PMP, CSM, AWS certified | 15 years exp | ERP & Cloud Lead at Cognizant | The Wharton School

EDUCATION

University of Pennsylvania - The Wharton School

2019 - 2019

Strategic Management Program

Birla Institute of Technology and Science, Pilani, India

2010 - 2012

Masters in software engineering

Panjab University, India

Bachelor of Engineering, Computer Science

2005 - 2009

PROFESSIONAL EXPERIENCE:

Cognizant

Remote

Sr. Principal Project Manager: M&A, Gen AI

Jul 2021 – Current

- Directed a multi-million-dollar IT & Infra Merger & Acquisition program for a major pharmaceutical client, accelerating integration by 30% through strategic roadmaps and cross-functional leadership.
- Led a digital LIMS transformation, cutting paper-based processes by 100%, achieving full FDA compliance (IQ, OQ, PQ), and reducing operational delays by 25%.
- Implemented Gen AI – LLM based RAG chatbot solutions, enhancing support operations and elevating customer satisfaction by 35%.
- Upgraded 15+ RDCs to 100G Fiber Interconnect under SAFe Agile, boosting network bandwidth by 40% and ensuring seamless VM/app migrations across 500+ hosts.
- Established robust Infra Asset Management practices, slashing downtime by 20% and optimizing asset lifecycle for enterprise-wide governance.
- Oversaw non-SAP software M&A initiatives, enabling legal separation with minimal disruption and cutting transition costs by 15%.
- Coordinated 10+ SME workstreams through pre-cutover, cutover, and hyper-care phases, maintaining 99.9% system uptime.

Zebra Technologies

Toronto, Canada

Principal Technical Program Manager

Nov 2020 – June 2021

- Led the SMART Pack IoT initiative to optimize trailer/cargo container capacity, employing advanced machine learning and computer vision to 3D-map load volumes, increasing utilization by 30%.
- Served as Release Train Engineer (RTE) and Agile Coach, orchestrating Scrum of Scrums, PI Planning, and retrospectives, while partnering with Sales and Product Management to refine roadmaps and backlogs.
- Leveraged AI, AWS/GCP, and prescriptive analytics to accelerate time-to-market and deliver data-driven insights, significantly reducing operational inefficiencies.
- Presented real-time KPIs and demos to the CTO and executive stakeholders using Power BI, securing buy-in for continued product enhancements and expansions.
- Maintained a proactive risk register, mitigating critical project impediments and ensuring consistent on-time delivery with minimal scope creep.

Cognizant (Client: PepsiCo, DnB, Sanofi)

New Jersey, USA

Sr Technical Program Manager

Mar 2016 – Oct 2020

- Led \$10M+ M&A initiatives across 15+ workstreams for global clients (Sanofi, PepsiCo, DnB, BD Bard), collaborating with Financial Controllers to manage budgets (Planview), conduct Buy-Sell-Hold analyses, and present strategic updates to Steering Committees.
- Drove end-to-end supply chain and ERP solutions in GxP/FDA-regulated environments, ensuring 100% compliance and accelerating time-to-market for innovative medical products.
- Implemented robust project governance (scope definition, risk mitigation, strategic influencing) that improved on-time delivery rates by effectively coordinating multiple vendor teams.
- Managed global quality workstreams to meet HA & MHRA regulatory commitments, optimizing training, documentation, and record management systems for continuous process improvement.

Tata Consultancy Services (Client: Johnson Controls)

Michigan, USA

Project Manager

Jul 2012 – Feb 2016

- Managed ERP implementations for a \$45B global automotive parts giant, delivering ahead of schedule and earning a "Star Award" for exceeding performance benchmarks.
- Translated complex business needs into actionable software requirements, guided User Acceptance Testing (UAT) to uphold quality standards, and maintained comprehensive documentation.
- Performed thorough system analysis and design using UML, UX wireframing (InVision), and process mapping (Visio), ensuring seamless user experiences and streamlined workflows.

Capgemini (IGate)

Mumbai, India

Software Engineer

Feb 2010 – Jun 2012

- Streamlined ERP modules, enhancing cross-team collaboration and efficiency as a Functional Analyst.

- **Led development of mobile prototypes** for a \$62B insurance client (Auto, Dental, Home, Life), leveraging cutting-edge web technologies within an Agile framework to enhance Sales Rep productivity.
- **Recognized with Quarterly Value Contribution Award** for championing innovation and delivering customer-focused solutions as part of the Mobility COE.
