrastructure (PKI):

- Developed expertise in PKI, including the creation, management, distribution, storage, and revocation of digital certificates.
- Played a critical role in the installation and customization of Venafi 15.3, enhancing security protocols.

Venafi Management:

- Upon authorization of Venafi for production, initiated the development of reports and templates for the Venafi dashboard, streamlining certificate management processes.

IT Infrastructure Support:

- Partnered with DXC Technology to build new IT infrastructures, ensuring robust setups for various departments.
- Worked with the Windows Delivery Team as an IT Infrastructure Specialist, tasked with the installation and configuration of both physical and virtual machines.

Physical Server Configuration:

- Utilized HP ILO 4.0 for configuring hard drive arrays, BIOS settings, and network interface cards during physical server builds.
- Built VM hosts for the Development Department and configured servers for application and web practices.

Storage and Networking:

- Created dedicated, mounted shares, and clustered hard drives to optimize resource allocation and access.
- Configured network interface cards including primary, backup, heartbeats, and team settings for enhanced performance and redundancy.
- Technical Support:

Provided Level 3 support, including rebuilding Microsoft Servers and installing the Venafi application.

Delivered technical assistance and support to HPE employees, addressing complex issues effectively.

Training and Documentation:

- Developed training materials including documentation, custom videos, and live demonstrations to educate colleagues on new systems and processes.

Skills and Technologies:

- Venafi 15.3
- Public Key Infrastructure (PKI)
- HP ILO 4.0
- Windows Server Administration
- Virtual Machine Configuration
- Networking and Storage Solutions
- Technical Support and Training

Eagleton Engineering LLC. (Jacobs Engineering). Houston TX.

2013 – 2014

System Administrator

- Network and System Management: Performed a variety of network and system functions, ensuring uninterrupted operations for daily business activities. Redesigned network topology to optimize performance and reliability.
- User Support & Communication: Developed strong communication skills to assist frustrated users, fostering a calm and supportive environment. Utilized a patient and tolerant disposition to effectively resolve user issues.
- Software Installation & Configuration: Installed and configured various server applications, including Stafffinder, Malware Bytes, and Heroix Longitude, to enhance system performance and security.
- Scripting & Policy Management: Created and modified login scripts and Group Policies to streamline user access and improve security within the network.
- Infrastructure Support: Provided support for network devices, desktop systems, and Microsoft Hyper-V servers within a Windows 2003 domain, ensuring all systems operated smoothly.
- Network Redesign: Redesigned core network components, including Active Directory, DNS, DFS, DHCP, and VPN, to improve functionality and security.
- Database Backup & Recovery: Designed and implemented backup and recovery solutions for MS SQL databases, utilizing mirroring and transaction replication techniques to safeguard critical data.
- Email System Management: Modified and managed Exchange 2010 policies, including public folders and calendars, to meet organizational needs.
- Systems Integration: Successfully merged Eagleton's network systems, data, and applications with Jacobs Engineering, facilitating a smooth transition and integration post-acquisition.

Key Skills:

- Network Administration
- System Configuration & Management
- User Support & Troubleshooting
- Scripting & Automation
- Database Backup & Recovery
- Active Directory & DNS Management
- Microsoft Hyper-V & Exchange Administration
- Strong Communication & Interpersonal Skills

Professional Skills Overview

Enterprise Management

Software Delivery Options (SDO)
Asset Management Options (AMO)
Advanced Help Desk Options (AHD)
Remote Control Options (RCO)
Quest KACE Systems Management Appliance

Cloud Computing

Windows Azure Cloud
Microsoft Azure (Office 365) Admin Centers
Azure cloud account and groups
OneDrive Management
Remote Desktop Server
Teams (Channels and Tabs)

Endpoint Protection

Symantec Endpoint Protection Manager
McAfee Endpoint Protection
Windows Server Update Services (WSUS)
Backup and Disaster Recovery
Barracuda 200 SPAM Filtering v4.1 firewall
Symantec Backup Exec (v10 - v11d)
Microsoft Backup & Shadow Copy
HP StorageWorks & Tape Drive Solutions

Performance and Network Monitoring

Heroix Longitude
PRTG (Paessler Router Traffic Grapher) Monitoring
Cisco Network Assistant (v5.6)

Web Hosting and Management

MS Windows IIS Manager (2003 - 2012)
SharePoint (Web pages and Storage)

Enterprise VoIP Systems

Cisco Unified Communications (v7.1.2)
X-Lite (SIP)
Digium SwitchVox (5.5.7)

System Administration

Microsoft Network (MCSE)
Windows Administration (2003 - 2016)
Windows Active Directory (AD,DHCP,DNS)
Windows Exchange Server (2003, 2016)
Windows Server Enterprise Technology
Windows Core Technologies
Microsoft Group Policy (Ex: Printer Deployment)

Virtualization Technologies

VMware ESXi (5.1, 5.5)
vSphere Client and Web
Microsoft Hyper-V (2008)

Network Management

Routers / Switches / Firewalls
Cisco ASA5505, RV042, WS-C2960/ WS-C3560
WatchGuard 9.1 (Firebox X core E-Series X750e)
WiMAX Motorola Wireless 400 series

Scripting and Programming

Powershell Scripts
Visual Basic (login.vbs)
Kixtart (v4.53+) Login Scripts (login.kix)

Cyber Security

Multi-Factor Authentication (MFA)
Venafi Trusted Protection Platform
Public Key Infrastructure (PKI)
Certificate Authority (CA)
SailPoint IDentityNow
SailPoint Workflow (JASON Expressions)
SailPoint Entitlements, Access Profile and Roles
SailPoint Essentials Training

Management Training

Real-World Customer Relations Training
Team Communications Training
Management and Leadership Training
